

Sherrilltree

2021 Sherrilltree Master Catalog

800-525-8873 // Sherrilltree.com

We are excited to roll out our 2021 Master Catalog, featuring new and updated gear and great information and tech tips from some of the best arborists in the world.

As always our team is committed to serving you with an extensive selection of products and information to get the job done safely and efficiently.

With the continued growth of the arborist industry, we are doing our part to help the industry and share what we've learned. In this catalog you will find interviews with top arborists to get their take on safety, climbing, rigging, and other topics. You can find their full interviews online under our "Tips From The Canopy" section.

New for 2021 is our **Capture the Flag / #ClimbSafeCutSafe** campaign. Included in every order you will find your very own Sherrilltree Flag - a microfiber cloth (perfect for cleaning your visor or glasses) with a helpful safety tip on the back. Take a cool photo of you or your crew with the flag, post it on social media with the hashtag **#ClimbSafeCutSafe** to be entered to win free gear throughout the year.

We continue to offer **Free Shipping** on orders over \$99, **Same Day Shipping Promise** on in stock items, and our **150% Price Match Guarantee** (see page 232 for details.) We look forward to continuing to serve you in 2021. Climb safe. Cut safe.

Brandon, Sherrilltree Brand Manager

Proud to support the tree care industry

WARNING! Tree care often requires working above or being elevated above ground level. If you fall or something drops on you, you can be seriously injured or killed. VSG / Sherrilltree is not responsible for accidents resulting from the use, or misuse of any products. Products are provided with the understanding that the purchaser and/or user are thoroughly familiar with application and proper use. In this catalog, descriptions and drawings are given to show various uses or known techniques, and are not intended as a substitute for instructional review and/or proper training.

ON THE COVER

Big thanks to Brian Rector @rise117 for the amazing cover shot on a Ponderosa Pine, in Napa Valley, CA.

Also want to shout out to Daryl Stanley @3_strand_tcs for the arborist interviews!

ROPE

TIPS FROM THE CANOPY

Jared Abrojena on Ropes

Owner of Evergreen Tree Care (ETC)
President/Co-founder of The Academy

ST: There are three general approaches to ropes- the guy who has a rope for every occasion, altitude, humidity index, etc., the guy who burns through ropes like his dually goes through diesel; and the guy who keeps his precious rope no matter what, even when it has become dangerous. Which of these have you been in the past?

JA: I was never the turn and burn guy, I always had more care for my ropes because my family's company wasn't a big company. Starting off, I had one harness, one carabiner, and one rope. If you messed up a rope, no one was going to give you another one. I would have to go beg Dad, he'd get mad, and I'd be in trouble. I knew I had to keep it clean, because I would have to take it to competitions. As I got older, there was a phase where I had a rope for every occasion because I could. On that end, it was more to test and learn.

ST: What were some of the benefits that came out of that for you?

JA: It enabled me to test products. I could use three different ropes in a day and really compare their characteristics side by side. I like to say, "you can't knock it till you rock it." I don't like when people try something once and say it sucks. Wait, you tried it once and you're saying it sucks? That's not fair. You have to either put some time on a rope or really do some research on why it doesn't work for you. Then, if you can give me that why- that's fair. I feel like people mock a lot of products these days without giving them a fair shot. That hurts these companies in the industry, keeping them from being able to build and grow. I wish more people thought that we're all on the same side, that we're all good guys. These manufacturers are all good guys, and they're trying to do good things. So instead of knocking them, figure out how to help. Be a part of the solution, not the problem.

ST: If someone buys a rope, and they don't care for it, what is the next step? Where should they go to get clarity on why they may be having a bad experience with that rope?

JA: I guarantee you if you put your experience on TreeBuzz, you're going to have a ton of people telling you to try this, try that, use this hitch. They'll ask how heavy are you, what diameter hitch are you using? There are a lot of resources online; there's so much support out there now, it's just crazy to me that people can't find these answers. If someone's having trouble using those resources, they're likely at the beginning of their career, and getting proper training should be the next step anyway, where someone can explain the gear to them and how it works.

For the Art of Tree Climbing

ARBORIST ROPE CONSTRUCTION TYPES

KERNMANTLE // CLIMBING

The mantle (cover) of this rope is woven tight to provide protection for the load-bearing core (up to 70%) strands, which are not woven (parallel). Core strands can also be twisted like a slinky to add elasticity, providing manufacturers a lot of flexibility to manipulate the finished product based on intended use. **Good for a wide range of duties.** Arborist ascent lines of this construction are considered “core-dependent kernmantles.”

DOUBLE BRAID // CLIMBING / RIGGING

This braid inside a braid remains round under tension and provides a high strength-to-diameter ratio. Generally, core and cover share loading equally, making for significantly stronger ropes even in smaller diameters, **best suited for climbing.** Double braids are useful for low-elongation climbing and rigging. SHERRILLtree offers a tight rigging version (Super Braid) for greater dirt resistance when natural crotch rigging, and a loose rigging version (Stable Braid) that is spliceable and best for block and tackle use. More and more climbing lines these days are double-braid construction. The properties are much the same. All have an urethane coating and wear equally well. Because of how they are constructed, double braids are likely to milk.

16-STRAND // CLIMBING

This abrasion resistant rope construction presents a thick mantle (cover) around a small interior core bundle that helps keep the rope round under tension and makes it easy to tie. The thick mantle provides all of this **popular climbing line's** strength while the core keeps it round. Because the cover bears the bulk of the load, inspecting these lines is easier and more consistent than with other lines.

SOLID BRAID // RIGGING & PULL LINES

Made up of 12 large strands, arborist-grade solid braid lines are woven tight to keep a round shape under tension, a process that's made eye-splicing nearly impossible ... that is, until Grizzly Splicing® came along. Solid braids tend to be bulky for their strength but have less tendency to twist than other braided lines. **Generally used for rigging or pull lines.**

3-STRAND // MODERATE LOAD RIGGING

Twisted constructions are abrasion resistant but a poor choice for climbing due to their bumpy surface and tendency to rotate (ravel) under tension. Relatively less expensive than other lines, they can serve as **natural crotch rigging lines with moderate loads where high elongation is not a worry.**

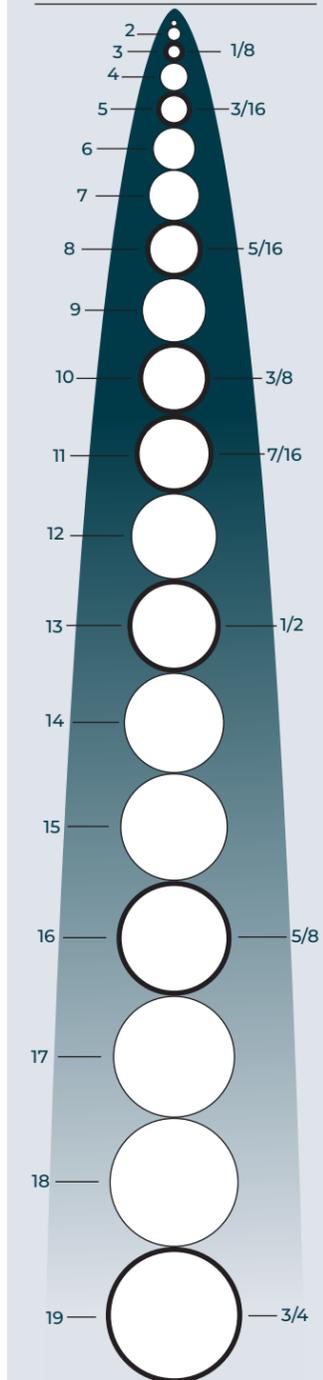

HOLLOW BRAID // SLINGS & FIXED LINES

Another 12-strand construction but woven with considerably less tension, leaving the center loose. These lines can easily accommodate a hand splice. Their loose weave allows these ropes to “flatten” under load. **Good for slings and fixed lines but not for climbing or rigging** because they tend to snag or pick when run over a rough surface and flatten without a core.

ROPE DIAMETER SIZE CONVERSION

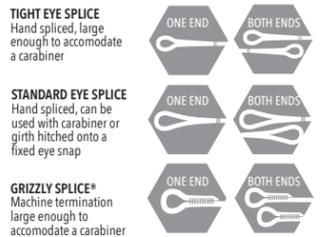

MILLIMETER INCH

THE CIRCLES ABOVE REPRESENT DIAMETERS IN 1-MILLIMETER INCREMENTS IN THE RANGE OF ROPES THAT WE STOCK, FROM THROWLINE UP TO RIGGING LINE. FOR THOSE STILL STRUGGLING WITH METRIC RELATIONSHIPS, WE THOUGHT THE VISUAL MIGHT HELP.

SPLICING OPTIONS

Throughout the ropes section we show the following icons for various hand splices and rope terminations. The icons represent the possible splicing options available for each rope.

ROPE MATERIALS

POLYESTER—A synthetic polymer with lower elongation and higher tenacity and abrasion resistance than its close cousin, nylon. Melting point 480°F.

NYLON—A synthetic polymer with more elongation and with less abrasion resistance than polyester. Melting point 460°F.

POLYOLEFIN—A monofilament sometimes used to bring a rope's weight down. Melting point 260°F.

ARAMID—A family of fibers including Technora, Kevlar, and Nomex that pound for pound are five times stronger than steel and have high abrasion and heat resistance. Poor ultraviolet (UV) radiation resistance, and can be self-abrasive. Melting point 900°F.

ULTRA-HIGH MOLECULAR WEIGHT POLYETHYLENE (HMPE)—Includes Spectra and Dyneema. This lightweight fiber has super-high strength and abrasion resistance but at a very low melting point. Good for use where heat friction is not involved. Melting point 297°F.

MILKS - milking is when a rope's mantle (outer cover) elongates over its core, most often when new and due to friction hitch use that forces strands into maximum alignment. Milking usually shows up as a bubble of material that can be drawn to one end and trimmed with scissors.

MATERIAL - see page 5 for descriptions of rope materials.

KNOTABILITY (10 being excellent) - Ropes for rigging and SRS generally are not "knot-friendly." Their stiff construction makes them more resistant to abrasion, but tougher to dress into a tight knot.

SPLICEABLE - If you like to climb with a split tail (see page 43) then we recommend hand splicing the

climbing rope's end, except for those ropes that are not hand-spliceable. A Grizzly splice® can get lodged in a tight crotch when retrieved from the ground.

ELASTIC ELONGATION - Measurement of a rope's elasticity is done differently depending on if the rope is a climbing or rigging line.

Climbing lines: Measurement is based on a 540 lbs weight being applied.

Rigging lines: Measurement is based on a weight equal to 10% working load of the rope's tensile strength. For example, 1/2" Dynasorb II's has a tensile strength of 10,500 lbs, so 10% of that would be 1,050 lbs, which is what would be used to measure its elasticity.

WAX CONTENT (10 being high) - Sand, grit and dirt particles are the enemy of ropes because such particles become trapped inside the fabric and, like rocks in your shoe, slowly work their irritating destruction. Wax liquid, among other proprietary formulas, are added during the manufacturing process to help protect inner fibers while offering lubrication that enhances tensile strength.

CE - Mandatory conformance mark for European products. Does not apply to splices.

A) STERLING // HTP // 10mm, 11mm, 13mm

As more and more people utilize SRS (stationary rope systems, aka SRT), the more feedback we receive on what's working and what needs to change. This feedback indicated the need for us to carry HTP in 11 and 13 mm.

- 10mm=5,979 lbs tensile, 11mm= 7,560 lbs tensile, 13mm=10,500lbs tensile
- Low-stretch and tough jacket
- 11 and 13 mm fit a wider range of devices
- Exacting core construction for strength
- Unique sheath for handling and good feel
- Solid resistance to water
- Great overall handling and gear compatibility
- 10mm for ascent line only

ITEM #	DIAMETER	COLOR	120'	150'	200'	600'

ADD A GRIZZLY SPLICE® USE CODE G5 OR G55 **+\$15**  **+\$30**  EYE TO BOTH ENDS NOT AVAILABLE ON 600'

B) NOTCH // DRAGON // 11.7MM

Notch Dragon got its name due to its high strength and scaly, hi-vis appearance. It is a very strong kernmantle line, that is semi-static and perfect for SRS climbing, compared to more unforgiving full polyester kernmantles. It's 11.1 mm diameter feels good in-hand, and functions quite nicely in most mechanical devices.

- 8,800 lbs tensile
- Low-creep rope & low-stretch
- Strong 32-strand polyester jacket over a parallel twisted nylon core gives Dragon its strength, and a level of shock mitigation
- Superior resistance to abrasion and UV
- The low-stretch nature of Dragon is designed to absorb some of the "bounciness" experienced when ascending with a stationary rope system

ITEM #	DIAMETER	COLOR	120'	150'	200'	600'

C) TEUFELBERGER // KM III MAX // 11mm

The TEUFELBERGER KM III Max rope is a well-balanced and low-rotating kernmantle line with a unique Twill Pattern Technology that ensures work positioning with smooth descents and amazing abrasion resistance.

- 8,465 lbs tensile
- Well-balanced kernmantle line
- Low-rotating
- Unique twill design that ensures work positioning with smooth descents
- Cover is super-smooth, reducing creeping
- Amazing abrasion resistance

D) YALE // KERMASTER // 11.7mm

Taking the best properties of a kernmantle rope and crossing them with the toughness and unique properties of a tree climbing rope, Yale Cordage has created a tough, dependable, performance-enhanced line that tree climbers will love.

- 7,100 lbs tensile
- Relatively static under low loads without excessive stretch
- When loaded with more than 700 lbs or so, the core begins to elongate and absorb energy, and then returns back to static properties under low loads
- Combines the performance of a tight woven cover with good hand and roundness
- Protects and absorbs in the event of a fall

A) TEUFELBERGER // DRENALINE // 11.8mm

Either on stationary or moving rope configurations, the drenaLINE gives ultimate freedom to the climber to choose the right technique for the task. Its extremely light construction and 32 strand cover allows super smooth precision during ascents and descents. With drenaLINE you can always be confident that the hardware you bought will be the right one. This rope has been extensively tested in the field with a vast range of hardware in stationary and moving rope techniques by experienced tree climbers around the world.

- 7,870 tensile for 150'
- 7,870 lbs tensile for 200'
- EN 1891A, ANSI Z133-2012
- 2.30% Elongation at 10% ABS
- Great choice for both Moving Rope and Stationary Rope Systems

B) TEUFELBERGER // DRAGONFLY // 11.1 MM

DragonFly by TEUFELBERGER is an alternate color scheme of their classic tree climbing line. It has a balanced structure and a diameter of 11.1 mm, which is ideally suited for arborist applications.

- 7,400 lbs tensile
- Certified to EN 1891A and ANSI Z133-2012
- Features a unique spliceable kernmantle construction
- Easy to knot
- Resists flattening and glazing
- Runs through gear effortlessly without getting mushy
- Stays round and firm giving the climber a smooth, controlled descent

TIPS FROM THE CANOPY

GEAR COMPATIBILITY

When looking to create a climbing or rigging system, check to make sure that all the components of the set up are compatible with each other. Compatibility is important for not only efficiency, but more importantly safety for everyone on the job. Read the User's Manual to confirm the application, specs, and ratings for your gear. Whether it is a rigging system or climbing system, double check all your gear and check compatibility to build the most efficient and safest system possible.

C) TEUFELBERGER // XSTATIC // 11.7MM

Xstatic provides better control for sleek descents and makes retrieval smooth and easy even with multiple redirects. With this rope you will focus your strength and skills where they belong: efficiently taking care of the tree and not worrying about climbing.

- 8,450 lbs tensile
- Special kernmantle construction maintains high tensile strength with minimum elongation
- Provides better control for sleek descents
- Makes retrieval smooth and easy even with multiple redirects
- Perfect choice for both an access line and SRS work positioning line
- Has been successfully tested with all common hardware in the field by experienced tree climbers around the world

A) STERLING // WORKPRO // 11mm / 12.5mm

Sterling's WorkPro is the ultimate work horse. The WorkPro benefits from their extensive experience working with mixed material ropes. It uses a newly designed pre-conditioned nylon core surrounded by a 32-carrier polyester sheath.

- 9,580 lbs tensile (red) / 10,565 lbs tensile (green)
- Balanced elongation in the core and sheath so they share the load evenly
- Featuring abrasion resistance and energy absorption
- Compatible with popular hardware for climbing and descent systems
- Ideal for Stationary Rope Systems, rope access technicians and the military
- 12.5 mm WorkPro is certified to ANSI Z133 and EN 1891

16-Strand Element™

A classic 16-strand arbor line designed for climbing or light rigging. Available in two colors allowing you to easily identify which rope you've designated for climbing and which for rigging.

- Abrasion-resistant & durable
- Zero sheath slippage
- Exceptional handling & hitchability
- Spliceable

For Sterling Arbor Gear, including the 16-Strand Element, shop Sherrilltree.com

A) SAMSON // IVY // 11.7mm

Made Exclusively for Sherrilltree, the Samson Ivy series are 11.7mm double braid climbing lines that work well for both Moving Rope and Stationary Rope systems. They perform great with prusik cordage and flow through devices making them a top choice for climbers of all calibers. Whether using them in MRS or SRS climbing system, the low elongation characteristic make it ideal on long ascents or for a dual purpose climbing line.

- 6,500 lbs tensile
- Durable and strong, unique double-braid construction
- Stays round when in use
- Flexible and knot friendly
- Delivers a lower elongation climbing line in a spliceable arborist rope

B) TEUFELBERGER // TACHYON // 11.5mm

This extremely popular rope is built by TEUFELBERGER and uses the Flexfirm Core Technology to deliver climbers a unique, low-stretch, tough-skinned, double-braid that stays round and firm under load.

- 7,100 lbs tensile
- Unique inner core that gives the line spectacular support and density to both core and mantle
- Pliable, versatile climbing line with excellent "hand"
- Provides excellent traction when used with split-tails and ascenders
- Spliceable and strong from its core to sheath
- Flows smoothly through a wide array of modern mechanical devices, thanks to its small size and sleek jacket
- EN1891 Type A rope, which is required for most mechanical ascenders in Europe

C) YALE // BLAZE // 11mm

The Yale Blaze is designed especially for tree climbing and aimed at a need for lightweight, ascender-friendly, yet premium rope product that performs well when climbed with a friction hitch.

- 5,600 lbs tensile
- Ideal knot-tying characteristics
- Smooth cover for mechanical ascension
- Low elongation results in minimal bounce
- Spliceable, double-braided rope
- High-tenacity
- Meets CE0120 EN1891 Type-B

E) NOTCH // BANSHEE // 11.7mm

Banshee is a 24-strand climbing line for tree care pros looking for the hard-to-find rope that combines light weight with a resilient roundness. Banshee uses a braided nylon core to keep its roundness under load, but not at the expense of added weight.

- 8,353 lbs tensile
- Abrasion-resistant, braided polyester cover
- High-vis braid of green, blue and semi-reflective gold
- Excellent knotability
- High-strength and low-stretch making it a great rope for traditional and modern moving rope systems (MRS)

F) EDELRID // DIRECTION UP CLIMBING LINE // 13mm

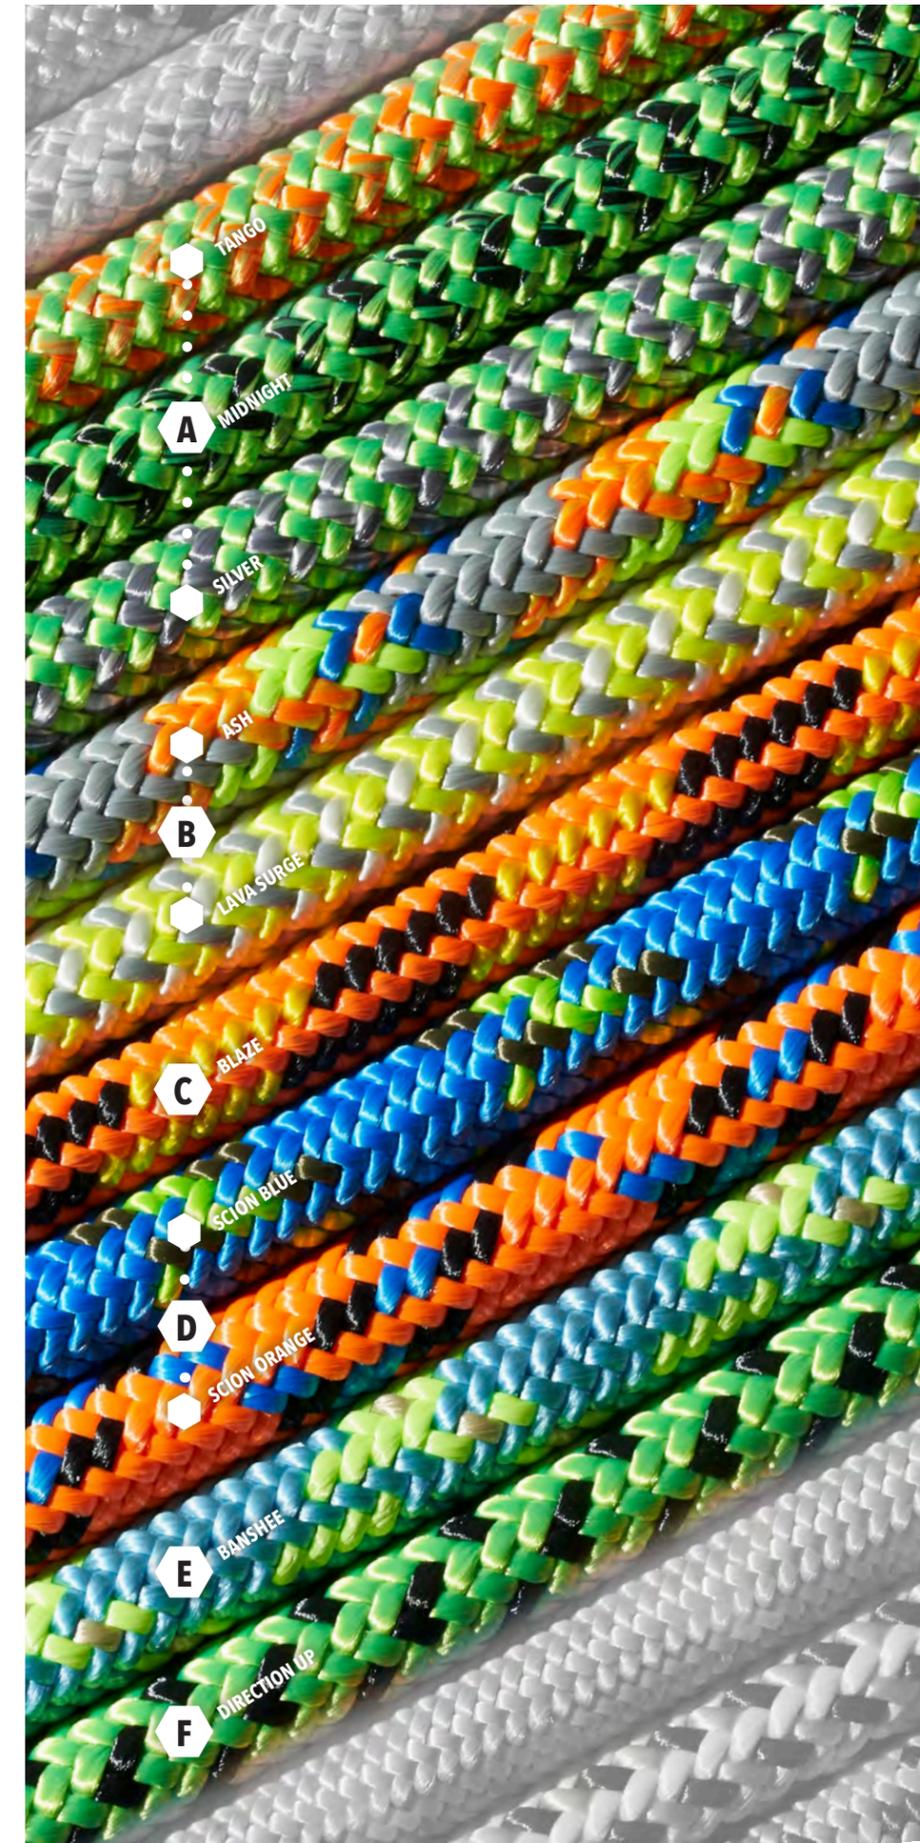

The Edelrid Direction Up 13mm climbing rope is a surprisingly lightweight rope designed specifically for professional arborists who are looking for a better grip. The 24 strand polyester sheath with a 16 strand Polyamide braided core makes this rope excellent for harsh everyday use.

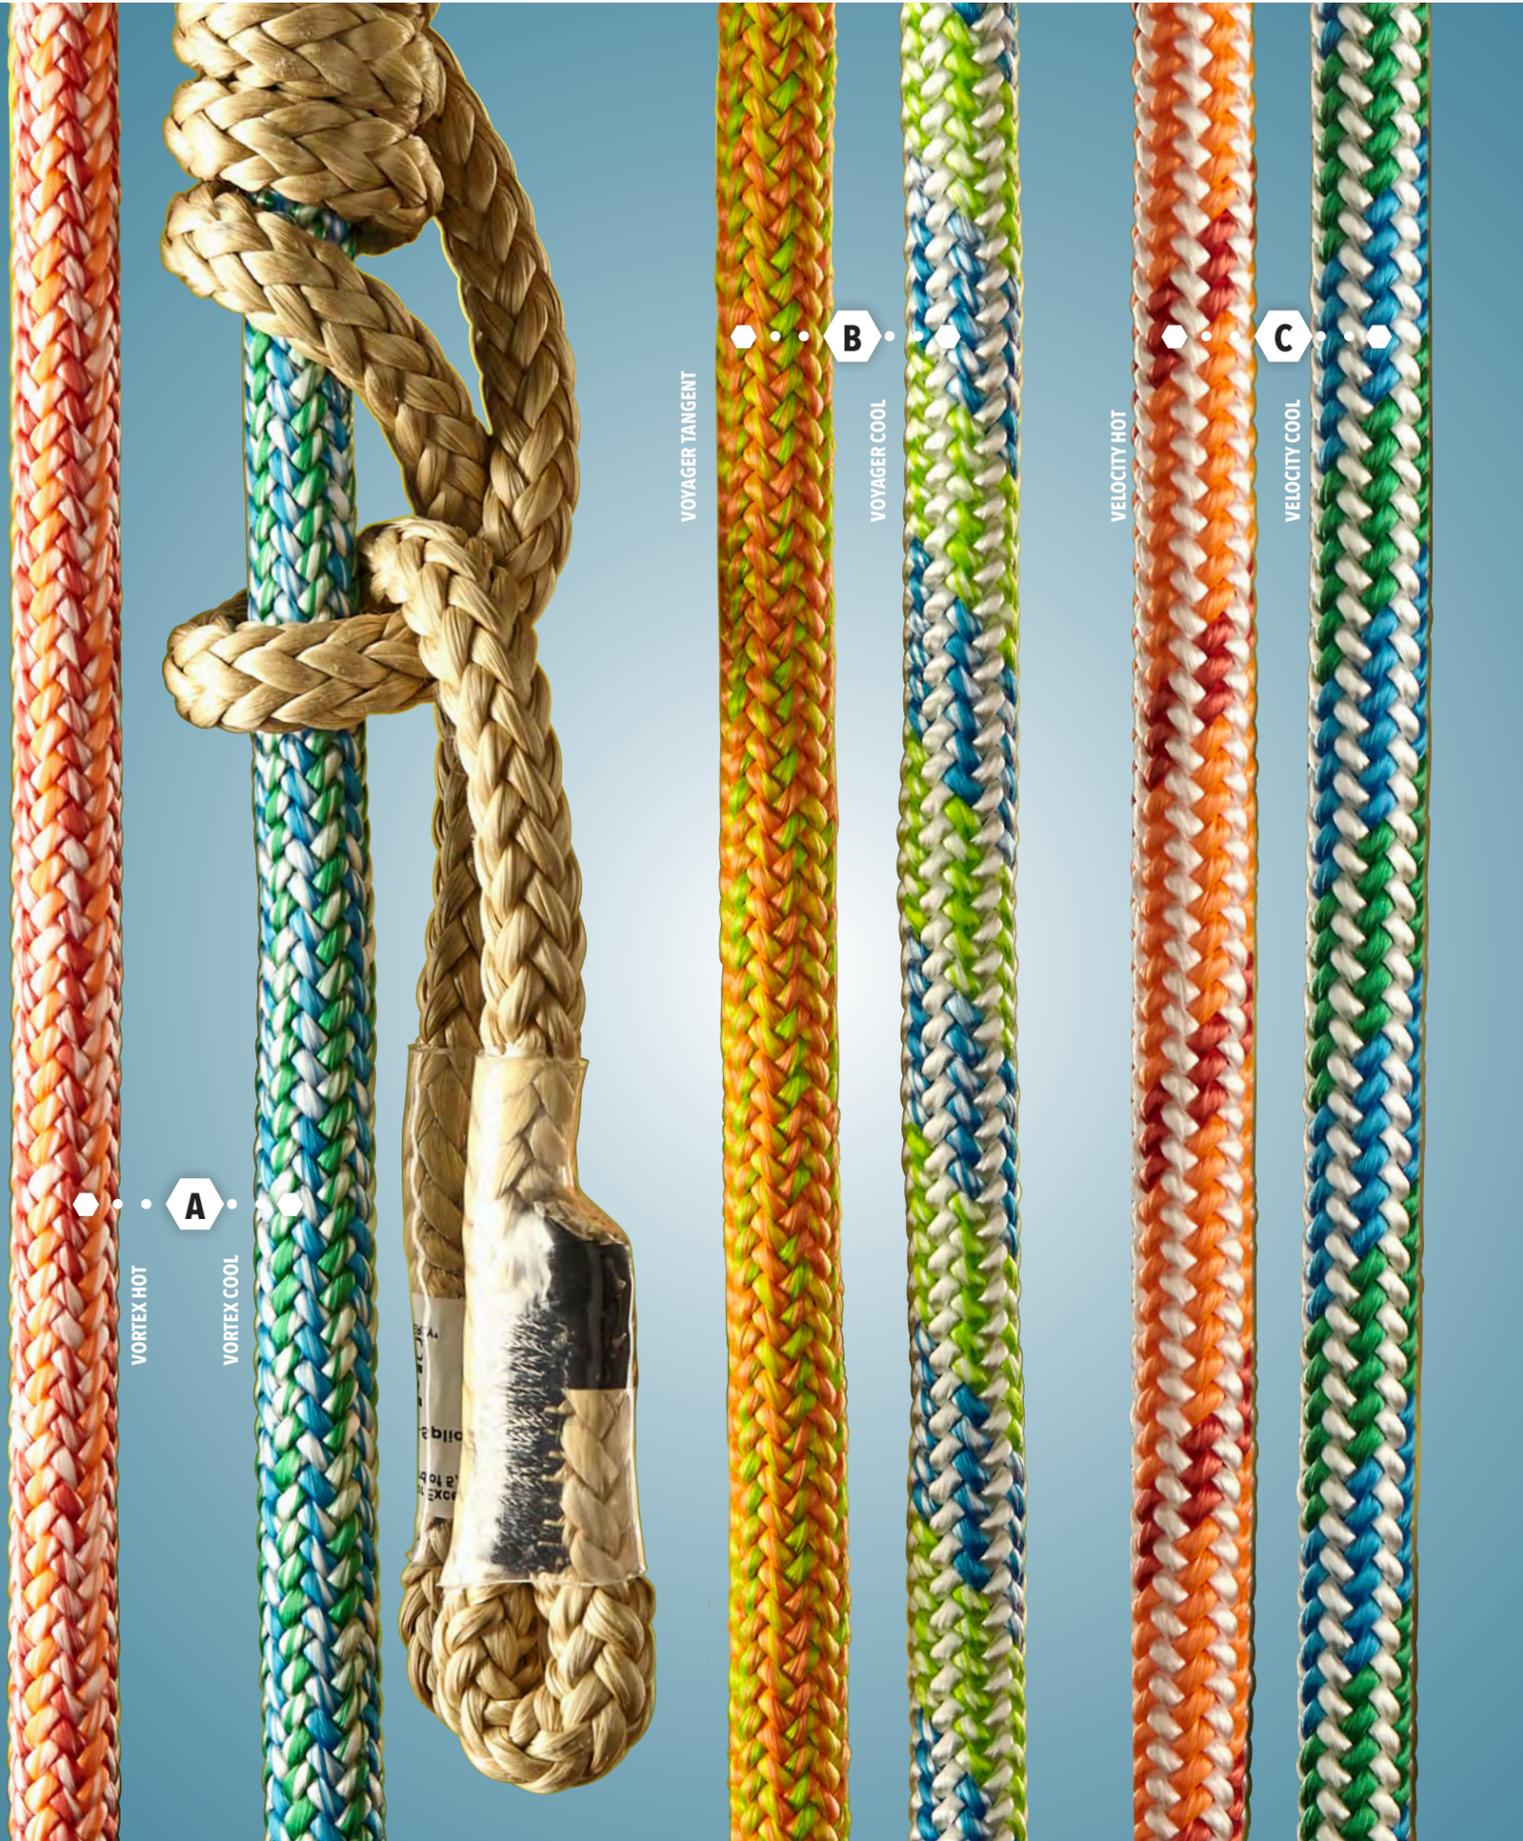

- Tensile: 34kN
- Static Elongation: 3.4%
- Braided core for maximum durability and high edge stability
- Twined and shrunk sheath construction provides maximum abrasion resistance and minimal shrinkage
- Directional pattern provides orientation
- Thermo Shield treatment ensures perfect handling

YALE // PROFESSIONAL SPLICING KIT

Splicing is a difficult skill to master, that requires discipline, patience, and tons of practice. It's not something you're going to pick up on over-night, but if you're willing to give it a try, we've got the tools you'll need.

Yale's splicing kit is an essential for anyone splicing a wide variety of ropes. Included in the kit are ten different size fids, two fid pushers, a pair of scissors, some needles and a storage pouch with helpful information printed on it.

Your safety is crucial, so please don't use anything you splice without first testing it on the ground.

F) TEUFELBERGER // BRAIDED SAFETY BLUE // 1/2 in

One of the first "arborist-specific" climbing lines, TEUFELBERGER's line of Braided Safety Blue ropes is a long time favorite. Named for its blue core, Safety Blue is equipped with a blue safety core of polyamide. This core is exposed only when the rope is seriously damaged or has worn down to the point where it must be discarded. The visibility of the blue core indicates that you should replace the climbing line.

- 7,000 lbs tensile
- Tightly plied polyester covers surrounding fibrillated polypropylene strands
- Reduced rope weight, without compromising firmness
- Proprietary blue safety core
- Plied strand yarns for improved abrasion resistance
- Protective coating improving durability and grip
- Certified to the standards EN 1891A and ANSI Z133-2012

G) YALE // XTC-16 // 1/2 in

Arborists and tree climbers from around the world seek Yale's XTC-16 for two primary reasons: performance and tenacity. This rope was designed specifically for the demanding needs of the professional arborist.

- 6,200 lbs tensile
- Tightest industry cover braid, 16 individual strands of polyester
- High-twist core of torque-balanced polyester keeps the rope firm and round
- Great for both climbing line and bull rope due to its no snagging, abrasion-resistant construction and excellent energy absorption characteristics
- Smooth jacket provides unique performance to friction hitches of all types
- 100% polyester construction
- Smooth cover runs well through cammed devices
- Meets CE0120 EN1891 Type-A

A SHEET BEND KNOT IS GREAT FOR QUICKLY ATTACHING 2 LINES TO SHUTTLE THEIR POSITION.

TRUE BLUE

A) SAMSON // SOLID BRAIDS // 1/2 in

This solid-braid family of ropes are a bit more elastic than their core/cover cousins (16-strand, double braids, etc.) Solid braid ropes wear quite well in the face of natural crotch interaction. In fact some climbers prefer the way the rope "furs-up" with wear and tear. Although a bumpier ride than ropes with more strands, these lines are naturally twist-resistant due to design.

- 7,300 lbs tensile [True Blue & Tree Pro]; 6,000 lbs tensile [Arbor-Plex]
- Durable, Firm construction
- High strength, Low stretch
- Remains flexible with use
- Retains shape with use

RIGGING

CLIMBING

UNIQUE TOOLS

SAMSON // STABLE BRAID //

1/2 in / 9/16 in / 5/8 in / 3/4 in

Double-braid rope is the most commonly used rope for rigging trees because of its high strength and low stretch. The name describes this rope's construction, 2 ropes in one. The inner core is protected by a tightly woven outer jacket, creating a very strong, flexible line with low stretch characteristics. In the final stage of manufacturing, Stable Braid ropes are dip-coated in a bath of liquid Samthane that dries into an abrasion-resistant shell. This coating does wear over time, but adds a great deal of life to the rope that it protects.

- Designed to be used with false crotch blocks and other rigging hardware so you can take full advantage of its strength and durability
- Good abrasion resistance
- Excellent flexibility
- Moderate break-in time required
- Low stretch
- High UV resistance
- Spliceable (both ends)

SAMSON // DYNASORB II //
1/2 in / 9/16 in / 5/8 in / 3/4 in

What have we learned about energy absorption when it comes to dynamic activities that test the limits of ropes and wood? For one, we've learned that tensile strength alone is not all it's cracked up to be. For example, no one needs to spell out the result of bungee jumping using high-strength cable instead of (significantly weaker) elastic rope.

Although an extreme example, the physics are virtually identical when arresting other falling loads, including tree parts. No, not because the load shouldn't be injured, rather to lessen forces capable of cracking an anchor point or snapping high-strength ropes. Not only are such shattering forces the inspiration for modern tree cabling systems like Cobra and TreeSave, but they are also the reason many arborists are choosing Dynasorb II for wood-dropping activities, too.

- 1/2" = 10,500 lbs tensile
- 9/16" = 13,200 lbs tensile
- 5/8" = 16,300 lbs tensile
- 3/4" = 23,000 lbs tensile
- Limited U.S. availability

WORKS WELL WITH

NOTCH BACK BONE

The Notch BackBone makes more efficient rigging possible, as a quick connection between your spliced rigging line and slings. Perfect for top-down rigging, as well as single, double, or even triple limb lowering. You can also use the BackBone to create a balancer for precision lifting and lowering. Go to **page 115** for more information.

STERLING // ATLAS // 1/2 in / 9/16 in / 5/8 in

When you are removing trunk sections, your rigging system needs to be able to absorb large dynamic forces. That was the design mission behind the Atlas Rigging line. At Sterling, they have been engineering ropes to handle high kinetic energy loads for over two decades. With its polyester sheath, and nylon core construction, the Atlas offers a soft hand and easy knotability even on the burliest rigging jobs. Designed to work seamlessly with a Portawrap, capstan winch or rigging blocks, the Atlas delivers unmatched compatibility along with strength and durability.

- 1/2" = 11,500 lbs tensile, 9/16" = 13,750 lbs tensile, 5/8" = 19,400 lbs tensile, 3/4" = 22,480 lbs tensile
- Polyester sheath and nylon core offers a soft hand and easy knotability
- Amazing abrasion resistance
- Works seamlessly with a Portawrap, capstan winch or rigging blocks
- Spliced eye terminations available for knotless rigging

NOTCH // KRAKEN //
1/2 in / 9/16 in / 5/8 in / 3/4 in / 7/8 in

Kraken is a monster of a rigging line, ready to take on your biggest, toughest rigging jobs. At the heart of Kraken is a braided polyester core, giving it its high strength and robust feel. The jacket is a tight braided polyester that gives Kraken amazing durability, without making it feel brittle.

- 11,000 lbs, 13,300 lbs, 18,500 lbs, 20,230 lbs, 28,900 lbs tensile strength respectively
- Braided polyester core
- High strength and robust feel
- Jacket is a tight braided polyester
- Amazing durability
- Easy to splice
- Functions very well in standard rigging setups as well as knotless rigging setups
- Mitigates shock fairly well
- 1/2" diameter available to be spliced with Notch Rapid Rig (page 115)

SAMSON // PRO-MASTER™ // 5/8 in, 3/4 in

Samson's Pro-Master™ 3-strand bull rope has tough polyester jacket fibers covering polyolefin core fibers to maximize abrasion resistance. Low elasticity offers unequalled load control, and special jacket fibers give excellent grip and rendering capabilities on winches. Tighter construction when compared with other 3-strand polyester/polyolefin ropes.

- Good abrasion resistance
- Good flexibility and low stretch
- No break-in time required
- Rotates under load
- Low UV resistance
- Spliceable (both ends)

ALUMINUM AND STEEL RINGS // Rigging Rings

(A) These highly-sought after gated rings from Petzl feature a wide opening that allows for semi-permanent connection of equipment (lanyard on the harness, for example).

NEW! (B-C) Notch Wear Safe steel friction rings with industry first wear indicator mark for increased safety. (Available April 2021)

(D-E) Italian-made by Climbing Technology, these hot-forged rings are laser-etched with load rating and serial number. Meet CE and ANSI regs. Tested for quality assurance.

(F&G) DMM Anchor Rings: CNC machined from 7075 T6 aluminum for the highest strength-to-weight ratio and anodized for peak protection makes these the most trusted rings on the planet for life safety use.

(H) Our heavy-duty forged and plated steel ring is commonly sought for various rigging and cabling tasks.

CLIMB

TIPS FROM THE CANOPY

Ryan Torricollo
on Climbing
*SavATree General Tree Care
Talent Developer*

ST: Knowing where you started, and where you are now, what do you want others to understand about the equipment we use?

RT: I tell guys, “I learned the hard way, and it sucked! My body’s trashed from doing things the hard way. Now we know better ways. There’s even Youtube and Facebook to teach better ways. The larger companies are caring about their employees by doing trainings. It’s different than it was ten years ago—it’s all out there, like Sherrilltree’s videos, Arborfests, and TCI EXPO. There’s a better way to do tree work; I don’t want other people to have to do it the way I did and make my mistakes.

ST: In Petzl’s “Labor of Love” video, you said, “Climbing gear is there to make your life easier.” We know this, but we also know there are those who resist trying something that will change their climbing. Can you elaborate on your statement?

RT: When I’m training guys, I’ll set up an open ascent. The guys who swear by MRS see their buddies going up 60 feet in 20 seconds, then they only get up like 15 feet. They’re like, “let me try that other stuff!” They get to see that it does make sense. It’s hard, though, you know? I think that I’m not like one of those guys that doesn’t want to try stuff, but I’ve been climbing on Yale 11.7mm lines for a decade. I just switched!

ST: What are you climbing on now?

RT: Teufelberger KMIII max (pg 9). I was telling someone the other day that I was diehard [toward Yale 11.7]. I’m like, oh boy, what else have I been missing out on?! I’m still a diehard Ropewrencher (pg 50) too. The Rope Runner (pg 45) and the Akimbo (pg 46) are solid, but the rope wrench does it for me. I’ve tried, but I’m a rope on rope guy.

ST: When it comes to gear on your saddle, are you a magpie, minimalist, or somewhere in between?

RT: I’m on the minimalist side. One of the first things I do during trainings is make sure that everyone knows the Blake’s Hitch. If I’m getting far out on a limb for something like a reduction prune, 9 times outta 10, I’m using the tail of my rope as a second tie-in with a Blake’s Hitch. Im also big on the Petzl Zillon (pg 89) with the DMM thimble, because the Zillon is rated for single line configuration. I have a 20’ lanyard, and rock that as a second tie in all the time. Sometimes I’ll take a couple carabiners maybe, and a rollclip.

ST: What saddle are you climbing with now? Petzl Sequoia—it’s fabulous (pg 60).

NOTCH BIG SHOT® THROW WEIGHT LAUNCHING SYSTEM

The advent of throwlines has changed the way arborists climb trees. The BIG SHOT® revolutionized the way we use throwlines by giving you a simple, accurate, effective means to hurl your throw weight to new heights. The BIG SHOT accepts a wide range of projectiles and provides fully variable thrust force to limit over-shooting of low to mid-range targets. It's simple ... if you have a lower target, just don't pull back as far! The BIG SHOT also solves one of the most significant difficulties of hand tossing throw weights—vertical targets with narrow approaches. With minimal practice, you'll be able to hit high targets through a small frame of branches and twigs. The BIG SHOT is an accurate and lightweight launching system! The launch pouch cuts in-air projectile rotation by 50% over the original BIG SHOT pouch! (This advance is also available as a sling replacement for older models.) If you're looking to thread the needle through the thickest of canopies or launch throw weights up to 150 vertical feet, reach for the tool arborists around the world call for by name.

Use the Notch BIG SHOT Trigger to increase accuracy!

DTX SHOULDER SHOT // PNEUMATIC LAUNCHER

The product can reach a vertical distance of 100+ feet (using light weight throwline) with high accuracy with a 10oz or 12oz throw bag. The Shoulder Shot is solid stainless steel and all non corrosive material. The Shoulder Shot comes with a built in spring loaded safety on the valve release handle that prevents any accidental miss fires. The air chamber can be refilled very quickly with a handheld air pump or small compressor. Unlike certain products this does not use black powder which is illegal in most states and city use.

ITEM #	PRODUCT	PRICE
41536	DTX Shoulder Shot	\$229 ⁹⁹

NOTCH // BIG SHOT® DELUXE KIT

BIG SHOT with two 4' poles, 200' of Neon Plus 3mm, 8 oz. and 10 oz. throwbags, Canvas Line Bag, BIG SHOT Trigger, Plastic Carrying Case (50" x 7" x 9") and replacement BIG SHOT tubing.

A.R.T. ROPE GUIDE AND ROPE GUIDE TWINLINE EXPLAINED

Those who own a Rope Guide say there's no smoother or friction-free interaction system for climbing when using a moving rope system.

ROPE GUIDE TWINLINE

ART's latest friction management device's name, Twinline, gets right to the heart of its functionality. As the name suggests, the Twinline allows you to operate off of two lines on the device. What's even better is that you can set the device and both lines FROM THE GROUND!

The Twinline is constructed in a way that allows for the user to install an ascent line, along with a stationary rope system (SRS), or a moving rope system (MRS). Or you can have an SRS system along with a MRS system.

The Twinline can also be utilized as a repositionable redirect, when you need to get your rope into a safe angle.

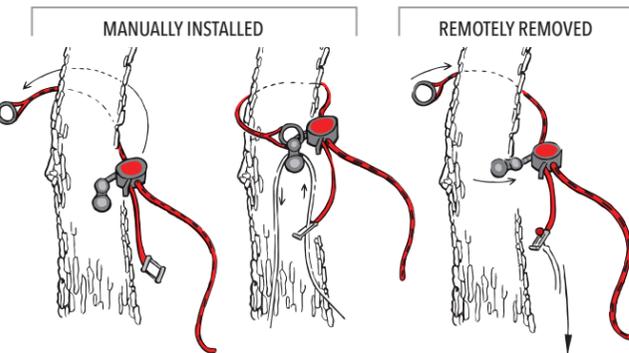

Don't let the Twinline's list of uses and configurations fool you into thinking it's a complicated device. It takes a little practice, but once you get it, you'll be blown away by how a simple device can do so much.

ROPE GUIDE

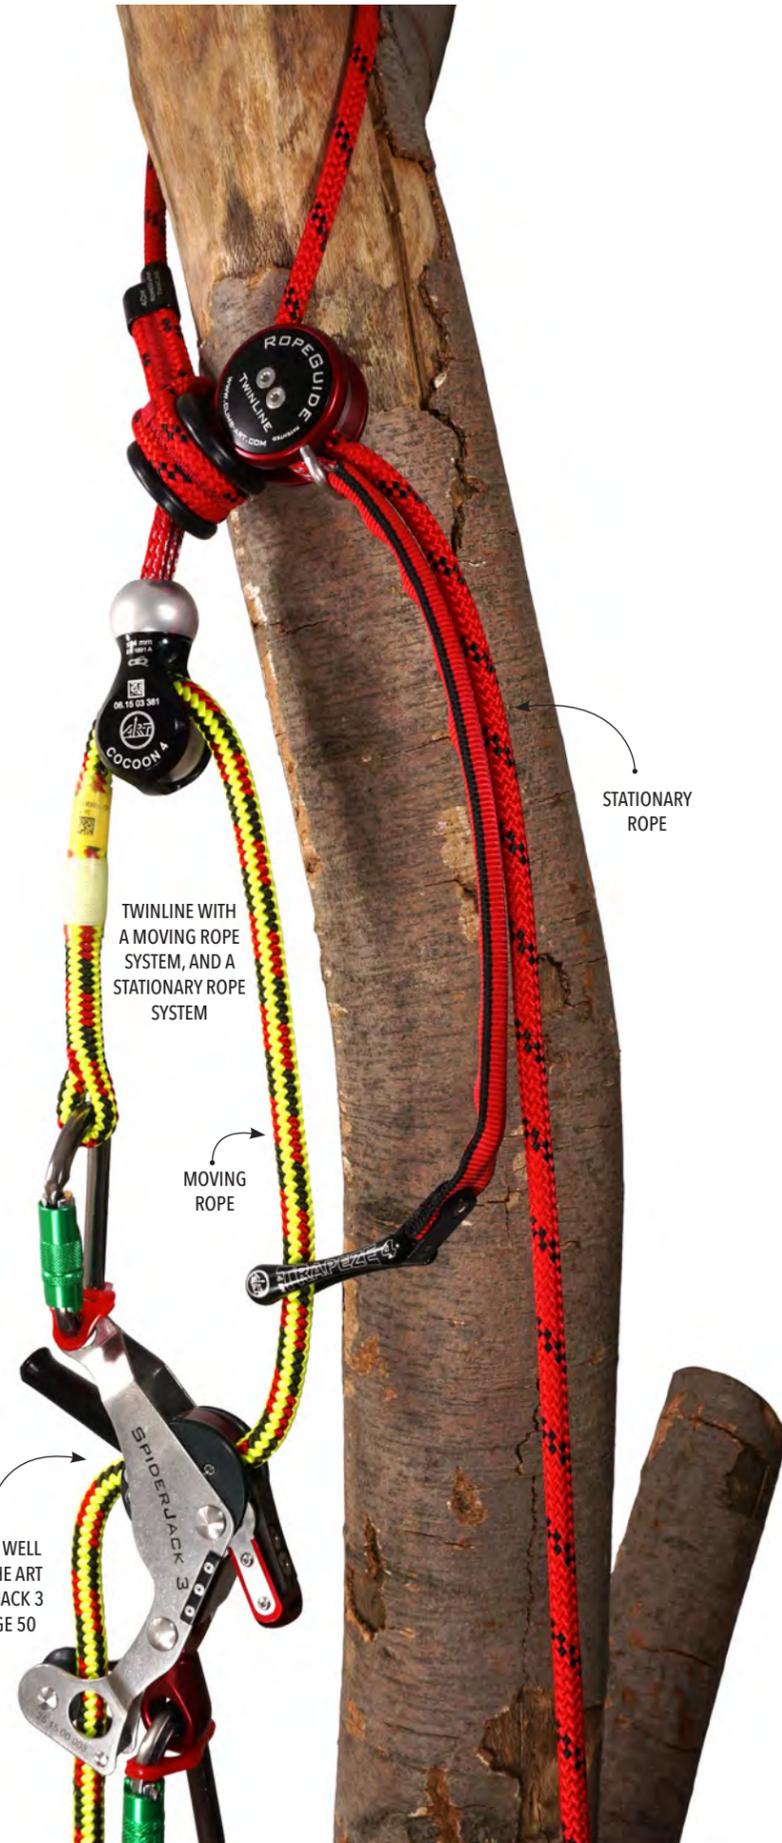

The Rope Guide delivers total sensation to an incorporated Lockjack or rope-style split-tail, resulting in ascents and descents that glide as smoothly as butter. Ascents that previously required dragging rope under tension over a fixed position (be it branch or polished hardware) are replaced by the Rope Guide's ultra-smooth Cocoon pulley that diverts 99% of climbing energy to strictly hoisting the climber's body weight. As for descents, friction at the TIP (tie-in point) is completely erased and diverted entirely to the climber's friction-controlling device, a phenomenon that makes the combination of Rope Guide and Spiderjack the ultimate climbing sensation.

As for safety, the ultimate fear for those climbing trees regularly is the danger of an unintended yank or fall on slack line that in turn causes the TIP to fail and/or results in physical injury that otherwise might have been avoided. An added and critical feature that draws many professional climbers to the Rope Guide is its brilliant and potentially life-saving "airbag" component. The Rope Guide incorporates an impact-activated (at 4 kilonewtons, or about 900 pounds of force) rip-stop lanyard that minimizes high shock force, therefore providing a layer of protection—a feature that several countries are currently considering mandatory for tree climbing.

The Rope Guide can be removed remotely, for lines up to 13 mm (1/2 inch).

WORKS WELL WITH THE ART SPIDERJACK 3 ON PAGE 50

A.R.T. // ROPE GUIDE // Friction-Erasing Device with Life Safety Feature

The Rope Guide can be used in one of two ways: draped over a branch or cinched to a vertical spar. Either way, the adjuster portion of the device allows quick positioning of the Cocoon pulley for wide-ranging movement throughout the crown.

The Rope Guide can be removed remotely but requires climbing to install. For lines up to 13 mm (1/2 inch).

- Eliminates friction abrasion to rope and tree
- Greatly reduces energy required to climb
- Delivers ultimate response to climbing hitch
- Rope-friendly pulley instead of fixed metal surface
- Adaptable to limbs, incredibly uneven crotches, or even vertical spars
- Proprietary shock-absorbing, potentially life-saving feature
- Cinches snug against host position to eliminate sliding risk

NEW RINGS! AVAILABLE APRIL 2021

ROPE LOGIC // ADJUSTABLE FRICTION SAVER // 5/8" KMIII Green with Notch Wear Safe steel rings and accessory carabiner

Adjustable rope friction savers are gaining popularity for the versatility and ease of use. This latest iteration is constructed with 5/8-inch KMIII Green static line, Notch steel ring, and comes with an accessory carabiner. The prusik is 3/8" Stable Braid with a small Notch steel ring.

- 6 ft and 10 ft lengths
- 2 Notch Steel rings and accessory carabiner
- 3/8" Stable Braid prusik

41645	Adjustable Friction Saver	6 ft	\$79 ⁹⁹
41646		10 ft	\$89 ⁹⁹

ROPE LOGIC // ADJUSTABLE FRICTION SAVER // 3-strand with Cordura Sleeve

This one-size-fits-all, rope-friendly device can be set from the ground or within the crown. It'll go around branches as small as your wrist, up to tree trunks as large as the circumference of the entire device to be used as an anchor position for any type of climbing line.

- Rope runs smoother and stays cleaner
- Hand-spliced by the best in the business, Rope Logic
- High-tenacity polyester cordage and Italian-made aluminum and steel rings

41640	Notch Wear Safe Steel Rings (Available April 2021)	10 ft	\$99 ⁹⁹

TIPS FROM THE CANOPY

Easy Install!

Check out our video on how to install a Ring and Ring Friction saver under the "Tips from The Canopy" (TFTC) section at Sherrilltree.com

TEUFELBERGER // FIMBSAVER // FIMBLCLIMB

Installed from the ground, the fimbSAVERS featured thimbles that add slightly more friction than a comparable pulley. A wide surface contact area helps protect the tree, and a long taper on the fixed thimble side aids in controlled, reliable retrieval. Can be used for either climbing or light rigging.

FimblCLIMB has a lower profile than the fimbSAVER making it less likely to snag on retrieval and is compact enough to store on your saddle for installation in the canopy.

ITEM #	PRODUCT	LENGTH	PRICE
FIMB-4	fimbSAVER	4 ft	\$99 ⁹⁹
FIMB-6	fimbSAVER	6 ft	\$104 ⁹⁹
36332	fimblCLIMB	4 ft	\$96 ⁹⁹
36345	fimblCLIMB	7.4 ft	\$107 ⁹⁹

TIPS FROM THE CANOPY

EFFICIENCY WITH FRICTION SAVERS

Whether we are climbing, rigging, lifting, or winching, friction is something that is always present. How we deal with the friction will determine the efficiency of the system.

Trunk wrapping and natural crotch rigging and climbing are still widely used and is an effective solution but one that can be improved upon. One area of opportunity is minimizing or completely eliminating the interaction between the rope and tree, which causes extreme friction and wear and tear on both the tree and rope. When climbing using a natural crotch tie in point, it creates a lot of friction on the system, and the friction changes from tree to tree depending on the size of the branch and type of bark on the tree. Adding a friction saver to your system will solve both the issue of inconsistent friction and wear on your rope and the tree. Regardless of what size or type of tree you are climbing, the friction will be consistent allowing you to really dial in your climbing set up. An added bonus of a friction saver is the ability to install them from the ground. Using an adjustable friction saver gives you an additional application where you can use it as a cinched tie in point for your climbing system when on a spar. If you are looking for an alternative to natural crotch rigging or climbing, and want to minimize or eliminate wear on your ropes and trees you are working on, check out the friction savers we have available. Check out our video in our Tips From The Canopy section on Sherrilltree.com for a quick run down of how to install a ring and ring friction saver from the ground.

40229	Steel Rings Crane Tie-in	\$119 ⁹⁹

ROPE LOGIC // RETRIEVER Telescoping Reach Tool

Designed primarily for maximizing reach to rope ends for horizontal canopy movement, this 10-foot stainless steel telescoping handle uses a flexible tip that you can bend into whatever shape the task requires.

- 19 inches to 10 feet

WARNING! CONDUCTIVE
DO NOT USE NEAR POWER LINES

ITEM #	PRODUCT	PRICE
30762	14 oz	\$49 ⁹⁹

ROPE AND CAMBIUM PROTECTOR

A leading means of chafe protection in a variety of rope uses, leather is tough, lightweight and in this practice, quick to employ. The Rope and Cambium Protector is not only easy to install but nearly indestructible come removal time. After heavy use it may be helpful to introduce talcum powder inside the channel to reduce friction.

ITEM #	PRODUCT	PRICE
30535	For lines under 9/16"	\$29 ⁹⁹

STEIN // MINI-REACH TOOL 7 inches to 3.3 feet

The STEIN Mini-Reach retriever is an ingenious tool designed to assist tree climbers in retrieving climbing lines or rigging lines which are out of reach. The Mini-Reach extends to 3.3 feet in length and collapses to just 7 inches.

WARNING! CONDUCTIVE
DO NOT USE NEAR POWER LINES

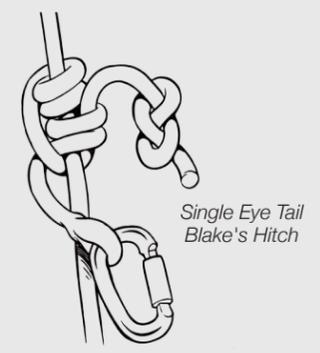

ITEM #	PRODUCT	PRICE
40068	3.2oz	\$24 ⁹⁹

It's important to choose the correct length eye-and-eye tail for the hitch you'll be tying. Hitches like the Distel and Schwäbisch are better with a shorter tail like 26-28 inches. Hitches like the VT and Michoacan however, need a longer tail around 30-32 inches. Too short of a tail won't let you get enough wraps; too long of tail and the hitch won't set properly.

SINGLE-EYE-TAILS

The single-eye split tail is similar to the traditional system, but it allows the system to be redirected around branches without untying the hitch, and it allows the friction to be isolated on the replaceable split tail. Quickly and safely unclip the climbing line's end (for redirecting to another crotch) while the split tail remains tied to the host line-eliminating the risk of dropping your lifeline to the ground. A split-tail eliminates the need to cut off the end of your favorite climbing line due to friction wear from the hitch. If you are not using a split-tail in your climbing system, check out the options available at Sherrilltree and increase production and efficiency.

EYE-AND-EYE-TAILS

Eye-and-eye tails are used to create a "closed system", resulting in a finished friction hitch with both ends attached to the connector instead of one hanging loose, like with a traditional system. They eye-and-eye tail also allows the use of many different hitches that are easily learned with great performance. By utilizing both ends of the of an eye-and-eye, friction is more evenly distributed creating more consistent friction. Incorporating a fair lead pulley enhances this system and allows for one handed slack tending. As always, practice low and slow when you make any changes to your climbing system.

SRS OR MRS CLIMBING

15 OZ

MID-LINE ATTACHABLE

11-13mm DIAMETER ROPES

INNOVATION FOR THE HARD-WORKING ARBORIST

NEW!

NOTCH // ROPE RUNNER PRO
Works with SRS and MRS

Designed by Notch with original inventor Kevin Bingham, the Notch Rope Runner Pro has enhanced ergonomics and rope friendly edges. The Notch Rope Runner Pro is the ultimate SRS mechanical device. Rope Compatibility: 11 - 13mm

- Working Load Limit: 308lbs (140kg)
- Weight: 15oz (425g)
- Materials: Hot-forged aluminum, stainless steel, nylon
- Incredibly easy SRT or DRT climbing
- Unparalleled smooth one-hand descent
- Fully mid-line attachable (stays in one piece!)
- Rope friendly edges
- Flattened 'bird' sections for comfort when descending
- Multiple friction settings
- Integrated central tending point for attachment to a chest harness
- Improved sealed ball bearing pulley
- Designed by Notch with original inventor Kevin Bingham
- Internal spring keeps it safe from dirt and debris
- Slic pins keep all of the parts together when the device is opened
- Super-cool gunmetal grey color

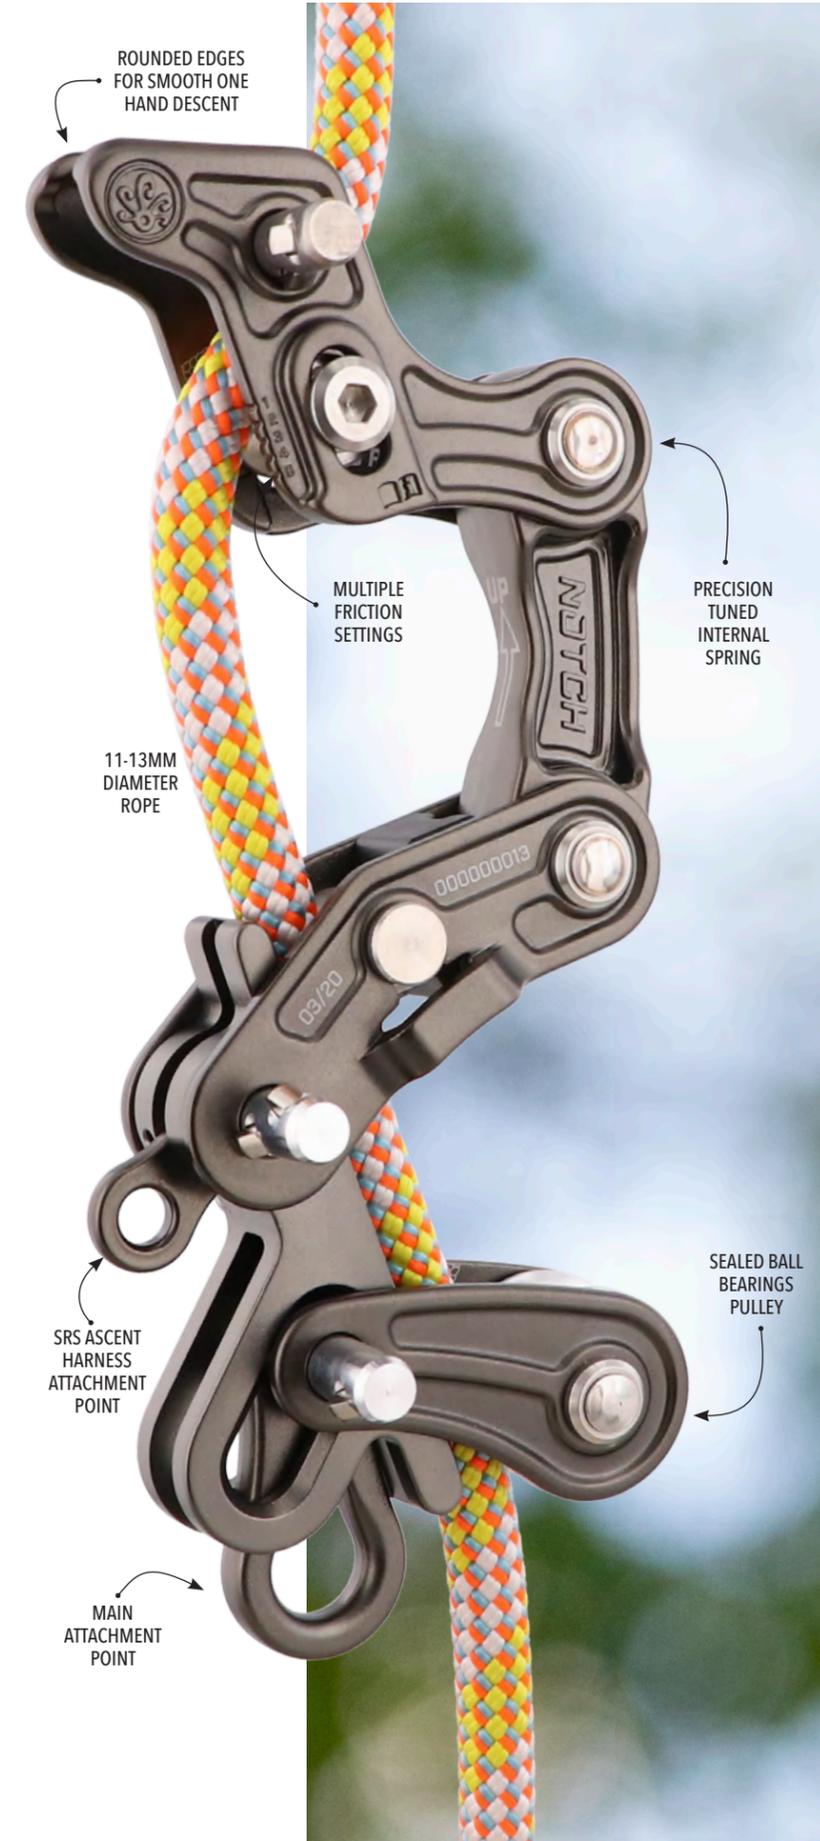

ITEM #	PRODUCT	PRICE
53420W	Rope Runner Pro	\$349 ⁹⁹

ROCK EXOTICA // AKIMBO

Works with SRS and MRS

A versatile mid-line attachable friction device that allows climbers to ascend and descend a stationary or moving rope system without changing equipment. Adjustable settings allow for optimal performance with a range of rope diameters and climber weights.

- Attachable mid-line
- Use in SRS and MRS systems
- Customizable to climber and rope with adjustable settings
- Compact size
- Built in tending point
- 11.5 mm to 13 mm

ITEM #	PRODUCT	PRICE
41192	Akimbo	\$350 ⁰⁰

ROCK EXOTICA // UNICENDER

Works with SRS and MRS

The original all-in-one ascender/descender and one of the few mechanical devices available to arborists who use both stationary and moving rope techniques.

- Attachable mid-line
- Easily switch from SRS to MRS
- Unicender advances with near frictionless motion, towed by the (upper) attached line
- Ascending SRS by advancing the device by hand, a chest harness or other tether system
- Easily mastered with good technique and practice
- Typically lasts 18 months or more before factory rebuilding or retirement all together; these parts naturally wear from rope abrasion
- 11-13 mm rope

ITEM #	PRODUCT	PRICE
33488	Unicender with Tether & Prusik	\$399 ⁹⁹
33397	Unicender without Tether	\$319 ⁹⁹

rock exotica®
GEAR FOR THE Z AXIS

akimbo

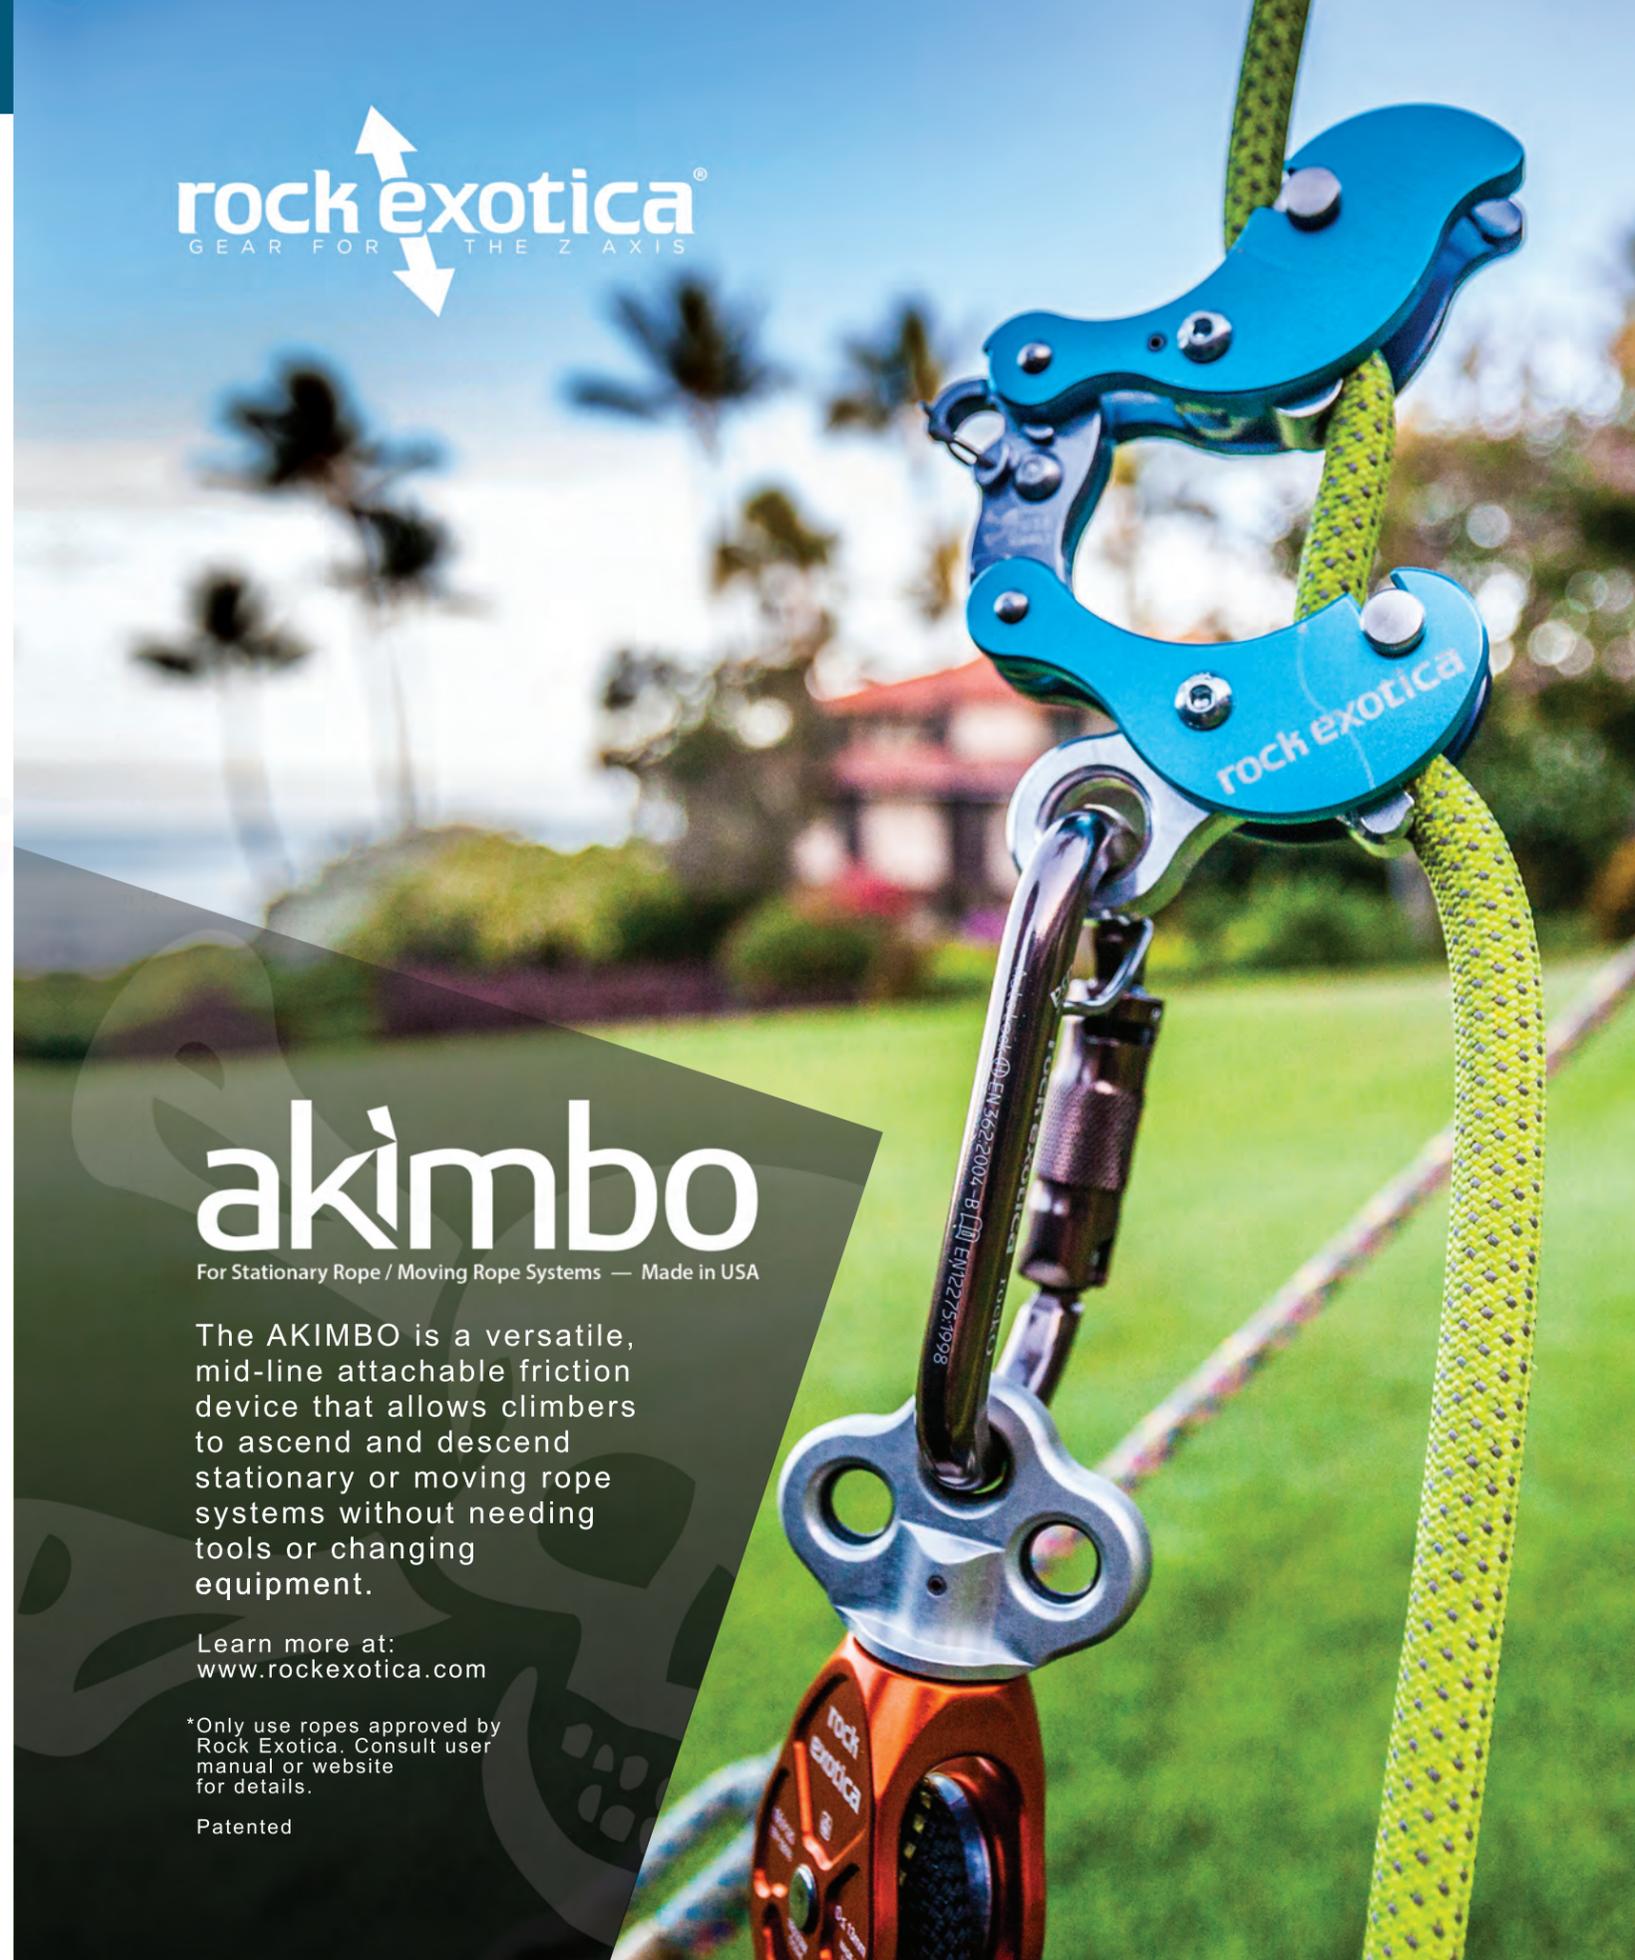

For Stationary Rope / Moving Rope Systems — Made in USA

The AKIMBO is a versatile, mid-line attachable friction device that allows climbers to ascend and descend stationary or moving rope systems without needing tools or changing equipment.

Patented

PETZL // CHICANE // Auxiliary Breaking Device

The CHICANE auxiliary braking device allows ZIGZAG and ZIGZAG PLUS mechanical Prusiks to be used on single ropes. It provides continuous additional friction on descents.

- Continuous additional braking action
- Ergonomic handle
- Openable side plate for quick and easy installation
- Triple action unlocking
- Connects on the upper hole of the ZIGZAG mechanical prusik
- 11.5-13mm diameter
- Compliance with the ANSI Z133 standard
- Compatible with AM'D Ball Lock (# 39566), AM'D Tri-Act (# 39570) and OK (#28070) with H-frame construction

ITEM #	PRODUCT	PRICE
41250	Chicane	\$149 ⁹⁹

PETZL // ZIGZAG PLUS // Mechanical Prusik

- The ZIGZAG PLUS mechanical Prusik allows the user to move around efficiently in a tree using classic Prusik pulley system technique.
- Friction chain provides precision and fluidity when moving
- Pulley mounted on sealed ball bearings
- Release lever for greater control and a smooth/precise rope feed
- Used on either moving ropes or a stationary rope, when paired with the Chicane, providing great versatility
- Lower swivel for attachment point
- 11.5-13mm diameter
- Compliance with the ANSI Z133 standard

ITEM #	PRODUCT	PRICE
41249	ZIGZAG Plus	\$309 ⁹⁹

RONIN // POWER ASCENDER

- Lightweight & portable
- Forward and Reverse
- Rugged and durable construction
- 400lbs continuous lifting capacity
- Thumb wheel trigger speed control
- Integrates with existing climbing technology
- CE and ANSI certification August 2017
- Can act as both a winch and rope ascender
- New machine guard on handle
- New friction bollard to protect housing from rope friction
- Go to Sherrilltree.com for complete specs, descriptions and videos

ITEM #	PRODUCT	PRICE
54443	Ronin Power Ascender	\$1,999 ⁹⁹

PETZL // ZIGZAG // Mechanical Prusik

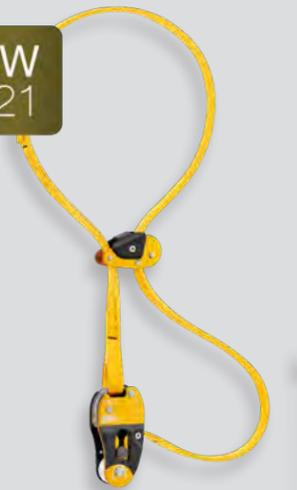

The ZIGZAG mechanical Prusik allows the user to move around efficiently in a tree using classic Prusik pulley system technique. The friction chain provides precision and fluidity when moving around. The pulley is mounted on sealed ball bearings to allow the slack to be taken up easily.

- Device locks automatically on the rope once the friction chain extends
- Rope feed is smooth and precise thanks to the release lever
- Fixed lower attachment hole
- For use on either moving ropes or a stationary rope, thanks to the CHICANE accessory
- Separated and curved side plates for better wear resistance
- 11.5 to 13mm diameter
- Compliance with the ANSI Z133 standard

ITEM #	PRODUCT	PRICE
41248	ZIGZAG	\$279 ⁹⁹

NEW
2021

The EJECT friction saver allows the rope to be set up, without damaging the tree, even in narrow forks. It offers multiple configurations on one or multiple branches, and optimizes movement due to its high-efficiency pulley. The included retrieval ball makes the system easily retrievable from the ground. www.petzl.com

(SEE PAGE 37 FOR ADDITIONAL DETAILS)

PETZL TREE CARE SOLUTIONS

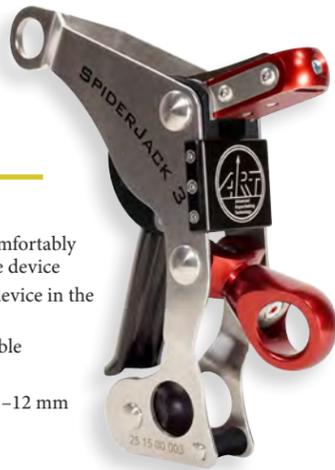

Efficient movement in the canopy and mastering advanced techniques is all in a day's work for arborists. From being able to reach higher anchor points to working a spar, the EJECT increases a workers efficiencies throughout the day. Here's an arborist working outside of Annecy in the south of France.

CT // QUICK STEP FOOT ASCENDERS

- Light, compact and efficient
- Adjustable webbing lets you position the ascenders precisely where you want them
- Cam stop lever prevents kick out
- For ropes 8 to 13 mm
- Each weighs 0.43 lbs

ITEM #	PRODUCT	PRICE
35455	Left	\$73 ⁹⁹
35454	Right	\$73 ⁹⁹

NOTCH // JET STEP FOOT ASCENDER

- Unique dual cam design results in lower spring tension and reduced drag
- Toothless cams eliminate virtually all rope wear and provide increased grip strength on wet, muddy and frozen ropes
- Lower drag from decreased spring tension provides efficient self-tending of the climbing line
- Webbing design minimizes movement of ascender on boot
- Works on left or right foot

ITEM #	PRODUCT	PRICE
41001	Jet Step Foot Ascender	\$99 ⁹⁹

CMI // FOOT ASCENDERS

- Includes a lock-closed mechanism
- Anodized aluminum body
- Kevlar straps
- Lifetime cam guarantee
- For ropes 9 to 16 mm
- Each weighs 320 g

ITEM #	PRODUCT	PRICE
31913L	Left	\$76 ⁹⁹
31913R	Right	\$76 ⁹⁹

CAMP // TURBO FOOT ASCENDERS

Proprietary rollers positioned where the rope tends to rub on the body of a traditional ascender ensure smoother action and a longer product life for both the ascender and the rope.

- Toothed cam has a special anti-wear treatment
- Innovative strap design for a secure fit
- Straps align with direction of the forces being applied for comfort and efficiency
- Accessory carabiner can be attached to prevent kick out
- For ropes 8 to 13 mm
- Weighs 135g / 4.8oz

ITEM #	PRODUCT	PRICE
40280	Left	\$84 ⁹⁹
40279	Right	\$84 ⁹⁹

CAMP // TURBO HAND // Ascender

CAMP Turbo Hand Ascender features a proprietary roller which not only helps with climbing efficiency by making the upward glide much smoother, it also reduces dangerous wear and tear on the device where the rope tends to rub on the body of a traditional ascender.

- Ergonomic rubber handle
- Three large attachment points
- Constructed from 3.5 mm aluminum alloy
- For ropes 8-13mm diameter

ITEM #	PRODUCT	PRICE
41510	Left	\$99 ⁹⁹
41461	Right	\$99 ⁹⁹

CMI // EXPEDITION II ASCENDER

The Twin Expedition is the first single-handled dual ascender designed to meet the needs of industry leading arborist professionals. It is intuitive and easy to use, has redundant safety features, and is the first ascender on the market to use one finger to actuate both cams for one handed downward adjustability. One ascender, two handles!

- Works with ropes 8mm-13mm

ITEM #	PRODUCT	PRICE
31107	Expedition II	\$149 ⁹⁹

CMI // EXPEDITION ASCENDERS

Designed for improved comfort (angled) and glove wearers (larger opening).

- Works with ropes 8mm-13mm

ITEM #	PRODUCT	PRICE
30664L	Left	\$109 ⁹⁹
30664R	Right	\$109 ⁹⁹

CAUTION TOOTHED ASCENDERS ARE NOT FOR FALL ARREST. MOST ASCENDER "ISSUES" OFTEN RELATE TO DEBRIS INTERFERENCE.

PETZL // ASCENSION

SET89	Left and Right Set	\$172 ⁹⁹

Works with ropes 8mm-13mm

PETZL // ASCENTREE

This double-handled, dual-cam ascender by Petzl was designed specifically for secured doubled rope climbing tasks utilizing Petzl's popular Pantin foot ascender on page 53.

- Rounded ergonomic tops for easier thumb use
- 15% lighter than the old version (.86lbs)
- Large lanyard hole than before
- For ropes 8-13mm diameter

ITEM #	PRODUCT	PRICE
32391	Ascentree	\$219 ⁹⁹

CT // QUICK ROLL

Innovative ascender handle with integrated pulley to be used together with auto-blocking descender. It is more effective and less clumsy than the traditional ascending handles with their additional connector.

- Rope runs from the descender over the integrated pulley, thus reducing friction
- Pulley provides a mechanical advantage for SRS
- One hand cam opening lever
- Wear-resistant steel blocking cam
- Depressions to avoid dirt and mud build
- Depressions reduce force needed to slide device
- The integrated pulley is not for life support

ITEM #	PRODUCT	PRICE
40481	CT Quick Roll	\$109 ⁹⁹

KNUCKL // ROPE GRIPPER

KNUCKL is an ergonomic lightweight rope gripper device designed to fit comfortably in the hand to increase grip and reduce fatigue when lifting, hauling or holding ropes in all sorts of applications.

ITEM #	PRODUCT	PRICE
41555	Knuckl	\$39 ⁹⁹

PETZL // CROLL CHEST ASCENDER

- Angled attachment hole and special shape allow it to remain flat against the body
- Rectangular upper hole for attachment of shoulder straps for positioning
- Slides up the rope easily as the user ascends
- Use on single rope from 8 to 11 mm
- CE certified EN 567

ITEM #	PRODUCT	PRICE
29492	Croll Chest Ascender	\$74 ⁹⁹

NEW! NOTCH // SRS CHEST HARNESS

Notch Equipment brings to you an adjustable chest harness for SRS climbing. Multiple attachment points on the sternum and size adjustments provide a great solution for any Stationary Rope System. Chest Size - 33"- 49"

- 3 independent webbing adjusters offer custom fit and great comfort
- Staggered clip in loops allow multiple height preferences
- Constructed of 3/4" durable webbing

ITEM #	PRODUCT	PRICE
52076	SRS Chest Harness	\$36 ⁹⁹

CAMP // TURBO CHEST ASCENDER

- Fits 8-11 mm line
- Two proprietary rollers for a smooth interface with the rope
- Profiled closure keeps the rope in line with the body of the device
- Anti-wear treatment
- Drain holes
- Simple and secure opening mechanism
- Ability to lock the device open for easier attachment

ITEM #	PRODUCT	PRICE
40278	Turbo Chest Ascender	\$84 ⁹⁹

SAM THEIS // MAGNETIC BREAK-AWAY NECK TETHER

- Simple and easy to use device for progressing your climbing system
- Rare-earth magnets are strong enough to pull up your climbing system, but can be easily pulled apart by leaning back

ITEM #	PRODUCT	PRICE
40778	Magnetic Tether	\$24 ⁹⁹

WEAVER // CHEST BOX WITH LOOP

- Lightweight and adjustable with unencumbering design
- Constructed from 1 inch poly and elastic webbing with a 1 inch beveled non-rust stainless steel dee and a black plastic loop and quick-release buckle
- 21 inch shoulder straps and a waist that adjusts from 33 to 52 inches

ITEM #	PRODUCT	PRICE
36432	Chest Box with loop	\$17 ⁹⁹

4SRT // CHESTER SRT CHEST BOX

- Comfortable and adjustable chest harness for progressing your SRS system as you climb
- Adjustable to fit your body size
- Multiple front loops so you can choose where to hook in
- Great balance of effectiveness and comfort

ITEM #	PRODUCT	PRICE
40363	Chest Box - Standard	\$39 ⁹⁹

4SRT // CHESTER SOLO

The 4SRT Chester Solo is an efficient, simple up and over sling, for ease and comfort during SRT ascent, with multiple adjustability. DMM XSRE not included.

ITEM #	PRODUCT	PRICE
41426	Chester Solo	\$49 ⁹⁹

PETZL // RIG

- Ergonomic, multifunction activation handle with spring return
- Improved rope braking mechanism
- Smooth control componentry as well as the ability to ascend without need to detach from your line
- While climbing, if the user releases the handle, it springs into a position such that if anything falls on the handle, the mechanism locks until manually disengaged
- Approved for stationary rope work positioning in tree care
- 10.5 to 11.5mm ropes

ITEM #	PRODUCT	PRICE
33401	Rig	\$209 ⁹⁹

PETZL // GRIGRI +

This unique belay device for ropes works much like an automobile's seat belt. When movements are slow, the rope runs freely through the device; when there is a shock load, it locks, jamming the rope with its internal cam device. Not a substitute for skilled, vigilant belaying.

- Grigi+ features anti-panic handle
- Works on 8.9mm to 11mm ropes
- 185g in weight

ITEM #	PRODUCT	PRICE
27869	Grigi+	\$129 ⁹⁹

TAZ // LOV2 DEVICE

In the event of a fall, a rope access technician can rescue himself immediately, without the need to use any other system.

- Allows transition from fall arrest, ascent or descent without changing devices
- Functions on vertical, diagonal or tight climbing lines
- Easy to install mid-line
- Can be utilized as a work positioning lanyard adjuster
- Robust, fully riveted construction
- Long life stainless cams with replaceable tensioning cleat
- EN 12841 (10-11 mm diameter rope) and EN 358 (11 mm diameter rope)
- Max load 264 lbs
- Expert users only

ITEM #	PRODUCT	PRICE
50080	LOV2 Device	\$279 ⁹⁹

FIGURE 8 // DESCENDING DEVICES

A descending device that can be employed quickly on one or two parts of a 10-13mm rope to lower one's self to the ground.

- DMM Anka features a 90° twist from the attachment hole to the rope running hole
- Ears were first added to this rappelling device in the early 70's to reduce the chance of the user accidentally girth hitching their life line
- Figure 8 is often referred to as the "deaf 8" because it doesn't have ears.
- Rescue 8's ears also make it easy to perform a lock off when desired, but adds weight and bulk
- Cardiac Arrester has a special heart shape designed to reduce the possibility of accidental girth hitching
- Petzl Pirana is a multi-faceted descender that allows for fine-tuning your friction by rerouting your line several ways

ROPE LOGIC // SRT BASAL ANCHOR SLING

This basal anchor sling from Rope Logic is used to anchor your single line to the tree. This concept was designed by Todd Kramer of Chicago. It allows the SRS climber to be lowered to the ground by his coworkers in case of an emergency rescue. It is comprised of a tachyon sling stitched onto a CT Rigging plate. The sling is adjusted in length with a prusik loop which is run through the plate and attached to the lowering device. A length of prusik cordage is included.

- 25' Length

ITEM #	PRODUCT	SIZE	PRICE
40236	Basal Anchor	25'	\$64 ⁹⁹

A.R.T. // SNAKEANCHOR

The numerous applications, from basal anchor with multiple attachment points, to retrievable double rope tie-in-point, give the SnakeAnchor a place in every climbing system.

- Easy to install in basket, choked, or straight-sling formations
- Can be continuously adjusted (2.7 inch intervals)
- Can be installed open and used as a friction device with pulley or biner in the desired length
- Tube shaped ring
- Parallel sewn 8 mm polyester double-braid rope
- Segment stitching

TIPS FROM THE CANOPY

BASAL ANCHORS AND SLINGS

Basal anchors can significantly speed up the process of getting into the tree to begin working. Be certain that you are aware of and understand the potential forces that basal anchors can place on your tie in point. Spreading the forces throughout several different unions is advisable, as is making sure your ground crew understands completely the basal anchor system you are using.

NEW!

SHERRILLTREE // EDGE II // Saddle

One of Sherrilltree's most popular tree climbing harnesses, the EDGE™ is back. We took all the key features of the EDGE™ and made them better. We drastically reduced weight, added newly designed hardware components, redesigned gear loops/hangers, added breathable compression formed padding and much more. Manufactured in the US by Buckingham Manufacturing with a rope bridge made with Samson Midnight Ivy.

- One of the lightest saddles on the market, just 4.2lbs
- Lower rigging plate hardware features: options for a multi-bridge setup, forward lower D-Ring setup
- 40" SherrillTree Midnight Ivy 11.7mm rope bridge with large 5000lbs 1-7/8" eye aluminum attachment ring
- Lightweight aluminum Quick-Connect and Friction Buckles
- 5 separate gear loops/hangers that are easy to reach
- 4 web slots for chainsaw carriers and other accessories
- Standards - ASTM F887

BUCKINGHAM // AGILITY // Climbing Saddle

Handmade in the USA, the Buckingham Agility™ saddle was designed in conjunction with Jamie Chambrelli and the team at ArborMaster™ Training Inc. This saddle was built for “Work” with a focus on comfort, durability, mobility, and functionality.

- Hook & Loop “stay put” waist and leg straps
- Articulating legs pads and straps that are engineered to give you maximized mobility. The leg pads move completely independent from the upper suspension allowing for more mobility in your waist and legs.
- Options for a multi-bridge setup and a forward lower D-Ring setup
- Specially designed back pad for maximized support while working
- Independent leg suspension straps adjusting leg shape and size
- Newly designed gear loops that are easier to reach and use
- Four spots for tool hangers and various loops
- Handmade in the USA

BUCK TREE
BUCKINGHAM MFG

FORGED IN QUALITY...CRAFTED WITH INNOVATION

BUCKINGHAM

TRADITION THAT NEVER DIES

BUCKINGHAM // PINNACLE AMT CLASSIC // Saddle

The Pinnacle saddle reflects a more traditional-style tree climber's saddle, with attributes that add comfort to an often awkward and strenuous occupation.

- Leg straps with soft padding and chafe resistant material
- D-rings are small and light weight
- Bosun seat-style
- Adjustable seat strap buckles
- 7" wide back support, loaded with storage positions
- Heavy duty material and stitching
- Weighs 5 lbs

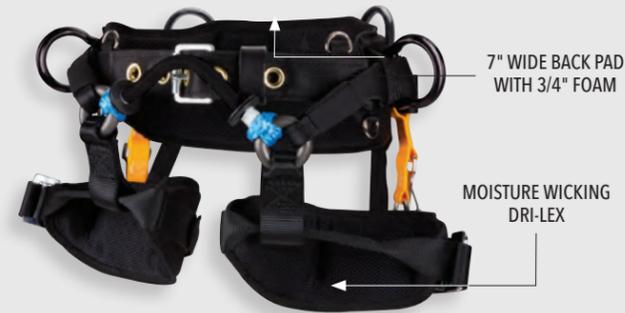

THE PINNACLE HAS THE ADVANTAGE OF BEING ABLE TO SUPPORT THE WORKER WITH D-RINGS APART

WEAVER // WLC-700 // Saddle Formerly known as Cougar

With design assistance from North Carolina arborist Eddie Simril, Weaver's WLC-700 makes for a good-quality, floating bridge saddle.

- Adjustable leg and bridge straps provide comfortable fit
- Removable and replaceable leg pads and bridge
- Leg straps feature secure, quick-connect buckles for ease of use
- Belay loop on back for training and rescue (not for fall arrest)
- Spaces in belt for attaching accessory carabiners
- Built-in attachment rings for suspenders (suspenders sold separately) help distribute tool weight to reduce fatigue
- Three additional D's on the bottom of the waist back for attachment of ditty bag or first-aid kit
- Weight: approximately 6.5 pounds

WEAVER // DENALI // Adjustable Harness

Leading the industry with a one-size-fits-all design, the Denali by Weaver combines patented AirFlex technology and high-performing safety features for the ultimate climbing experience.

- Featuring an adjustable waist (28"-48") and adjustable position hip dees and leg pads to fit climbers of all heights
- Patented AirFlex foam allows continuous air movement
- Lightweight, high-strength aluminum hip dees and rigging plates
- Rugged, durable water buffalo leather forms to the shape of your body
- Double rope suspension bridge features a diamond knot at one end and a girth hitch on the other
- Extra wide back pad extends further forward on hips for enhanced comfort and support
- Replaceable back pads, leg pads and bridge
- High-strength nylon webbing with multiple gear loops
- Durable aluminum, quick-release waist buckle
- Fixed position, angled side dee rings
- Handcrafted in the USA
- Climbing harness is not intended to be used for fall arrest.
- Only authorized replacement parts from Weaver Arborist should be used on this arborist saddle.
- Weighs 6.5 lbs.

SHERRILLTREE // SADDLE SIZING GUIDE

Manufacturers provide general waist fit ranges for their saddles, but don't typically provide measurements for the hip rings or leg straps. For improved customer convenience, we've painstakingly measured and logged the actual ring and leg measurements of each product we sell. Take measurements fully clothed and at the specified locations, then select your next saddle based on the actual fit ranges that you'll find listed near each saddle.

SAMPLE MEASUREMENT CHART

ITEM #	SIZE	WAIST	RINGS	LEG	PRICE
	Vendor Size	A	B	C	

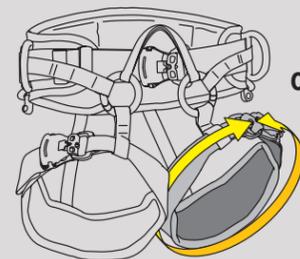

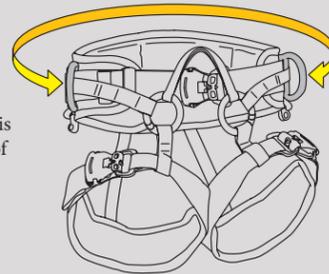

A) WAIST IS THE SMALL TO LARGE BELT MEASUREMENT

Wear your climbing pants, belt and at least one shirt to reflect a minimal working outfit. Make sure to measure just above your hip bones where most climbers wear the waist belt.

B) RINGS IS THE RING TO RING MEASUREMENT

For optimum comfort it is best to have the positioning rings resting forward of your hip bones, although quite frankly, this position is more important for linemen's belts where 100% of climbing time is performed on gaffs and lanyard.

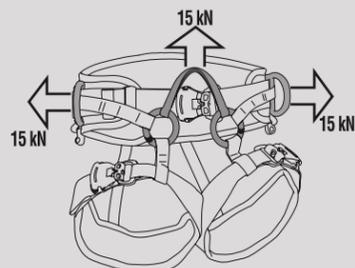

C) LEG IS THE SMALL TO LARGE LEG STRAP MEASUREMENT

Most saddle leg straps encircle the very highest part of the thigh. Make sure when you choose a saddle that's maximum measurement isn't "tight" on your leg, leave room for a loose fit here.

CAUTION WORK POSITIONING SADDLES (TREE CLIMBING HARNESSSES) ARE DESIGNED FOR POSITIONING AND NOT DESIGNED OR SAFE FOR FALL ARREST! FALLING IN A POSITIONING SADDLE WITH RESTRAINT ATTACHED TO THE ABDOMINAL AREA CAN LEAD TO A BACK INJURY OR WORSE. ALWAYS KEEP CLIMBING LINES TAUT (WITHOUT SLACK) AND USE A SAFETY LANYARD WHENEVER POSITIONING FOR A TASK!

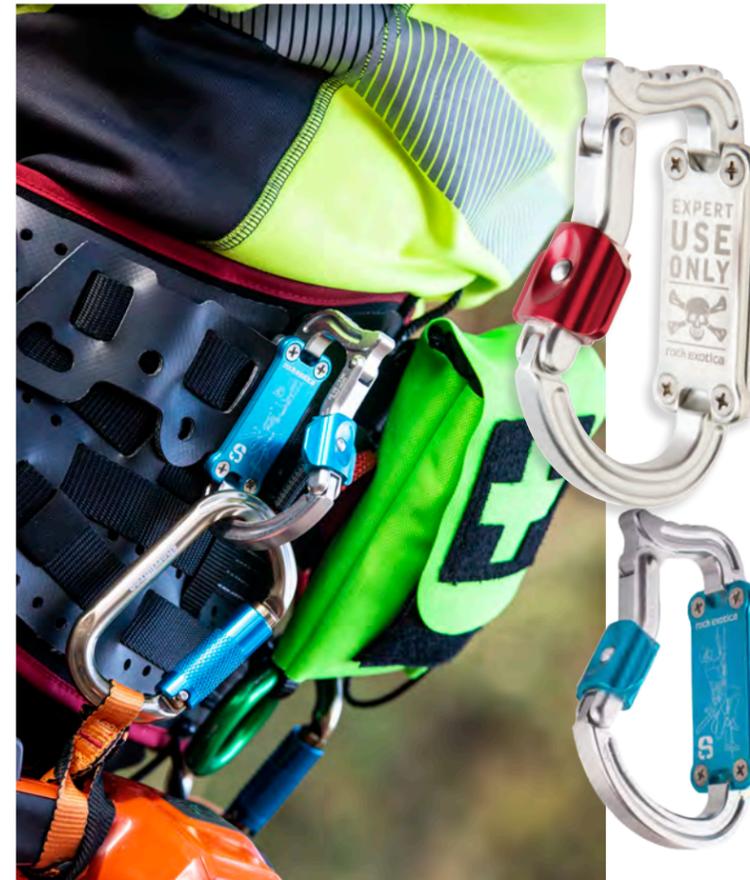

WORK POSITIONING SADDLES

Work positioning saddles certified to Europe's stringent EN 813 and EN 358 standards are designed for work positioning and not fall arrest. These saddles, such as Sequoia, TreeMotion, Sentinel, and more, are tested as follows:

STATIC TEST: approved attachment points must withstand a 15 kN (3,372 lbf) static load for 3 minutes. Actual strength is generally much higher than that required by the standard.

DYNAMIC TEST: attachment points designed to be used in pairs must withstand a 100kg 1-meter drop test; those designed to be used individually must withstand a 2-meter drop.

ROCK EXOTICA // TRANSPORTER // Tool Holder

Your tools spend more time hooked to your harness than in your hands, making the ultra secure transPorter the ideal choice for attaching tools to your harness.

- Wide, flat base keeps it upright and secure
- Gate can be locked or unlocked
- Flat, shelf-like top provides an area to stack and sort gear
- A "winged" gate provides for easier access when you're wearing gloves
- Includes two sets of screws to accommodate different thicknesses of webbing on many types of harnesses.
- Gate opening: 1.25"

ITEM #	PRODUCT	PRICE
39538	transPorter	\$70 ⁰⁰

TIPS FROM THE CANOPY

ANSI Z133-2017 (8.2.8)

Carabiners used as part of a climber's work-positioning (suspension) system shall be self-closing and self-double locking and shall have a gate-locking mechanism that requires at least two consecutive, deliberate actions to unlock. A carabiner shall be capable of withstanding a 5,000 pound (22.24kN) load along its major axis with the gate closed without breaking or distortion sufficient to release the gate.

***SAFETY NOTE: Carabiners with ORCA-Lock**

ORCA stands for open regular/close auto. The unique autolock sleeve/gate can be set in the unlocked position—meaning when you open the gate, it's just like opening a non-locker. Then the magic kicks in! The act of opening the gate "triggers" it. When the gate closes, it will autolock

just like a regular autolocking carabiner. Presto! Security in spades. But why? The ORCA can be initially unlocked for easy opening without the digit gymnastics. Then when you clip it in, it locks. Ease of use when you want it. Security when you need it.

If you are looking for a carabiner with unique abilities, then look no further. Just be sure to practice low and slow, and be familiar with the use of your equipment in all phases of your work. These are for experienced, advanced users. Due to the mechanism that makes the

ORCA carabiners unique, there is potential for the gate to stay in an unlocked position. Because of this, these carabiners do not comply with ANSI Z133 requirements for life support and should not be used in a life support scenario.

TIPS FROM THE CANOPY

MICRO PULLEYS

Adding a micro pulley to your climbing system is a great investment and one that can introduce greater efficiency and ergonomics to your system. Whether you are looking to add a micro pulley to your traditional split tail system, or a more technical closed system, it will greatly improve your system. Numerous options are available to find the right for you and your system.

EXCLUSIVE!

DMM // HITCH CLIMBER PULLEY // Triple Attachment Pulley

The Hitch Climber Pulley is the hub of a friction-hitch work-positioning system that helps align carabiners properly. It features a third hole that gives life to numerous configurations all going to one position on the saddle. This alone simplifies complex systems.

And what it brings to climbing it also brings to rigging applications. Your good sense and imagination are the limits!

- Sherrilltree Exclusive Color
- Hot-forged 2014 T6 alloy
- Rope-friendly flares and rounded edges
- Pre-lubricated bronze bushing (70% Rolling efficiency)
- For lines 9-14 mm

ITEM #	PRODUCT	PRICE
HITCH-BG	Blue/Gray	\$59 ⁹⁹

30KN

It's highly recommended that the Hitch Climber Pulley be used with oval shaped carabiners such as the DMM Ultra-O on page 80.

DMM // HITCH CLIMBER ECCENTRIC PULLEYS // Triple Attachment Pulleys

The Hitch Climber Eccentric is an evolution for the classic Triple Attachment Pulley that became widely known as the 'Hitch Climber'. The design improvements are the result of over a decade of Hitch Climber design and manufacturing expertise together with valued feedback from climbers.

It will advance your friction hitch earlier and fairlead your rope better for greater efficiency. The optimised fairlead flairs direct rope towards the sheave and improve slack handling.

Precision engineered to be very strong, light and rope friendly it has a striking design aesthetic.

- Sheave Diameter: 42mm
- Sheave Tread Diameter: 28mm
- Min Rope Diameter: 7mm
- Max Rope Diameter: 14mm
- Dimensions: (W x H x D) 66 x 96 x 44mm

NOTCH // ROOK // Triple Attachment Swivel Pulley

The answer to the quest for an optimal rope bridge accessory that allows climbers the ultimate work positioning connection.

- Three-hole configuration yields big combinations, yet small enough to fit in the palm of your hand
- Rubber-lined attachment holes help minimize carabiner movement
- Use on saddles with rope style bridges measuring up to 13mm in diameter
- Swivel PAW helps reduce twisting
- Optimal chamfer edging prevents rope chaffing and wear
- Milled from premium T6 aluminum
- Tensile: 28 kN, weighs 5.6 oz, bearings instead of bushings
- Not mid-line attachable

LIFETIME WARRANTY

NOTCH EQUIPMENT

It's recommended that the Notch Rook Pulley be used with Rock Exotica Rock-O, or Notch Oval carabiners on page 79

DMM // PINTO // Pulley

These pocket-sized wonders have beautifully rounded edges and flush axle ends for ideal use around life safety ropes and rigging. Frame is hot-forged 7075-T6 anodized aluminum supporting a heat-treated stainless-steel spindle for maximum tensile strength. The attachment eyelets are designed to help restrict inadvertent carabiner rotation, while the becket strap (opposite attachment end) is load-rated for tricks involving direct rope or strap attachment.

ROPE LOGIC // AZUA // Lanyard

- Certified to: ANSI-Z359, ASTM-F887, ANSI Z133
- Rock Exotica rockGrab
- 9/16" double braid rope with different color core to make inspection easier
- Hybrid steel/aluminum locking snap
- Back end of rope has stitched eye to allow for various tending options
- Rock Exotica rockGrab allows for one-handed adjustment to shorten or lengthen lanyard
- RockGrab sports an attachment-hole orientation that points the ascender directly forward for improved performance as a lanyard adjuster
- 90° connection point properly orients the rockGrab with the D-ring on the harness
- RockGrab body is milled along the side to remove unnecessary material, making it one of the lightest grabs available
- Axle rests entirely within the body giving the grab a slim profile, free of any annoying external bolts or pins

A.R.T. // POSITIONER

The Positioner lanyard adjuster by ART provides minute and feathered line release at the nudge of your wrist. Designed and manufactured in Germany, this lightweight and compact rope cam device is made with exhaustive attention to detail.

- Milled from high-grade aluminum and utilizing stainless steel pins and screws
- Cinches rope using a smooth-faced and non-aggressive clutch that doesn't damage rope
- Allows the user to release line while under tension
- Small and ultra light weight
- Safety feature: Requires tool to remove lanyard
- Clutch now available for cut-resistant wire-core lanyards
- Available with swivel connector
- Adjuster weight 158 grams (181g with swivel)

WORK POSITIONING LANYARDS BY ROPE LOGIC

Premium lanyards built to meet your needs! Choose from the widest range of top-brand cordage known to the industry for your next work positioning lanyard that meets ANSI regulations.

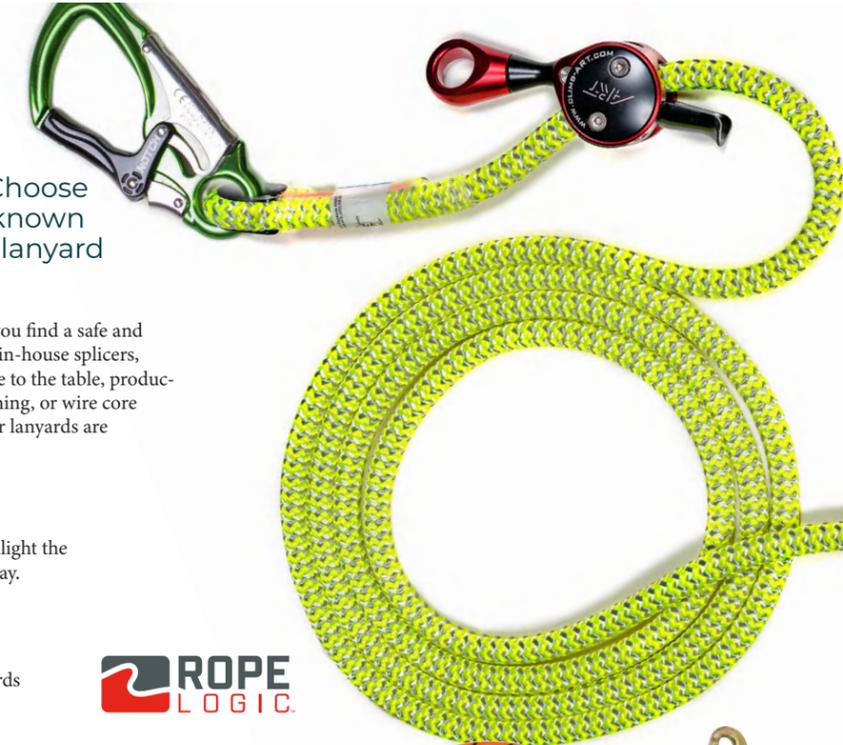

Whether a flipline, buckstrap, or 2 in 1 lanyard, they all play a part in helping you find a safe and ergonomic work position to keep you safe and efficient. Produced by certified, in-house splicers, Rope Logic's splicing department brings 100 plus years of combined experience to the table, producing a wide assortment of terminations. Be it hand splicing, Grizzly Splice® stitching, or wire core swaging, their terminations are put to the test on a break machine to ensure our lanyards are exceeding the safety standards.

CORDAGE // ADJUSTERS // HARDWARE

We have gathered some of our top lanyard combos and simplified them to highlight the most popular cordage, adjusters and hardware in the industry for work ... or play.

RIG

TIPS FROM THE CANOPY

Phil Kelley on Rigging
Wright Tree Safety Team Lead

ST: What rigging equipment do you feel has been a game changer in the field?

PK: Depending on the region, Portawraps have been revolutionary. Also, I'm trying to walk teams away from big, chunky rigging and get them into the smaller, green ISC block, or the small orange CMI block. I've introduced the use of rings for aerial friction- that's been big for them.

ST: What's the advantage of the aerial friction devices for your teams?

PK: Basically ease of use, and adding friction at the top eases the training process at the bottom. It creates an environment where one person on the ground can do what normally takes two. It's less equipment involved, less structure, and less learning curve while providing a little bit higher safety factor in the tree.

ST: You said you're getting your teams away from big, chunky blocks and moving toward the smaller, more streamlined products. Tell us more about that.

PK: When you look in a line clearance rigging bag, it's going to have the biggest portawrap that's been invented with a 3/4", 35' whoopie sling, and up in the tree there'll be a 3/4", 12' long sling that'll have the huge, massive block, running a 3/4" rope because they think bigger is better. You know, a lot of those guys look down on the ground and see that big block with that massively long sling that's such a huge pain in the butt to move, then they're like, just leave it; just throw the rope over a tree branch. I don't blame them, I'd be thinking that, too! If all they have is a 12' limb over a primary, forget all that gear, they'll just do it the hard way. Wouldn't you?! OR, you give me two DMM Pintos and a chain reactor, and I'm done, right? With a Pinto and an x-ring, I can change the world. The biggest challenge we have now is deciding on what to use where with all the options available today. Put the tool to the task. It's like SRS- is it a good system to complete the task? It depends on the task I'm asking you to perform. There are plenty of trees where I think MRS is a beautiful system, and I think SRS is beautiful depending on the tree. Tool for Task.

ST: So when you're building a rigging system, what principles guide how you set it up?

PK: Two super simple things: one, is the tree in compression? Two, am I using more than one directional anchor to succeed in keeping it in compression?
If the tree isn't in compression, it's under either a bending moment or a lever force. I'll create torsional loading and the tree will fail. Trees don't fail in compression, so my rigging positions should always be in compression. I should always be trying to smash the tree into the ground with the rigging force.
More on the second: do I have more than one directional anchor? One directional anchor multiplies negative energy in the crown of the tree, but two anchors, when done well, splits the system- reducing energy and adding compression.

@RISE117 / TRIBE MEMBER BRIAN RECTOR

NOTCH // PORTAWRAP // Stainless Steel

- Consistent feel of manageable friction generated by use of the Port-a-Wrap is just as simple as tree wraps but is much more predictable— with no tree damage
- Quickly wrapped and unwrapped between loads
- Stainless-steel construction
- Tree protecting cap on the tube ends eliminates sheered edges and protects trees
- Medium is for lines up to 9/16"; weighs 3 3/4 lbs
- Large is for lines up to 3/4"; weighs 7 1/4 lbs
- Medium and Large rated at 2,000 lbs WLL

CMI // ROPE JACK

The CMI Rope Jack is a Mechanical Advantage tool for pre-tensioning static lines, light lifting and cabling. The Rope Jack is small enough and light enough to be carried aloft by a climber for Mechanical Advantage within the crown.

- Weighs 5 lbs
- MA is approximately 5:1
- NOT be used for heavy or dynamic loads
- Approved for static ropes from 3/8"-5/8" diameters
- Used to remove slack & stretch for lowering and to lift the tips on light limbs
- The length of the handle limits excessive loading to avoid rope damage
- Can attach mid-line and can run virtually any length of rope
- User can generate somewhere between 300-800 pounds of force

ITEM #	PRODUCT	PRICE
39641	CMI Rope Jack	\$289 ⁹⁹

With over 100 years of combined experience and zero in-service failures, there is no question that Rope Logic is the #1 choice of arborists.

We offer the largest selection of rope from all the leading manufacturers. Contact us and we'll direct you to the right product or customize it to your specific needs.

COMES WITH HD ALUMINUM BOLLARD POST

THE GOOD RIGGING CONTROL SYSTEM (GRCS)

A heavy-duty lowering and lifting device combining easy setup, plenty of lifting power, and dependable, tangle-free operation all in one package. Essentially a strap-on crane!

- Hinged side plates and nine rubber feet protect trees and provide a solid mounting to a wide range of stem and pole diameters
- Winch lifts and the provided aluminum bollard lowers when no lifting is required
- Patented fair-lead system positively positions the rope on the drum correctly
- Beefy mount for heavy use
- Compact to be quickly installed at the jobsite
- The Harken 44:1 winch features a self-tailing two-speed gearing system which means a true one-person operation
- Winch accepts 1/2" to 3/4" lowering lines. The aluminum bollard features a 4" diameter tube welded to a base plate, with a cavity large enough for an ice pack to be placed inside to prevent rope glazing during very extreme lowering situations
- Brake drum also accepts ropes of any diameter
- Optional drill chuck is available that plugs into the handle socket
- Optional truck-mount adapter plugs into any 2" square trailer hitch receiver tube
- Optional visor attachment allows you to "cut" the winch in for security and a true one-"groundie" installation on removal operations

ITEM #	PRODUCT	PRICE
22041	GRCS complete	\$2,894 ⁹⁹

STEIN // RCW-3001 BOLLARD AND WINCH SYSTEM

The STEIN RCW3001 was upgraded to allow a Winch System to be fitted without compromising the integrity and features users have come to trust. The winch can be easily attached and detached during use without affecting the working line or the products performance. The RCW-3001 is probably the most user friendly and flexible winching bollard on the market to date.

- Operator can use the bollard independently of the winch
- Winch can be integrated during a lowering procedure
- Does not support the load during a lowering procedure
- Can be easily mounted by one person
- Large diameter drum accommodates working lines up to 19mm and has a WLL of up to 3000kg (subject to mounting type)
- Drum has two sets of rope guides (fairleads) specially angled at 45-degrees which allows the operator to quickly add or subtract wraps
- Specially designed ratchet strap with waterproof webbing securely attaches the device to the tree and can be backed up by securing an Anchor-Sling to the base anchor point

ITEM #	PRODUCT	PRICE
40071	Complete Bollard & Winch System	\$1,149 ⁹⁹
40096	Single Bollard Lowing Device (RCW3001)	\$649 ⁹⁹
40095	Winch Kit	\$499 ⁹⁹
50001	Top Mounting Strap	\$22 ⁹⁹

KIT CONTAINS THE FOLLOWING ITEMS:
 RCW-3001 Lowering Device
 RCWINCH Winch Kit
 10t Ratchet Handle
 5.8m Webbing
 Pair of Protection Rubbers

STEIN // RCW2001

The RCW-2001 Fixed Bollard Lowering Device is a medium-duty single-bollard lowering device that fits securely to your tree without damaging the bark.

- Specially designed ratchet strap and a choked sling for quick and easy mounting
- Entire system can be mounted by one person

40400	RCW2001	\$399 ⁹⁹

TIPS FROM THE CANOPY

RIGGING SLINGS

Slings are perhaps the most versatile tether for rigging hardware. A block, Portawrap or other device is secured using a sling. We sell a variety of different slings, all with their specific advantages for specific scenarios. Despite their differences, these slings will be made from one of these types sling-grade ropes:

12-STRAND HOLLOW BRAID (POLYESTER)

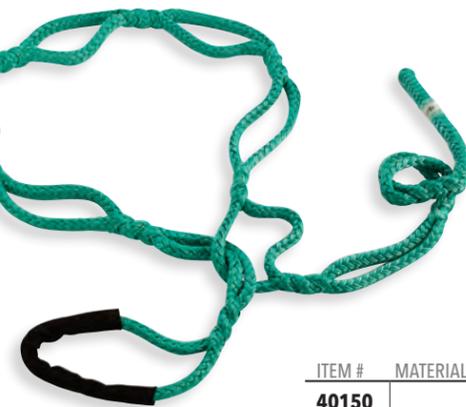

This rope's construction is stronger and more flexible than others because of its loosely woven, hollow construction. Since there's no core to this rope, abrasion wear is distributed throughout the cordage where it can be more easily monitored.

DOUBLE-BRAID (POLYESTER)

The tightly woven outer jacket of this rope helps protect the load bearing inner core from abrasion.

12-STRAND HOLLOW BRAID (DYNEEMA®)

Amsteel Blue, Samson Rope's brand name for Dyneema (HMPE) is pound for pound equivalent in strength to steel wire. Amsteel Blue is not only lightweight (only one-seventh the weight of wire), it's also as soft as silk and less bulky than any other sling grade materials!

ROPE LOGIC // ULTRA SLING

- This rigging sling easily adjusts in length using the spliced pockets located at fixed intervals
- Use with a rigging block, installed and captured in the terminal eye of the sling
- Made with Samson Tenex
- Designed for use in choked configuration only

ITEM #	MATERIAL	ADJUSTMENT RANGE	DIAMETER RANGE	SLING SIZE	TENSILE	WLL	PRICE
40150	Samson Tenex	8" to 18"	2' to 5'	5/8"	19,600	18,000	\$89 ⁹⁹
40151		8" to 24"	2' to 6'	3/4"	21,000	21,000	\$99 ⁹⁹
40149		12" to 42"	3' to 11'	3/4"	21,000	21,000	\$119 ⁹⁹

ROPE LOGIC // EYE SLINGS

Eye slings provide simplicity and versatility for rigging hardware. A block, Portawrap or other device is secured within the sling's eye, and a choking hitch such as a cow hitch or timber hitch is tied using the running end.

ITEM #	MATERIAL	SLING DIAMETER	SLING LENGTH	TENSILE/WLL	PRICE
15304	Samson Tenex (sling-grade polyester)	5/8"	10'	17K/1,700	\$44 ⁹⁹
15302		3/4"	12'	22K/2,200	\$54 ⁹⁹

31992		3/8"	16'	19.6K/1,960	\$84 ⁹⁹
31993		1/2"	10'	34K/3,400	\$89 ⁹⁹
31994		1/2"	16'	34K/3,400	\$119 ⁹⁹

ROPE LOGIC // WHOOPIE SLINGS

The Whoopie sling can be adjusted from short to long in just seconds and is most often used by riggers to anchor a block or friction device to a tree. A Whoopie allows the rigger to mount hardware snug against the tree, minimizing slack in the rigging system. Each Whoopie sling is hand-spliced by Rope Logic's certified splicers.

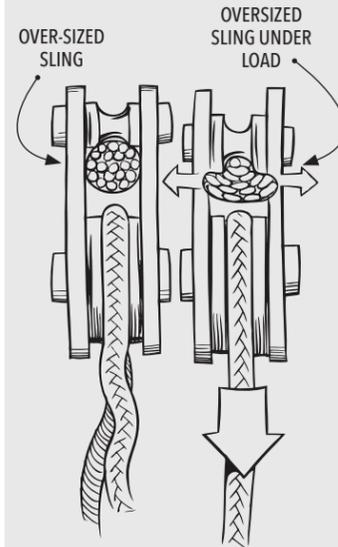

PORTAWRAP NOT INCLUDED

ITEM #	MATERIAL	ADJUSTMENT RANGE	DIAMETER RANGE	SLING SIZE	TENSILE	WLL	PRICE

TIPS FROM THE CANOPY

SLING SIZING

It is important that you convey to your crew the dangers of mismatching hardware. One such mistake would be to install a grossly oversized sling or running line into a rigging block. In the accompanying image we illustrate the effect of an over-sized sling flattening to produce outward pressure on a block's side plates in a manner that can damage one or both elements. Generally our blocks have capacity to support a sling 1/8-inch larger than its designated running line capacity. Work safe, pay attention.

ROPE LOGIC // LOOPIE SLING

The Loopie is an adjustable round sling that works similarly to our popular Whoopie Sling.

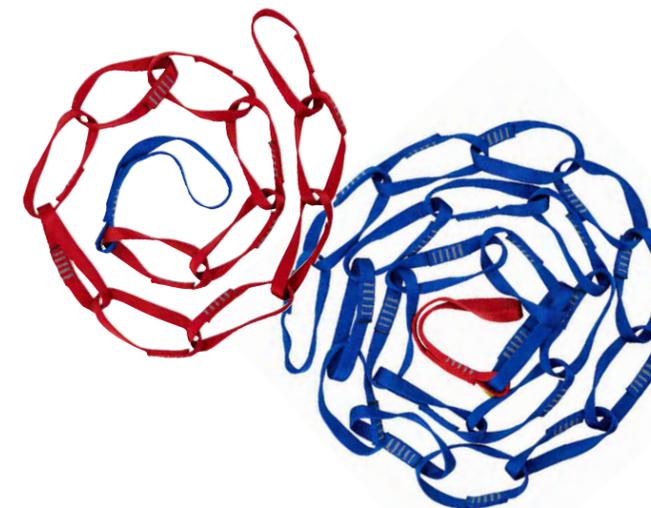

- Quickly adjusted to provide a snug anchor connection for most rigging hardware but is preferred for hanging a block or Portawrap in the crown where points of attachment tend to be smaller in diameter
- Lightweight, strong and folds quite small for storage

ITEM #	MATERIAL	SLING DIAMETER	ADJUSTMENT RANGE	WLL	PRICE
32449	Samson	3/8"	15" to 3'	2,500 lbs	\$64 ⁹⁹
32083	Amsteel	3/8"	15" to 6'	2,500 lbs	\$94 ⁹⁹
27584	Samson Tenex	3/8"	18" to 3'	1,000 lbs	\$29 ⁹⁹
27586		1/2"	2' to 4'	2,000 lbs	\$39 ⁹⁹
27587		1/2"	2' to 6'	2,000 lbs	\$44 ⁹⁹
27588		5/8"	2' to 6'	3,000 lbs	\$52 ⁹⁹
31167		3/4"	2' to 8'	5,000 lbs	\$59 ⁹⁹

EASILY ADJUSTED SMALL OR LARGE, THEN FOLDED IN HALF AND HITCHED THROUGH (AND AGAINST) THE ADJUSTABLE PORTION.

BLOCK NOT INCLUDED

STERLING // BARC2.0 RIGGING WEB CHAINS

The classic Sterling BARC Rigging Chain is updated with a new color scheme and stronger stitching! The BARC2.0, or Basal Anchor Rigging Chain, is made of 1 inch tube webbing loops, giving you almost limitless rigging options. Works well with Port-a-Wraps or other friction-brake lowering devices.

ITEM #	LENGTH	DIAMETER RANGE	PRICE
BARC2-85	8.5'	up to 32"	\$76 ⁹⁹
BARC2-16	16'	Up to 61"	\$115 ⁹⁹

NOTCH // PORTAWRAP & WHOOPIE COMBO

The Whoopie sling can be adjusted short (4-ft) to long (12-ft) with its special adjustment feature and attached to the tree by simply threading the Portawrap through its opposite end. Includes large-sized stainless steel Portawrap and hand-spliced, all-polyester 3/4 in. Whoopie sling.

NOTCH // PORTAWRAP & EYE SLING COMBO

Easy to attach and length-adjust with about half the rope bulk of the Whoopie sling combo (left). Requires operator to know proper rigging knot(s). Includes large sized stainless steel Portawrap and hand-spliced all-polyester eye sling.

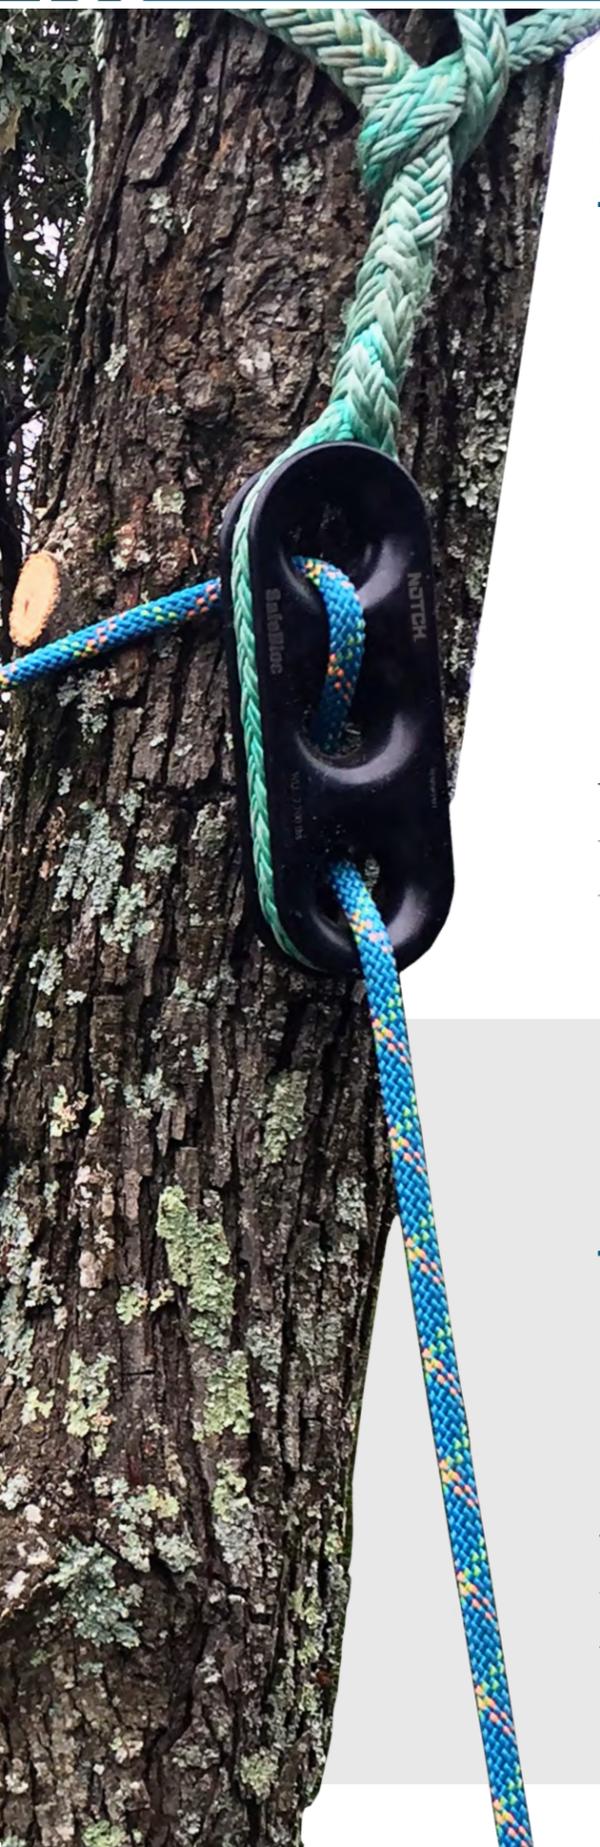

MEDIUM

ITEM #	PRODUCT	PRICE
KIT31	Large- Whoopie combo	\$264 ⁹⁹

ITEM #	PRODUCT	DIMENSIONS	PRICE
KIT27	Large- Eye Sling Combo (Not shown)	3/4" - 16 ft	\$219 ⁹⁹
KIT28	Medium- Eye Sling Combo	5/8" - 14 ft	\$209 ⁹⁹

NOTCH // SAFELOC // Sling Options

The SafeBloc is a triple hole thimble that adds friction in the rigging system to the top of the tree, thus adding safety by reducing rigging point stress, compared to a system that uses a block or pulley.

Lightweight and durable, the SafeBloc has no moving parts to wear out or damage, and is hard-coated for extended wear. It comes spliced onto an adjustable whoopie sling, or standard straight sling, available in 3/4-inch Tenex from Samson.

Use the SafeBloc anywhere you'd use an arborist block for lowering. The rigging line can be woven through the three holes for its maximum friction, or fewer holes for less friction. However, the climber should not have to travel back to the SafeBloc to do any adjustments; just pick the friction level predicted and continue to use it. You can use the SafeBloc without a basal lowering device on small-to-medium loads, but once you get to medium-and-above size loads, it's time to add the basal lowering device.

ITEM #	PRODUCT	ROPE DIA	LENGTH	PRICE
36693	SafeBloc with Whoopie Sling	3/4" Tenex	3-5 ft	\$182 ⁹⁹
36694	SafeBloc with Standard Sling	3/4" Tenex	16 ft	\$179 ⁹⁹

16 FT STANDARD SLING WITH SAFELOC

SEE PAGE 114 FOR MORE DETAILS ON THE NOTCH SAFELOC

NOTCH // TRIPLE THIMBLE // Sling Options

A new configuration of rigging thimble that allows you to add friction at the rigging point or run two lines separately. Running your rigging line through more than one hole of the Triple Thimble reduces forces on the rigging point and makes it easier to control the load, all without introducing any rope-on-rope friction.

3-5 FT ADJUSTABLE WHOOPIE SLING

SEE PAGE 114 FOR MORE DETAILS ON THE NOTCH TRIPLE THIMBLE

ITEM #	PRODUCT	ROPE DIA	LENGTH	PRICE
40638	Triple Thimble Whoopie Sling	3/4" Tenex	3-5 ft	\$179 ⁹⁹
40639	Triple Thimble Standard Sling	3/4" Tenex	16 ft	\$184 ⁹⁹

NOTCH // HARDCOATED RIGGING THIMBLES // Straight Slings

Use all the sling on large stems, use the extra as a backstay on smaller stems, and increase the load-dispersing capability of the Notch Hardcoated Rigging Thimbles. Because this sling is meant to be tied, it can be maneuvered around midline to other locations while still on the rigging line.

Need to redirect the angle of a pull line on a spar or tree? Looking for a smooth yet nearly indestructible attachment point for a more traditional speedline? Own a GRCS? This sling-and-ring combo is hands down the best tool to lead the rigging line fair into the top of the GRCS or any other ratcheting- or bollard-style lowering device.

NOTCH // HARDCOATED RIGGING THIMBLES // 36" Loop

The Hardcoated Rigging Thimble 36" loop can be added to rigging systems in any number of ways to accomplish the goal of safe, efficient rigging operations. Properly attach it to a rigging block sling and make a heavy-duty retrievable rigging point. Add midline to the lead of the rigging line and take spider-leg balancing to whole new level! Add to another Rigging Thimble sling and make a retrievable rigging redirect. The possibilities are limited only by your ingenuity and the demands of the job!

TIPS FROM THE CANOPY

RIGGING THIMBLES AND SLINGS

The uses for rigging applications are many. Redirect, fair lead, speedline, you name it. The possibilities are as varied as the gals and guys removing trees!

Through the use of strategically placed Notch Rigging Thimbles, riggers aloft can devise rigging systems that work with the tree's natural strength and structure. Rope and rope angles can be managed in and around the tree, in and out of blocks and other rigging points. Weak points can be strengthened or avoided. Loads can be placed in compression on the tree, and trees can be removed safely and effectively.

MULTIPLE-RING CONFIGURATIONS
Here's where spicers get to show off their creative skills. The multiple-ring configurations are works of art. The benefits of multiple rings is that you can combine the rings to give yourself a primary rigging point. A single ring does not give you enough bend radius for a primary rigging point, but two or more rings do. This page shows some of the current slings available, but we are working on more, so check our website often to see the latest creations.

SINGLE-RING CONFIGURATIONS
Single ring configurations should only be used as redirects in a system, because a single ring does not provide enough of a bend radius to be used as a primary rigging point when dealing with significant weight.

TIPS FROM THE CANOPY

RIGGING GEAR

New gear and techniques have come about over the years, but one aspect that has never changed, is friction. How we deal with this friction determines the efficiency and success of a system.

When lowering, friction is needed to control the load, and with the tools we have today, a single person on the ground can lower heavy loads in a controlled and safe manner. But when lifting, we want to minimize friction as it will making the lift more difficult. When selecting rigging equipment, think about what kind of rigging you do most often and look to build a system that offers versatility and options.

NOTCH // SAFELOC THIMBLE

SafeBloc is a triple hole thimble that adds friction in the rigging system to the top of the tree, thus adding safety by reducing rigging point stress, compared to a system that uses a block or pulley. Also, with the benefit of friction, the climber can often take over on the rigging line AFTER the groundperson controlled the initial drop. This is true on small-to-medium loads.

Lightweight and durable, the SafeBloc has no moving parts to wear out or damage, and is hard-coated for extended wear.

- Lifetime Warranty
- 3 Hole inner diameter is 1.49 in
- Rope capacity 3/4 in
- Outside Groove is 0.94in or a rope capacity of 24mm

ITEM #	PRODUCT	PRICE
36680	Notch Safebloc	\$144 ⁹⁹

NOTCH // TRIPLE THIMBLE

A configuration of rigging thimble that allows you to add friction at the rigging point or run two lines separately. Running your rigging line through more than one hole of the Triple Thimble reduces forces on the rigging point and makes it easier to control the load, all without introducing any rope-on-rope friction.

- Dimensions: 5.625" x 5.375" x 1.375"
- Milled from solid aluminum block
- Use it as an anchor for multiple rigging lines simultaneously
- Deeper rope groove than other rigging thimbles for extra-secure anchoring

ITEM #	PRODUCT	PRICE
40484	Notch Triple Thimble	\$139 ⁹⁹

NOTCH // HARDCOATED RIGGING THIMBLES

Notch Hardcoated Rigging Thimbles are simple in concept, brilliant in function. The thimbles are made with milled aluminum, then hard-coat anodized to MIL-A-8625 specification making them strong, and durable. Get them spliced in-house by Rope Logic for reliability and quality you can count on, with Tenex by Samson or tREX by TEUFELBERGER (see pages 109-111).

35790	28mm	20mm	\$34 ⁹⁹
36335	38mm	28mm	\$69 ⁹⁹

NOTCH // RIGGING THIMBLES

Notch Rigging Thimbles were designed by arborists and built by engineers. They are purpose-built for the arboriculture industry, with improvements over the original marine products on the market. Splice them into a sling for use as a rigging point or redirect.

ITEM #	CENTER HOLE DIA	SLING GROVE	PRICE

NOTCH // BACKBONE & BACKBONE MINI // Knotless Rigging Connector

The Backbone is a vital link in fast-paced, secure rigging scenarios using knotless rigging.

- Backbone attaches firmly to the lead end of the rigging line via a splice or by a cinching-type knot
- Made of Steel
- Heavy in weight to counterbalance the fall of the rigging line when there is an average amount of rope in the system
- Can handle numerous combinations of all types of slings—hollow braid, double braid, webbing, loop, or single eye
- Balance limbs or attach multiple branches in “bouquet” fashion, and send them to the ground
- Eliminates most of that “untie time” you get with knots, and increases productivity in a secure, no-hassle, sturdy package

ITEM #	PRODUCT	WLL	WEIGHT	PRICE
35174	BackBone	4,600 lbs	3.75 lbs	\$59 ⁹⁹
36681	BackBone Mini	3,700 lbs	1.4 lbs	\$44 ⁹⁹

NOTCH // RAPID RIG

The Rapid Rig consists of an octagonal ring and a toggle. It is intended to be used with an appropriate rope to create a positive connection between the ring at the end of the rope (via spliced or knot tied) and the toggle floating on that rope.

- Knotless chocking catch for lifting, dragging & pulling
- Multiple configurations for use in arboriculture, winches, vehicle recovery, logging, farming & more
- Prevents knot tightening caused by dynamic loading of rope
- Solid forged steel construction
- Recommended Rope Size: 3/16" (5mm) to 1/2" (12.7mm)
- MBS: 65 kN
- Should never be used for personal protective applications or for anchoring work positioning or life support lines
- Can be spliced onto select new rigging ropes for an additional fee.

ITEM #	PRODUCT	PRICE
40418	Rapid Rig	\$29 ⁹⁹

CRANE SLING COMBO

This ready-for-action sling combination was originally requested by California arborist Dave Anderson, and is sure to find praise and popularity from a number of crane-using arborists.

- Central sling = 1-inch, all polyester, Samthane-coated Stable Braid (double braid) cordage with a rated strength in excess of 33,300-lbs
- From this primary sling, the rigger uses the included and super strong Spider Legs (made of 5/8-inch, 17,100-lbs. tensile strength Tenex) to balance the load for controlled removal
- The Spider Legs can be height and length adjusted to provide just the right lift reaction or tipping needed to bring the load safely to the ground

ITEM #	PRODUCT	PRICE
34122	1" diameter, 20' Stable Braid central sling and clevis, with two 5/8", 17' Spider Leg slings	\$339 ⁹⁹

TEUFELBERGER // CRANE SLING KIT

This Crane Kit was developed by legendary American arborist, Mark Chisholm, specifically for TEUFELBERGER. It is suited for rigging applications that have to be carried out by means of a crane.

- Three sling kit consisting of low stretch, light weight legs that make crane work safer and faster
- 5/8" Endura Braid line, perfect for bigger pieces & extreme loads
- Low stretch slings are easier and safer to use since there's no bouncing and the climber doesn't have to come down to reset slings
- Lack of hardware means there are no dropped pins
- Two orange 19.6 ft slings and one blue 29.5 ft sling
- Color coding ensures clear communication

ITEM #	PRODUCT	PRICE
40015	Two orange 19.6ft slings and one blue 29.5 ft sling	\$599 ⁹⁹

LIFT-ALL // TRUFLEX LIFTING SLINGS

- High abrasion-resistant, incredibly strong slings designed for easy use and storage
- Low stretch, continuous loop polyester (non-woven) core that carries 100% of the load
- Two layers of Tufhide™ nylon
- Not abrasive to the user
- Seamless polyester cords inside
- Stitched-in Tuftag™ for lifetime identification of strength, serial number and date of manufacture
- Red core yarns provide a visual signal to the operator to retire sling
- Will fit gate of (most) steel carabiners or rigging clevises

ISC // RIGGING ROPE WRENCH

The device has been designed and manufactured for tasks involving the lowering of material from trees. It is to be operated by a minimum of 2 people, including the individual working at height. The device has been tested to withstand a maximum weight of 70kg (RP290), and 120kg (RP292). The device has not been designed as PPE equipment and should not be used as such.

- Spring Lock
- RP290 Sheave rotates freely in both directions
- RP292 features a locking sheave (one direction) that increases friction

ITEM #	PRODUCT	PRICE
41389	Rigging rope wrench with rotating sheave RF290	\$259 ⁹⁹
41390	Rigging rope wrench with locking sheave RF292	\$274 ⁹⁹

ROPE LOGIC // RIG N' WRENCH FIX SYSTEM

This innovative idea from Kevin Bingham takes the Rope Wrench one step further. A Rope Logic FIX tether connects the Rope Wrench to a DMM Pinto Rig pulley. This rigging system allows a groundsperson to handle more weight without the use of a traditional friction brake.

- The FIX Tether is made from 8mm Beeline and a special composite material that makes it incredibly stiff for ideal performance
- Extreme caution should be taken in determining appropriate load size
- The Rig N' Wrench only provides a single level of non-variable friction or braking force
- Available with or without the Rope Wrench

ITEM #	PRODUCT	PRICE
50083	Rig-N-Wrench System with Rope Wrench (pictured)	\$224 ⁹⁹
40169	Rig-N-Wrench System (without Rope Wrench)	\$119 ⁹⁹

DMM // IMPACT BLOCKS

With increased strength and more rope-friendly interaction between the cheekplates, bushings, and sheaves. These blocks are made from hot-forged 6082-T6 aluminum alloy for maximum strength-to-weight ratio, then polished, heat-treated, and anodized for an incredibly robust finish.

- No prefabricated bolts, pins, or plating
- All edges are smooth
- Componentry forged or CNC-milled
- Connecting points are either countersunk or rounded
- Stainless-steel 303 spindle and anchor pins
- Self-lubricating Oilite bronze bushings for years of trusted service

NEW! AVAILABLE APRIL 2021

NOTCH // 3/4" RIGGING SPRING BLOCK

New to the Notch Equipment family is this medium sized arborist block that accepts working lines up to 3/4" and is made from hot forged aluminum side plates and precisioned CNC machined aluminum sheaves.

- Accepts lines up to 3/4" (19mm) diameter
- 30kN WLL / 150kN MBS
- Weight 3.6 lbs
- Side plates with rope friendly rounded cheeks
- Aluminum sheaves with wide bend radii
- Low profile, secure, easy-to-open two stage captive spring pin lock
- Wide, concave upper sheave accepts 1 1/2" anchor slings
- Flared sideplates reduce twisting in complex rigging scenarios

ISC // SPRING LOCK ALUMINUM BLOCKS

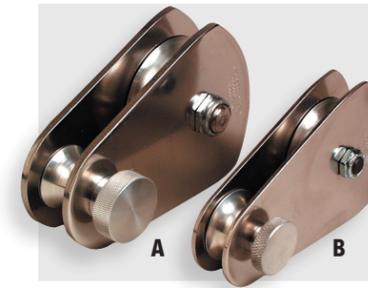

ISC Spring Lock Blocks are widely used and very popular with today's arborists, for their simplicity and strength.

- Colored cheek plates and sheaves to easily identify max rope sizes, safe working-load limits, max breaking strengths, and sheave sizes
- Rounded edges, sleek coatings, and new, fixed-bollard dimensions
- Excellent bend radii
- Easy-to-open fixed-pin attachment

CMI // STEEL BLOCK (Zinc Plated)

This zinc-plated steel tailboard block is highly rust resistant and won't chip or color-fade like similar painted steel blocks. These have stainless steel axles and a captured bushing and pin that won't fall from the tree when replacing your sling. Cheek plates swing fully open for maximum rope access; bronze bushings between axle and bushings have very tight tolerances to keep dirt and grit out.

ROCK EXOTICA // OMNI SWIVEL BLOCKS

The Omni block family combines tough, reliable pulleys with an incorporated swivel. Unlike other blocks, the side plate swings open to access the line without disconnection from a carabiner. Even better—a carabiner is not necessary! The swiveled anchor connection is cordage and webbing friendly. This, along with the designed short overall length, allows riggers to keep systems compact, clean, and functional. Made with state-of-the-art machining from a single piece of aluminum.

PPE

TIPS FROM THE CANOPY

Tyler Zuniga on PPE
NATS Lead Instructor

ST: You're passionate about helping people better understand their PPE. What should we be thinking about when we work with our PPE?

TZ: There are limits to all PPE, to helmets, to harnesses, to ropes, to everything we use, and I didn't always understand that. The proper care is really important, too. I didn't always think of the acronym PPE, personal protective equipment. I don't think a lot of us take it to heart, you know? PPE is a life saving piece of equipment. So proper care is important, like where I store that equipment as well as maintenance. What do I need to do to a simple carabiner? I have to constantly clean the gate, because out here sap plays a big role on the function of that gate. Another thing, what is the useful life of PPE? For a harness it's usually 5-7 years. The proper disposal is also important, because if something is not safe for me to climb with, I shouldn't throw it away in a way that someone else could find and bring it back into service.

ST: Where do you see the greatest gap of understanding regarding the function and limitation of PPE?

TZ: People buy PPE and create their own idea of how they want to use it, not always following the manufacturers specifications. They kind of jerry-rig stuff to work the way they want it. That's exposure to risk. Not knowing that, can have serious consequences while working aloft.

ST: Where can people go to get better educated on the equipment they are buying?

TZ: Sherrilltree has done a great job putting the manufacturers' specifications on their website product pages. If you care to read about the device, those links will tell you what you need to know.

ST: Gear inspection is extremely important, but not everyone knows how to inspect their gear. Where should they go to learn how?

TZ: If you definitely want to get to know your PPE, the best resource is going to the manufacturer directly. Teufelberger has done a great job with the Treemagineers talking about inspection criteria, maintenance and retirement. That's awesome! Buckingham is also really good about providing that information. I feel like if you want to educate yourself about PPE the best resource you're going to get is the manufacturer itself.

ST: Where should people NOT go to learn this info?

TZ: Youtube. I think that Youtube is great, but you also need to know your source. The internet is great, but you need to know your source. That goes for everything. When it comes to PPE and life support systems, that is something you do not want to get wrong.

EXCLUSIVE

SENA® // WORK 4 COMMUNICATION SYSTEM

This exclusive SENA WORK4 (Customized SENA SMH10-11 for the arborist industry) communication system comes with a longer length microphone to better accommodate installation into arborist helmets. An extra mic is included so when it needs to be replaced, it is already available to install. Improve safety and efficiency through the Sena WORK4 communications device, a Bluetooth 3.0 stereo headset with long-range Bluetooth intercom communications. This device has changed the way the industry communicates.

HELMET AND EAR MUFFS ARE SOLD SEPARATELY

NEW
SENA® // 33i BLUETOOTH COMMUNICATION SYSTEM

One click of a button instantaneously connects to a virtually limitless amount of 33i users within a mile range via mesh-network technology. With a more stable connection the 33i also intelligently searches for intercom connections when they are lost and automatically reconnects once back in range - without affecting the rest of the group.

- The 33i has thicker wires and more robust housing for the arborist market
- Extended boom mic for proper fitment on arborist helmets (190mm)
- Replacement extended mic included
- Talk Time: Bluetooth/ 13 hours; Mesh/ 8 hours
- Quick charge

SENA® // 50S BLUETOOTH COMMUNICATION SYSTEM WITH MESH INTERCOM 2.0

Mesh 2.0 brings a new level of robust, reliable connections and smart, flexible intercom message routing to the 50S thanks to significant technical enhancements made to the original Sena Mesh Intercom™ algorithm. Sena's 50S units actively share information between each other within the Mesh 2.0 network at an astounding rate. An ingenious system of prompts and responses between the Mesh 2.0 units has resulted in 80% more data being transferred across challenging and harsh conditions. Furthermore, Mesh 2.0 units quickly determine the ideal pathway to efficiently transmit messages from worker to worker.

PROTOS // Integral Arborist Helmet

PROTOS® is the first integral protective helmet of its kind. Over 12 years of development process, aimed at integrating ear, face and neck protection, with a chin strap and rear ventilation between the inner and outer shell. Chin strap, visor, neck protection, ear protection - everything is integrated and modular, making the PROTOS one of the most safe and comfortable helmets for arborists ever.

- Fits perfectly even when working in sloping or overhead positions
- Hearing and face protection are integrated into helmet design
- Ventilation gate allows for cooling air to flow in from all sides
- Wide field of view allows for maximum all-around-visibility
- Neck protection scarf protects the back of the head
- Sporty 2-color combination for increased visibility
- Special damping structure (3-point suspension and shock absorber) of the inner shell
- Certification of the EN 397 and EN 12492 standards, PROTOS offers protection against not only vertical, but also horizontal shocks.
- 5-layer shock absorption by the Crash Absorber. The Crash Absorber makes impact marks visible, thereby indicating the wearer the need to replace the head protection

KASK // SUPER PLASMA //
Work Helmets

Super Plasma work helmets were designed for professional applications. They are lightweight, tough, and uber-comfortable. Every helmet contains ten aluminum-grilled air vents that provide efficient cooling and ventilation while blocking out debris. The rubberized wheel for headband size adjustment is easy to use even while wearing gloves

- High-density ABS plastic outer shell designed to withstand impact
- Meets ANSI Z89.1, CSA Z94.1 and EN 12492
- Inner padding consists of two removeable and washable pieces
- Chin strap with four fasten points to reduce risk of helmet loss from impact (breaking strength more than 50 decanewtons, or 112.4 pounds; CE EN 12492 mountaineering helmet standard)
- Safety release system allows for quick fastening and unfastening
- WARNING - Plasma helmets meet ANSI Z89-1 Type I (top impact), Class C (no electrical protection) standards for industrial head protection
- Weighs 380g (0.84 lbs)

NOTE: KASK helmets sold at Sherrilltree.com are made specifically for the US. KASK helmets sourced from Europe may not meet ANSI standards for impact or have muff brackets and other features found in helmets sold at Sherrilltree.com

ZENITH
Different environments, one helmet.

- Standard ANSI Z89.1-2014 TYPE 1 CLASS E; EN 12492 Shock Absorbing Capacity (clauses 4.2.1.2; 4.2.1.3; 4.2.1.4)
- Quick and easy pressure mount and dismount system of visors and earmuffs
- Up & Down 2.0 technology for a precise and comfortable fit
- Great balance any working condition

KASK // ZENITH // Helmets

A Class E-rated helmet from KASK. Retaining all the comfort of your current beloved KASK, the Zenith features strong nylon removable lamp carrying clips, an "Eco-Leather" chin pad with Eco-Leather chinstrap—both allergenic and washable—and a Sanitized® treatment that acts as an internal deodorant counteracting the development of unpleasant odors.

- High-tech 3D fabric dries fast, helping to wick moisture away
- Innovative Up & Down 2.0 technology ensures a precise and comfortable fit around the back of the head
- Center wheel and two side wings allow quick adjustment of the helmet, width, height and tilt
- Integrated slot for earmuffs with a bayonet attachment
- Zenith helmets meet ANSI Z89-1 Type I (top impact), Class E (electrical shock protection), CSA Z94.1 and EN 12492
- Zenith Air is NOT a class E helmet
- Outer shell - ABS plastic
- Internal shell - HD Polystyrene
- Inner lining - Washable by hand or machine in cold water

PETZL // STRATO // Helmet

The STRATO helmet is very lightweight and comfortable, thanks to its CENTERFIT and FLIP&FIT systems, which guarantee that the helmet fits securely on the head. The adjustable-strength chinstrap makes it ideal for both work at height and on the ground. The unventilated outer shell protects against electrical hazards, molten metal splash and flames. With its potential for integration of a Petzl headlamp, hearing protection, and multiple accessories, it is an entirely modular helmet, thus responding to the specific additional needs of professionals.

- CenterFit adjustment system that keeps your head centered
- FLIP&FIT system allows the headband to be positioned for perfect fit
- External ventilation adjusters on STRATO Vent version
- DUAL chinstrap allows the worker to adjust chinstrap strength in order to adapt the helmet to different environments
- Unventilated outer shell protects against electrical hazards, molten metal splash and flames

TIPS FROM THE CANOPY

WHAT YOU WEAR

Manufacturers have taken to the idea that creating arborist specific clothing is necessary in order to create the best performing and most comfortable products. With this, the clothing options now available are better than ever and provide the user with many possibilities. One area that has seen vast improvements over the years is chainsaw protection. Gone are the heavy and bulky pants. They have been replaced with light weight and ergonomically built pants that are purpose built for the arborist. Even while in the tree, you have options to keep yourself protected. Take the step and make the investment to get you home at the end of the day.

CLOGGER // ZERO GEN II // Chainsaw pants

- Lightweight design, less than 1 kg (2.2 lbs)
- UV protective outer fabric, engineered to lower body temperature by dispersing body heat through breathability and the use of Nilit® Breeze yarn
- 4-way stretch fabric for greater flexibility
- High-tenacity nylon and a ripstop weave for a 1.5x stronger outer shell
- Abrasion resistant fabric over the knee, calf and ankle
- Elasticized waist for a snug fit & extra comfort
- Wide belt loops to fit up to 50mm (2 inch) belt
- Zipper pulls on the pockets to make accessing easy
- Two hip pockets; two thigh pockets, additional pocket on the left thigh
- Large mesh cooling vents on legs
- Lace hooks on cuff
- Slim fit

CLOGGER // ZERO LIGHT AND COOL // CHAINSAW CHAPS

A breath of fresh air in cool chainsaw chap design. Developed to protect not only against chainsaws but to reduce the heat buildup from physical exertion especially in hot environments. Zero chainsaw chaps are lightweight and breathable, adding protection rather than weight and helping you stay cool as the work becomes hot and heavy. Protection is now a breeze. Designed for ground tree crews and landscapers, these cool, lightweight chaps are made to provide a much more comfortable experience in warm conditions.

- UL Certified to ASTM F1897-14 and meets OSHA regulation 1910-266
- Uses Arretex HP advanced chainsaw protection material which is light, cool and quick drying, rated to 3,500 ft/min (750 ft/min above the standard)

TIPS FROM THE CANOPY

ON YOUR FEET

Choosing the correct footwear can mean the difference between a good day in the trees or a painfully uncomfortable day that just doesn't seem to end. These boots were designed with the tree worker in mind, and offer features not commonly found on other boots. Whether you are looking for protective or non-protective footwear, these boots will provide the support and comfort needed while on the job.

CLIPNSTEP	Men's full & half sizes 7-13	\$239 ⁹⁹

All sizes shown are US sizing. However, some of the boots coming from other countries may show the UK or European sizing on their tongues or boxes and tends to cause confusion. So, we've included the chart below, so when you order a US size 8, but the boot says "40/41", you'll know that it's the correct size.

SIZING CHART

US MEN'S	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	11.5	12	12.5	13	13.5	14	14.5	15	15.5	16	17	-

NOTCH // Safety Glasses

Finally, a line of safety glasses a tree worker can call their own. Notch Safety Glasses not only withstand the daily abuse from both climbers and groundies, but do it...with style. Don't be fooled by their good looks; function does not take a backseat to fashion with this eye protection.

- Meets ANSI standards
- Features an 8 to 10 base curve for maximum side coverage
- Tinted lenses offer 99% protection against harmful UV rays
- Superior peripheral vision
- Anti-fog coating
- Mesh glasses have 20 gauge galvanized black wire mesh to protect your eyes and offers excellent visibility. The frames are nylon with a soft PVC nose piece. These mesh glasses are CE EN1731 Certified and meet ANSI Z87.1
- All have Notch's lifetime warranty

BUGZ // STEEL MESH // Safety Glasses

Tired of having your glasses snatched off of your head by twigs or having to look between saw chips and sweat droplets? Bugz have a steel mesh lens that doesn't fog or collect moisture, but circulates air to keep eyes dry and comfortable. Adjustable, elastic strap holds padded goggles safely in place. Do not meet ANSI standards.

ITEM #	PRODUCT	PRICE
15682	Bugz	\$29 ⁹⁹

BOAS® AND SUPERBS® // Safety Glasses

These outstanding glasses are a far cry from the grungy woodshop goggles from junior high! The Boas® and SuperBs® provide great protection, without sacrificing style. The SuperBs® are similar to the Boas® but have an extra flare on the bottom of the lenses. The cool, lightweight polycarbonate frames fit just about everybody, and the wraparound design fits snugly for total optical protection. Both models meet the ANSI requirements and are inexpensive. Boas® and SuperBs® are the safety glasses to own!

CAMELBAK // MILITARY-TACTICAL // Hydration Packs

Hydration is one of the most critical, yet commonly overlooked, aspects of self preservation. CamelBak hydration packs are great for climbers because it lets them stay hydrated throughout the day without having to go up and down, or rely on a groundie to chuck a water bottle 30 ft in the air. Military-grade construction for extra durability.

SILVERBULL PERSONAL ARB TRAUMA KIT

SilverBull worked with Arborist first aid trainers for 2 years identifying the essential first aid items needed for Climbing Arborists or anyone using a chain-saw. A C.A.T. Tourniquet and 6" Israeli Bandage are two potentially life saving items that with the right training, can be used to quickly stop a catastrophic bleed in instances when a regular first aid kit may not be sufficient. The SilverBull P.A.T (Personal Arb Trauma) kit is designed to contain these two essential items and easily attach to a belt or climbing harness. The easy open function and "pull cord" release feature means the system can be easily operated using one hand. The bright orange colour and green First Aid symbol, make the SilverBull P.A.T Kit clearly identifiable by colleagues.

TREE CLIMBER COMPANION BOOK // by Jeff Jepson

This compact field reference and training manual for tree climbers is the ideal partner for all tree workers. Thanks to the illustrative talents of Illinois certified arborist Bryan Kotwika, writer Jeff Jepson is able to provide you, with easy to understand and applicable techniques. This 104 page book includes specific information on several climbing techniques, throwbag use, a variety of knots and hitches, tricks of the trade, use of friction savers, rope care, ascenders and more. Over 200 easy-to-follow illustrations expand comprehension.

KNOTS AT WORK BOOK // by Jeff Jepson

In this 184-page field guide, more than 50 different knots are presented. Both aspects of knot knowledge are given equal time—knot construction (tying the knots) and knot application (using the knots). This information can be quickly grasped, because of the lavishly illustrated pages, easy-to-read text, and unique cross-reference format.

ITEM #	PRODUCT	PRICE
35885	Knots at Work	\$16⁹⁹

TIPS FROM THE CANOPY

GEAR STORAGE

Storage solutions, like other types of products, have evolved and improved. Our gear takes a beating and proper storage is an important piece of the equation when looking to get the longest life out of gear. When looking for proper storage, think about how you want to organize your gear, and how much you want to carry. Storage can easily be overlooked, but proper storage can help extend the life of your gear and keep you organized and more efficient.

NOTCH // PRO ACCESS // Bag

SHERRILLTREE // SIMPLE ROPE // Bag

Of all workers utilizing rope in their profession, few are as rough or reach for rope as frequently as arborists.

- Solid and heavy-duty protection for life-safety ropes and gear
- Fully functional, outdoor-tough solution for ropes and tools

ITEM #	PRODUCT	PRICE
80055	Simple Rope bag	\$22 ⁹⁹

BUCKINGHAM // AMT THROWLINE // Bags

Made of heavy-gauge pack cloth nylon with drawstring closures. On the inside, each has enough room to stack upward of four 200' throwlines, along with four floating rings lining the walls for managing line's end.

- Both models have folded and stitched handles
- Exterior pockets for storing essentials
- Deluxe model has: rigid rim stitched into the top, interior pockets and Velcro tabs on exterior pockets

ITEM #	PRODUCT	SIZE	PRICE
A 30201	Deluxe bag	12" x 12" (dividers not included)	\$79 ⁹⁹
B 30202	Economy bag	9" x 12" (dividers not included)	\$62 ⁹⁹
C 30207	Cloth Divider	12"	\$15 ⁹⁹

BUCKINGHAM // THROW LINE AND ROPE STORAGE // Bags

See-through mesh nylon or solid canvas nylon-constructed line bags. Mesh allows air circulation to dry wet line quickly. The nylon canvas version does a good job of keeping things dry in the first place.

- Holds up to 400' of throwline
- Drawstring closures.

A 28777	Mesh bag	8" x 10"	\$36 ⁹⁹
B 14852	Canvas bag	9" x 7"	\$19 ⁹⁹

NOTCH // PRO FOLDING THROWLINE // Cube

Head to the next level with this top-quality cube designed specifically for throwline organization. Just as effective at dispersing line during the throw as it is at receiving line being retrieved.

- Can be used on the ground or in the tree with equal effectiveness
- Bottom made with a 4-way stretch fabric.
- 2 interior pockets for holding throw weights
- Interior Velcro strap and D-ring for quick line-end recovery
- Made in agreement with Heinrich Haeussler
- Not sold in Germany

ITEM #	PRODUCT	PRICE
32443	17" cube	\$54 ⁹⁹

FTC // MATRIOSAC V3 // Throwline Round Bag

The MATRIOSAC V3 set is composed of two round bags, that fit into each other and compress to a compact size. Two sets for throwing can be stored, i.e. 2 throwlines and 4 throwbags. It is now equipped with a large pocket under the blue bag, for extra gear (cambium saver, throwbags, carabiners etc.).

- Large bag 38 cm, 30 cm high, 750 g, blue
- Bottom pocket for extra gear on large bag
- Small bag 35 cm, 30 cm high, 450 g, orange
- Each bag has two pockets for the throwbags at its bottom
- Inner Velcro strap to hold the throwline end
- Large bag has fabric and solid mesh lid for a perfect ventilation, and a strong zipper
- Two Velcro straps on large bag to hold the set folded together
- Transport strap

ITEM #	PRODUCT	PRICE
41196	FTC Matriosac V3	\$139 ⁹⁹

FALTEIMER // THROWLINE // Cube

The ultimate throwline storage container, evolved by Heinrich Haeussler of Switzerland. This super-charged folding cube has steadily been finding its way into more and more climbers' hands.

- Made of tough canvas nylon and fiberglass frame rods
- Huge 18 inch floor
- Easy to load opening that allows stacking of up to two throwlines neatly without need of dividers
- 2 interior pockets to hold up to 4 throw weights
- Twist the box 3 times to create a portable throwline container that you can carry anywhere without scrambling your lines

ITEM #	PRODUCT	PRICE
39585	18" cube	\$98 ⁹⁹

STEIN // THROWLINE 2.0 // Cube

This large cube makes the deployment of throwlines easy. The corner rod ends are fitted with rubber stoppers to prevent the rods being exposed. The heavy duty full stretch base material increases the strength and is waterproof resistant.

- Two corner web loops to place your feet on when opening
- Two small internal pockets
- Use either the internal ring or Velcro® strap to anchor different lines

ITEM #	PRODUCT	PRICE
40067	17" cube	\$54 ⁹⁹

ROPE CANNON

Fill your rope bag or relocate long lines in just seconds with the Rope Cannon! Also called The Rope Shooting Wheel, this time saving device handles everything from throwline up to 20mm (3/4 inch) diameter ropes.

- Works wet, dry or dirty
- Load ropes midline or from end
- Great for measuring: 1 Crank = 3ft Rope
- Durable ABS Construction

41200	Rope Cannon	\$159 ⁹⁹

JET SLED

This simple yet rugged polyethylene sled is a great answer to organizing a cluttered truck bed or shuttling gear or debris around the job site. Organize chain saws, oil, and gas to keep them safe from spilling or cutting other gear in your truck bed, or isolate ropes and saddles and gear from...well, saws, oil, and gas. Transport light to medium loads across snow or grass, between bushes, through mud, up creeks (floats up to 90 pounds) and more while keeping gear neat and dry. A single Jet Sled weighs only 12 pounds and can be stored about anywhere the chips may fall. Note: Although polyethylene material is extremely tough, excessive dragging of loads across dry, abrasive surfaces will wear out the bottom. Stackable/nesting.

ITEM #	PRODUCT	PRICE
31864	Jet Sled	\$59 ⁹⁹
37090	Jet Sled Wear Bars	\$49 ⁹⁹

SHERRILLTREE // Doctor's Bags

This roomy toolbag's walls are stitched to a hard plastic bottom that repels mud and water. The floor is reinforced with a masonite board, to keep tools from tearing through, while the top has a steel hinged mouth that opens wide when you want in.

- Large side pocket has corrosion-resistant snaps
- Webbed handles are belly stitched around the bag
- Holds approximately three 120' hanks of rope and a variety of tools
- Dimensions: 24" x 18" x 10"
- Made for Sherrilltree by Buckingham MFG.

ITEM #	PRODUCT	PRICE
14855	Canvas	\$132 ⁹⁹
14849	Water-resistant nylon	\$156 ⁹⁹

CUT

TIPS FROM THE CANOPY

Mark Chisholm
on Cutting
*Director of Operations Aspen
Tree Expert Co, Jackson NJ*

ST: What saw fundamentals do you see missing in the industry at large that lead to inefficiencies and risk?

MC: I still see way too many people not wearing proper PPE. I mean, it's 2021, this is getting a bit old for me, watching it go on for so long now. There's really no reason people shouldn't know when to wear proper PPE. On the technique side, I think the number one thing that's lacking is proper chainsaw care. Sharpening is really important. People think that if the saw's cutting then it's okay, but when you get good at cutting, you realize how important a sharp chain is. It's a safety risk when you operate a saw that's not running as well as it should, or if, God forbid, the parts aren't on properly. You can't call yourself a top professional unless you're going to take care of your tools and fix them when needed.

ST: What techniques do you use to be more productive while cutting aloft?

MC: I'm a big fan of precision cutting, meaning: get really accurate with your face cuts, learn how your back cuts react in different trees, and work with that, learn from it, and put it to good use later. A lot of people who are not that confident with a saw while up in a tree will use rigging as a backup, when you don't really need to rig the pieces down. I've been on countless job sites where someone is telling me I'll have to rig everything down, and I won't rig anything down. I'll just directionally fell every part of the tree, and send the parts of the tree in different directions. They will be like, "I really thought we'd have to rope that." It just hammers home that when you get really good with your cutting techniques you can be more effective.

ST: What techniques do you use to avoid pinching your saw while cutting branches or while cutting spar wood during a crane removal?

MC: Horizontal pieces- The real trick to not pinching your saw on a horizontal is twofold. One: if you pre plan which end of your branch is tensioned more than the other when you grab it with the crane, that will tell you what the part you're cutting is going to do. Secondly, I watch the cut, not the piece, especially when I'm cutting a larger size piece. I watch what the kerf is doing, whether opening or closing, then adjust for it- if that means cutting from the other side, or cabling up or down, whatever it needs to have a nice, smooth release.

ST: What about on spar wood?

MC: It's similar. If you pre plan where you're going to put your slings, you can predict what's going to happen. For example, instead of putting the slings at 3 o'clock and 9 o'clock, you can put them closer to 4 and 8, and you'll know that you'll have a little bit of tilt as the piece is coming up. Another technique that I use a lot is what I call a sawdust cut, which a lot of people know. Basically, bore into the center and do a circular cut all the way around with the top of the bar. That's a favorite of mine, especially on big logs down low.

TIPS FROM THE CANOPY

ANSI Z133-2017 8.3.5

Pole tools used in proximity to energized conductors shall be constructed with fiberglass-reinforced plastic (FRP) or wooden poles meeting the requirements of OSHA 1910.269(r)(1)(iv)

ANSI Z133-2017 8.3.3

Pole pruners and pole saws, when hung, shall be securely positioned to prevent dislodgment. Pole pruners or pole saws shall not be hung on electrical conductors or left in a tree unattended. Pole saws and pole pruners shall be hung so that sharp edges are away from the arborist and shall be removed when the arborist leaves the tree.

WARNING!

All polesaws not for use around energized lines!

NEW!
NOTCH // KIRU //
Aluminum Polesaw

The Kiru is Notch's ultra light model. It extends to 13ft and built with rigid aluminum, locking cam collar locks with rib lock protection. Improved abrasion resistance and low profile grip for enhanced control and ergonomics during pruning. The Kiru comes with a quick connect Silky Ibuki 390mm (15.4") blade, so no tools needed out of the box.

PROFESSIONAL GRADE PRUNER SETS

Convertible-Head Combo - The cutter head is affixed to an adapter that quickly connects to or disconnects from the female end of our pruner poles without the need for tools. If the pole is somehow destroyed the head will convert to another.

NOTCH MARVIN // PRUNER

This lightweight bypass pruner has a cast aluminum base and all steel hardware that makes it a favorite among the climbing crowd. Cuts up to 1.25 in.

JAMESON // PRUNER

Forged steel construction for added strength. Enhanced spring provides smooth cutting action and a raised leading edge on hook eliminates frictional drag. Cuts up to 1.25 in.

NOTCH MARVIN // BULL PRUNER

This new release from Marvin is merely an upsized version of the most dependable and trusted limb pruner on the market. Cuts up to 1.75 in.

CORONA // BULL PRUNER

This heaviest in our pole lopper line produces significant cutting power by utilizing a long lever arm and compound rope action to cut branches up to 1.5 in.

NOTCH / MARVIN PRUNERS ARE DESIGNED TO MAKE YOUR JOB EASY.

The powerful blades cut limbs up to 1 1/4" in diameter with ease. Yet, they're surprisingly lightweight - a complete cutting head weighs only 1 lb. 12 oz. and the slim design lets you reach areas that are inaccessible with more bulky pruners. The high-grade steel cutting blade allows you to resharpen several times, extending the life of your pruner.

NOTCH MARVIN
MAKING CUTTING EASY SINCE 1943

- Lightweight aluminum arm is topped with their biggest cutting head and thickest trigger rod to provide extra cutting power
- Hard-chrome plated blades keep a sharp edge longer and resist rust and corrosion
- Swivel the pruner head in any direction without moving the handgrip
- Cutting diameter is about 3/4 of an inch

B 28763	Fixed 9ft, 1.8 lbs	\$164 ⁹⁹

SILKY // ZÜBAT PROFESSIONAL SERIES // 13" Blade

The ZÜBAT PRO is the same ZÜBAT you know and love, but with a new, modified handle and scabbard, designed to keep the saw locked into the scabbard. No more fallen saws when climbing!

This heavy duty, professional curved saw has a 330mm long blade, suitable for cutting large branches.

Unfortunately, the new scabbard only locks with the new handle, which means you won't get a lock if you put an old ZÜBAT into a new scabbard, or vice versa.

ITEM #	PRODUCT	PRICE
LG 270-33	Zubat Pro-Large Teeth	\$79 ⁹⁹
271-33	330mm Large Teeth replacement blade	\$54 ⁹⁹
FINE 278-33	Zubat Pro-Fine Teeth	\$79 ⁹⁹

270-60	Zubat Pro replacement scabbard	\$39 ⁹⁹
270-41	"Old" Zubat replacement scabbard	\$34 ⁹⁹

SILKY // ZÜBAT ARBORIST PROFESSIONAL SERIES // 13" Blade

The ZÜBAT ARBORIST edition features the same, awesome handle as the ZÜBAT PRO, but sports a 13-inch ZÜBAT blade with extra-large teeth, giving you the saw you need when you're battling bigger branches.

In addition to the new blade, the ZÜBAT ARBORIST also has a new scabbard design that features a 3-roller system that helps guide the saw into the scabbard, preventing premature wear on the scabbard.

- Saw w/330mm X-LARGE TEETH blade & scabbard (.60 lb)
- Cuts approximately 15% faster than standard Zubat

ITEM #	PRODUCT	PRICE
XLG 722-33	Zubat Arborist Pro	\$84 ⁹⁹
723-33	330mm XL Teeth replacement blade	\$64 ⁹⁹

SILKY // ZÜBAT 390 PROFESSIONAL SERIES // 15" Blade

The ZÜBAT 390 is the larger version of the ZüBAT from Silky, arguably one of the best handsaws a tree person has ever gripped. The ZÜBAT 390 has the classic ZÜBAT handle, with its seemingly perfect contour and soft rubber. And you get a larger blade, like you'd find on the IBUKI or SUGOI saws, except the ZÜBAT blade features large teeth.

ITEM #	PRODUCT	PRICE
LG 270-39	Zubat 390	\$99 ⁹⁹
271-39	330mm replacement blade	\$69 ⁹⁹

SILKY // GUNFIGHTER PROFESSIONAL

The ingenious design of the GunFighter's progressive teeth makes for easier starts to each stroke, while still taking advantage of larger, faster cutting Silky teeth. So, the job gets done quicker and you are left with more time and energy for other tasks.

- Electroless Nickel Plating provides superior wear and rust resistance for improved cutting performance and extended blade life
- Progressive Non-Set Tooth Pattern; 7.2 tpi near handle to 5.1 tpi at tip
- Unique patented dual roller locking mechanism keeps blade securely in the scabbard

SILKY // SUGOI PROFESSIONAL SERIES 330 (13" blade) 360 (14.2" blade) 420 (16.5" blade)

Suitable for pruning large branches at any height, the Silky Sugoi professional arborist saw has razor-sharp and ultra-fast cutting teeth designed for efficient chip removal. The large, curved blade performs incredibly well through even the biggest branches—enough so that climbers will find it the best excuse yet to leave powered saws on the ground. Like most Silky handsaws, the Sugoi's beefy blade extends throughout the SureGrip handle for extra rigidity. Nicknamed the TREE TIGER by Silky fans, the Sugoi (Japanese for incredible) comes with a unique, high-visibility plastic scabbard that can be attached to the belt or leg (leg straps included).

- Progressive teeth
- Electroless Nickel Plating
- Patented locking interface secures saw in scabbard
- Leg strap slots closer together for more comfortable fit
- Larger discharge slot at bottom to allow saw dust to fall out

SILKY // TSURUGI PROFESSIONAL SERIES

The skinny saw with big-saw cutting, and surgical precision. The Tsurugi is one of the lightest, and best balanced saws on the market today, having no handle screws, nuts or extraneous hardware. Originally designed to fit tight crotches without damaging opposing limbs, users quickly discovered that the Tsurugi not only filled that niche, but also performs tremendously for all hand-saw pruning.

The curved Tsurugi is every bit the same as the straight, but with different length blades and a much more aggressive blade.

- 2-part rubber grip is held together by an ingenious integration with the blade tang
- Aluminum scabbard is a safe and sturdy home for your saw. Six rollers protecting the entryway and provide a secure locking interface.
- Scabbard can be attached to the belt or leg (leg straps sold separately)

SILKY // STRAIGHT TSURUGI PROFESSIONAL

- 200 (7.87" blade, 15.95" overall length)
- 300 (11.81" blade, 19.95" overall length)
- 400 (15.75" blade, 23.43" overall length)

SILKY // CURVED TSURUGI PROFESSIONAL

- 210 (8.3" blade, 16.38" overall length)
- 270 (10.6" blade, 18.74" overall length)
- 330 (13" blade, 20.68" overall length)
- 375 (14.8" blade, 22.48" overall length)

REPLACEMENT SCABBARDS ARE AVAILABLE, BUT WITH 6 ROLLERS PROTECTING THE SCABBARD ENTRYWAY, YOU PROBABLY WON'T NEED ONE FOR A LONG TIME.

SILKY // SUGOWAZA 420 PROFESSIONAL SERIES (16.5" blade)

This fantastic twist on Silky's popular limb-eating tiger (the Sugoi) was developed after a request for a slip guard that helps protect users from accidental blade contact. Comes with a hard plastic scabbard that is often mounted inside the bucket.

ITEM #	PRODUCT	PRICE
420	419-42 Saw w/ 420mm blade & scabbard	\$109 ⁹⁹
	420-42 420mm replacement blade	\$79 ⁹⁹

SILKY // IBUKI 390 PROFESSIONAL SERIES (15.4" blade)

In the Silky family, Ibuki is big daddy. Japanese for "big axe," Ibuki has the second longest blade of the pistol grip saws. Ibuki is finished with a comfortable, sure-grip handle and the scabbard has both ring and strap attachments that can be used on the left or right side.

ITEM #	PRODUCT	PRICE
390	275-39 Saw w/ 390mm blade & scabbard	\$109 ⁹⁹

SILKY // NATA DOUBLE EDGE HATCHET 240 (9.5" blade)

Don't bring a handsaw to a hatchet fight! Get the cleaving power of 13 inches of precisely honed, high-carbon steel in your corner. The NATA 240mm, double-edge hatchet by Silky is the perfect complement to your arsenal of handsaws and chainsaws.

ITEM #	PRODUCT	PRICE
555-24	NATA Hatchet	\$109 ⁹⁹

SILKY // LEG STRAP

Attach your Silky saw scabbard to your leg. Sold by the pair, these 1.6" wide, 24" long leg straps work for the following saws, though we recommend only using them for 360mm saws and smaller:

- ZUBAT 240-390
- SUGOI 360 & 420
- IBUKI 390
- SUGOWAZA 420
- TSURUGI 200/300/400
- NATANOKO 330
- TSURUGI CURVE 210/270/330

SILKY // KATANABOY PROFESSIONAL SERIES
500 (19.7" blade) 650 (25.6" blade) 1000 (39.4" blade)

Translated into English, Katana means the curved, single-edge sword used by Samurai. In tree talk, we simply say "man-powered chain saw." This beefy, two-handed folding saw is currently the biggest in its class. And with its nonslip, rubberized grip and taper-ground, impulse-hardened blade, you'll make mincemeat out of any firewood-sized limb that says differently. Carrying case included.

LG FINE
SILKY // GOMTARO PROSENTEI 300 PROFESSIONAL SERIES // (11.8" blade)

An innovative dual-purpose saw with both fine and coarse teeth on one blade. Fine teeth (14 teeth/30mm) at the tip of this 300mm blade leave a smooth finish to smaller cuts while coarser teeth (8/30mm) along the base of the blade cut larger branches faster. A round blade tip prevents accidental damage to trees and shrubs. The Prosenitei is lightweight and easy to grip – good reasons to not leave it behind.

ITEM #	PRODUCT	PRICE

CORONA // SUPER-DUTY // Bypass Lopper

- 3" diameter cutting capacity with 37" overall length
- Forged Radial Arc™ bypass blade
- Resharpenable, fully heat-treated Coronium™ steel alloy blade
- Eyelet for neck-strap attachment
- Precision-machined self-aligning pivot bolt
- Heavy-duty spring-loaded bumper
- Tapered hardwood handles

ITEM #	PRODUCT	PRICE
16115	Bypass Lopper	\$144 ⁹⁹

FELCO // F5 // Standard Pruners

This is the lowest priced Felco pruner available. With solid steel handles and replaceable blades (special order), this stripped down pruner is great for the crew who loses everything yet needs longevity of gear. No cushion stop, sap groove or wire-cutting notch.

- Length 9 in., weight 11 ounces
- Recommended cutting capacity is 1"

ITEM #	PRODUCT	PRICE
25073	F5-shears	\$29 ⁹⁹

ARS // HICKOK // Lopper

This powerful lopper features a unique blade that cuts with less effort and a deep hook to prevent the limb from slipping while cutting. Heat treated and tempered edge stays sharper longer. The poly bumper is a great shock absorber and extremely durable. The ultra-light yet tough alloy-steel construction provides great strength with less weight.

ITEM #	PRODUCT	PRICE
31569	Hickok Loppers	\$119 ⁹⁹

ARS // ECONOMY // Pruners

- High carbon steel blades that stay sharp longer
- Rust-resisting, hard chrome-plated replaceable blades
- Sap-clearance groove

ITEM #	PRODUCT	PRICE
31564	8" shears	\$27 ⁹⁹

FORESTER EDGE // ALL-IN-ONE SHARPENER

The Golden Rule of pruning tools is "keep 'em sharp!" The all-in-one sharpener is the answer to the Golden Rule of pruning tools. Ergonomic, sturdy, and able to sharpen just about anything.

Hand pruners, loppers, pole clips, mower blades, scissors, chipper knives ... you name it. If it has a smooth cutting edge in need of periodic honing, then the all-in-one sharpener has you covered.

ITEM #	PRODUCT	PRICE
36311	All in one sharpener	\$19 ⁹⁹

A) HUSQVARNA // FELLING WEDGES

A "must-have" when felling trees. Wedges help the tree fall in the direction of the notch cut by actually lifting the tree in that direction. Used to prevent the tree from pinching the saw (or leaning back on the saw) while making a backcut. Also can be used for bucking trees already on the ground. Made of high impact ABS plastic.

ITEM #	PRODUCT	PRICE
35668	8" Wedge	\$11 ⁹⁹
35669	10" Wedge	\$11 ⁹⁹
35670	12" Wedge	\$12 ⁹⁹

B) NOTCH // TEXTURED FELLING WEDGES

A core piece of equipment for any feller, these high impact ABS plastic felling Notch wedges are double tapered and feature a textured surface on both sides. The texture helps keep the wedge from backing out or sliding. Notch wedges also feature an Easy-Head grip, as well as color coded heads for sizing. Notch wedges have ruler indicators on their sides.

ITEM #	PRODUCT	PRICE
40077	5.5" Wedge	\$8 ⁹⁹
40078	8" Wedge	\$9 ⁹⁹
40079	10" Wedge	\$10 ⁹⁹

C) FELLING WEDGES

Acrylonitrile butadiene styrene (ABS) wedges for maximum strength and resistance to mushrooming when driven with your maul (unlike the cheap wedges found elsewhere).

ITEM #	PRODUCT	PRICE
WEDGE-5.5	5.5" Wedge	\$8 ⁹⁹
WEDGE-8	8" Wedge	\$9 ⁹⁹
WEDGE-10	10" Wedge	\$10 ⁹⁹

D) NOTCH // POCKET WEDGE

Small and designed to be whacked into the cut with nothing but the palm of your hand, this mini wedge keeps the cut open as your razor-sharp saw slices through. Keep it in a pouch, pocket or clipped to your saddle—it's lightweight and unobtrusive, but highly effective. The Pocket Wedge measures a mere 3" x 1.5".

ITEM #	PRODUCT	PRICE
35211	Pocket Wedge	\$7 ⁹⁹

E) NOTCH // CLIMBER'S BEST FRIEND // Wedge

The sturdy but tiny Climber's Best Friend is perfect for jamming into a narrow kerf to alleviate saw pinching wherever you are. Simply tie a line between your harness and your wedge and you'll never lose it from a tree. The large hole in the CBF also allows you stow your wedge on almost any carabiner or tool carrier. The Climber's Best Friend measures 3.5" x 2".

ITEM #	PRODUCT	PRICE
39904	Climbers Best Friend	\$7 ⁹⁹

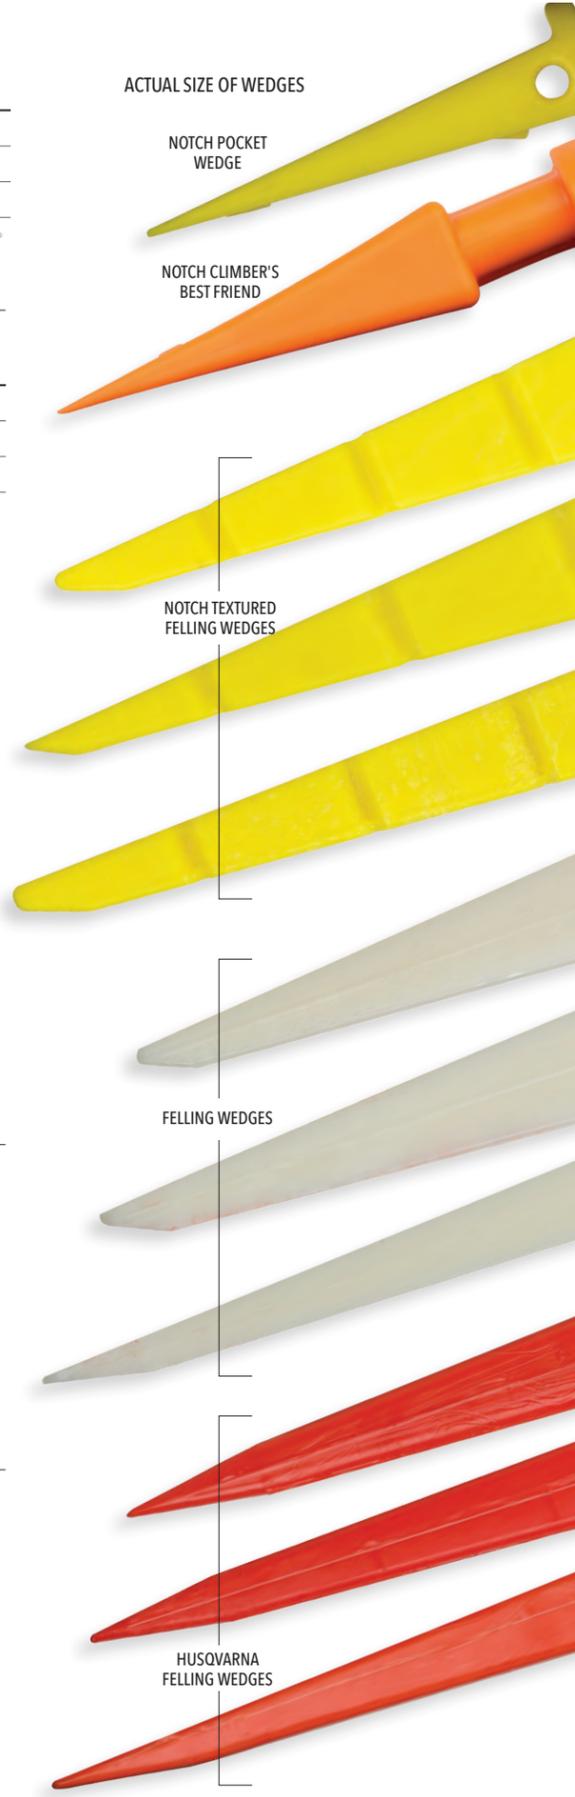

WEDGE AND TOOL HOLDER

This light nylon pouch can hold up to three of the same or various sized wedges within easy reach of all your chain-saw tasks. Separate side pouches hold file, srench, and other tools.

ITEM #	PRODUCT	PRICE
32090	Tool holder	\$19 ⁹⁹

ROCK EXOTICA // ENFORCER LOAD CELL

The Enforcer load cell now allows everyday tree guys and gals to put numbers behind what we do to our equipment, our bodies, and our trees.

Take the guesswork out of your mechanical advantage system. Graphically demonstrate to your new climbers the havoc they can wreak with mismanaged ropes and poor lowering.

The applications for training and/or ascertaining proper loading of all types of rope systems are vast. With Bluetooth connectivity, multiple options for accumulating and saving data, the ability to record and download graphs of dynamics as they happen, and a maximum rating of 20 kN, the Enforcer load cell will help you understand the forces generated while climbing and rigging—in new and eye-opening ways.

- Durable construction
- Swivel attachment points diminish potentially dangerous torsional and off-axis forces
- Monitor forces wirelessly on your iPhone with built-in Bluetooth connectivity via Enforcer app sold separately
- Measures force in kilograms, pounds force and kilonewtons
- Includes case at no extra charge

ITEM #	PRODUCT	PRICE
35899	Load Cell	\$875 ⁰⁰

NOTCH // DAY LASER POINTER

Notch's green laser provides the brightest spectrum visible to the human eye and is able to be seen in full daylight.

- Maximum output: <5mW
- International customers: Import laws vary by country, so please check your local laws to ensure the Day Pointer Laser is legal in your country

ITEM #	PRODUCT	PRICE
50016	Laser Pointer	\$44 ⁹⁹

DOUBLE SIDED DIAMETER MEASURING TAPE

Whether you're measuring for diameter at breast height or length of log for the lumber mill, Sherrilltree has the double-sided (straight and diameter) tape for you.

ITEM #	PRODUCT	PRICE
A 30016	35 ft wind-up style	\$59 ⁹⁹
B 30015	50 ft recoil type	\$54 ⁹⁹
C 29526	12 ft recoil-type	\$19 ⁹⁹

REECOIL // FULL REACH // Chainsaw Lanyards

If you have ever had your saw lanyard snatch up on brush and you move through a tree, you can understand the design principles. Make a lanyard too long and it snags. Make it too short and...well, you get the idea.

To further enhance this bit of gear wizardry, the REE-COIL is designed to position a hang carabiner as close to the saw as possible, so your saw won't swing like a cheesy lawn ornament from your harness.

- 27.5" relaxed / 86.5" stretched

ITEM #	PRODUCT	PRICE
40478	Heavy duty rear handle chainsaws	\$54 ⁹⁹
39498	Top handle chainsaws (green)	\$49 ⁹⁹

NOTCH // MODULAR // Chainsaw Lanyards

This simple but ingenious two-piece chainsaw lanyard design features a pair of redundant snaps to allow for easy installation and removal of your chosen chainsaw. Leave the lanyard girth-hitched on your harness and a loop hitched on each of your saws and you can swap out saws quickly and easily.

- 60" extended length / 38" contracted
- Sewn in steel ring to hang your saw on your harness
- Breaks at 500 lbs

ITEM #	PRODUCT	PRICE
52002	Lanyard and 2 clips	\$30 ⁹⁹

TEUFELBERGER // ANTI-SHOCK // Chainsaw Lanyards

The antiSHOCK lanyard is designed to keep your saw close and secure for use. However, should you miscalculate, it will start to absorb shock at 2–2.2 kN. This overload will be reduced to 1.5–1.8 kN, easing the burden on your body, climbing system, and potential targets on the ground.

After 70 cm the lanyard will tear away, releasing the saw to the ground. Not the ideal situation, but better than you coming down with it!

ITEM #	PRODUCT	PRICE
36318	antiSHOCK -no hardware (not shown)	\$44 ⁹⁹
35653	antiSHOCK -with ring	\$51 ⁹⁹
35652	antiSHOCK -with carabiner	\$67 ⁹⁹

WEAVER // BUNGEE WEBBING // Chainsaw Lanyards

Similar in function to a nylon non-elastic strap this 2-in-1 strap stretches freely when you're reaching with the saw and retracts neatly when hanging close to your side.

ITEM #	PRODUCT	PRICE
33593	with ring	\$18 ⁹⁹
33594	no ring (not shown)	\$16 ⁹⁹
33592	with snap (not shown)	\$19 ⁹⁹

BUCKINGHAM // BREAKAWAY BUNGEE // Chainsaw Lanyards

However unlikely it is to occur, the thought of a tethered chain saw being snatched from the hands of a climber, perhaps not fully secured to his work position, is enough to compel anyone to use this popular lanyard. Having a tear-away feature designed to activate at 200 lbs. of force, the chances are high that the saw will depart alone — however it is not guaranteed.

ITEM #	PRODUCT	PRICE
34118	2 snaps / 30.5" to 55"	\$42 ⁹⁹
34120	2 snaps, 1 ring / 30" to 54"	\$42 ⁹⁹
34119	1 snap, 2 rings / 30" to 54"	\$36 ⁹⁹
15278	2 rings / 28" to 50"	\$31 ⁹⁹

SHERRILLTREE // 2-N-1 // Chainsaw Lanyards

This very popular saw strap design allows the user to tether their chain saw short for storage and quick access, or long for security while in use.

ITEM #	PRODUCT	PRICE

OREGON // 91VXL SAW CHAIN (3/8" LOW PROFILE) VERSACUT // Chainsaw Chain

Oregon® 91VXL is the most popular chain for small saws. 91VXL is a professional chain with an advanced grind geometry, which significantly improves out-of-box sharpness for high-production cutters. Oregon® 91VXL is used on saws using Stihl® 63PM chains and Husqvarna® H35 chains. 91VG is an ANSI certified low-kickback chain. Both 91VG and 91VXL are 3/8" pitch low profile, .050" gauge chains.

Fits the following Chain Saw Models.

Echo® CS340, CS341, CS3000, CS3400 and many others.

Husqvarna® 23, 34, 35, 36, 37 41, 136, 137, 141, 142, 243, 334T, 335XPT, 338XPT
Stihl® 017, 018, 018C, 019, 019T, 020, 020T, 021, 023, MS 170, MS180C, MS191T, MS192T, MS200T

NOTE: OREGON RECOMMENDS USING A 5/32" FILE FOR 91VX AND 91VG CHAIN.

PFERD // CHAIN SHARP CS-X // Chainsaw Chain Sharpener

Pferd, a longstanding name in the "keep-it-sharp-or-go-home" world of production tree care, has improved an already excellent chain-sharpening system.

Simply insert the correct size file, lay the CS-X on the bar, and go to work. The tooth is sharpened and the depth gage is lowered precisely at the same time! Done with the left side? Just flip the file and go to work on the right. No switchover is necessary as with older systems.

Hand sharpening is economical and easier on the chain. Pferd now makes quick, precise sharpening a standard in the field, shop, or wherever—when ever necessary.

ITEM #	PRODUCT	PRICE

CHECK OUT OUR NEW TESTING PORTAL & ONLINE LEARNING PLATFORM!

- Easy to access!
- Faster test results!
- Real-time resources!

All on one platform.

brightspace[™]
by D2L

Now offering online testing for previously purchased EHAP and Tree Care Academy programs.

Electrical Hazard Awareness Program (EHAP) is our first program to migrate entirely to the digital platform.

TCIA is working hard to create the most impactful learning environment possible. We chose the Brightspace platform because it is the most robust and engaging one we could find that matched our standards and the high level of quality that you expect from us.

We hope to offer five courses by the end of 2021. With more to come!

Join us in the latest adventure to advance your skills and professionalism with our new online learning environment!

Scan this code to go directly to our online testing portal!

The pathway to full eLearning integration...

ONLINE TESTING PORTAL IS OPEN!

Enrollees can register their legacy purchases of all Tree Care Academy and EHAP manuals/enrollments to facilitate real-time testing and certificates.

ELECTRICAL HAZARD AWARENESS PROGRAM

EHAP will be available in the eLearning format in its entirety for new enrollments including all support materials.

TRANSITION TO DIGITAL TESTING

No more paper and snail mail! Increase your accessibility and the speed of the results. Including downloadable certificates!

FIRST FIVE TREE CARE ACADEMY MODULES

Will be revamped and ready for the complete eLearning experience! This includes the full course of study, support materials, online testing and certificates.

FULL INTEGRATION

With companies and their employees to have complete access to all TCIA training programs and to manage their progress within the platform.

TREE CARE INDUSTRY ASSOCIATION | TCIA.ORG/TESTING
CREENTIALING@TCIA.ORG | 800.733.2622

BUCKINGHAM // 6FT DECELERATION LANYARD

The deceleration pad is made of overlapped flat nylon, stitched with nylon thread and sewn into a protective breakaway jacket. When an accidental fall occurs, the action of the breaking threads cushion the stop, without the extreme jolt of rope alone.

- After use in a life-saving situation, this lanyard should be properly disposed
- 6' long / 5,000 lb. tensile
- End with the shock-patch is what you attach to the dorsal ring

ITEM #	PRODUCT	PRICE
14838	Deceleration Lanyard	\$82 ⁹⁹

AERIAL BOOM STRAP W/ RING

This belt fits round or square aerial lift booms with a cinch down, friction buckle. The belt has a no-slip liner and a moveable D-ring (5,000 lb. tensile) that can be positioned in the most appropriate spot.

ITEM #	PRODUCT	PRICE
14844	Aerial Boom Strap	\$62 ⁹⁹

KLEIN // FALL ARREST HARNESS

This harness has a single D-ring on the back, which can be easily adjusted for proper fit and function. Leg straps feature tongue buckles with large grommets, for easy adjustment and secure buckle connection. Intended for fall arrest.

ITEM #	PRODUCT	PRICE
22080	Fall Arrest Harness	\$119 ⁹⁹

JAMESON // ADJUSTABLE CHAINSAW SCABBARD

This high-impact plastic scabbard keeps saws safely resting in your aerial bucket between uses. Hooks over the rim of your lift basket with slide-adjust design.

- Overall length is 32"
- Chamber opening is 6" x 2 3/4"

ITEM #	PRODUCT	PRICE
14828	Chainsaw Scabbard	\$244 ⁹⁹

JAMESON // FIBERGLASS CHAINSAW SCABBARD

Jameson's Fiberglass Chainsaw Scabbard offers safe, convenient storage for your saw. Designed with an adjustable attachment width, Jameson's Chainsaw Scabbards are also water repellent, UV resistant, and are designed to withstand extreme weather conditions.

The scabbard features a plastic insert to the chainsaw slot to protect the scabbard from chainsaw heat and blades.

ITEM #	PRODUCT	PRICE
35276	Fiberglass w/ liner	\$499 ⁹⁹
35277	Replacement liner	\$104 ⁹⁹

NOTCH // CHAINSAW SCABBARD

- Constructed from heavy duty UHMPE plastic
- Universal fit for buckets with or without liner
- Water repellent & UV resistant
- Withstand extreme weather conditions
- Resists cracking, will not splinter or fracture
- Replaceable front pocket
- Bottom opening for chip and water drainage
- Stainless steel hardware
- Patent pending
- Outside mount kit for mounting to outside of bucket. Sold separately

ITEM #	PRODUCT	PRICE

- Fits Greenlee Fairmont, Stanley, ADI, and Reliable Equipment

ITEM #	PRODUCT	PRICE
29597	Tool head holder	\$249 ⁹⁹

ESTEX // AERIAL TOOL BUCKET

This bucket has pockets on each side for tools. Reinforced masonite bottom holds up to abuse. Made of #4 natural canvas duck cotton. Polymer bucket hooks included.

- Dimensions: 16"L x 6"W x 10"D

ITEM #	PRODUCT	PRICE
14827	Tool bucket w/ hooks	\$89 ⁹⁹
14836	Polymer hook	\$12 ⁹⁹

STERLING // BUCKET EVACUATION KIT

Aerial lifts are wonderful tools. But unlike escalators when they break down or otherwise malfunction, they do not turn into steps. Sorry for the inconvenience!

The Bucket Evacuation Kit by Sterling Rope is made for such sad circumstances. Even well-maintained buckets have bad days. Should the need arise—and it is safe and smart to do so—an aerial-lift operator can deploy the 75 feet of TVAC Technora cordage. Secure it to a life-support attachment point, on the lift and the operator's harness, then rappel with the F3 descent control device. The F3 is the little brother to the famous F4 device. The double-action lever has a "panic grab" feature and allows a hands-free exit of the bucket. No muss, no fuss ... just getting off the broken bus.

Plan for the best, keep your aerial-lift maintenance and operating protocol safe and up to date, but prepare for the unexpected. Put a Sterling Evacuation Kit in every lift.

ITEM #	PRODUCT	PRICE
41153	Bucket Evacuation kit	\$324 ⁹⁹

ESEX // BASKET COVERS

Keep your aerial bucket clean and dry with our water-proof nylon covers. May not cover controls on all brands.

- Deluxe cover - Stitched-in, rigid foam pad, adds support to keep water from pooling
- Standard Cover (not shown) - Made of coated canvas nylon with elastic edge for a tight fit

ALTURNAMATS // GROUND PROTECTION MATS // For Stumpers, Chippers, Aerial Lifts

AlturnaMATS minimize costs resulting from heavy vehicles moving over rough terrain or manicured lawns en route to work destinations. The heavy-duty, half-inch-thick, 100 percent polyethylene mats support 60 tons of equipment, such as trucks, chippers, or stump grinders.

- Thick cleats on both sides are designed to eliminate slippage
- AlturnaMATS provide years of safe use and gets you to and from the worksite without tearing up landscaping
- Shipped by motor freight only.
- Two colors: Black and Clear*

*The mats are called "clear", although they look white. The clear moniker refers not to their color, but to the fact that they allow sunlight to get through.

SAFETYZONE TREE SIGNS

Durability, strength, and reliability that surpass any other folding sign available. SafeZone signs are portable, heavy-duty, and built to last. Fold up the flag and mounting stand and store it in just over one cubic foot of space. The strong steel base folds out flat, for maximum traction in the worst wind and weather. Not the cheapest version of signage available but certainly one of the most professional, and, in many cases, a required tool for municipal jobs. Weight 22 lbs, 45 second set-up time.

NOTCH // TRI-GUARD®

This heavy-duty durable debris containment barrier is a great solution for controlling debris when grinding stumps, doing air-spade work, or any other debris generating tasks.

- Three-panel system made of rigid powder-coated .88 inch steel frame
- Added stability control for windy conditions
- Heavy-duty nylon reinforced coarse mesh featuring an extended fabric apron
- Rods are contained inside water resistant fabric pockets; no snaps or Velcro
- Panel connectors can be easily disconnected for expansion with additional panels
- Rounded connectors allow panels to adjust individually to variable surface levels
- Minimizes cleanup time following stump removals
- Minimizes risk of flying debris
- Heavy-duty construction
- Adjusts to uneven surface levels
- Expandable with additional panels
- Each panel 40.5" w X 45.5" h, total weight 45 lbs.
- One time assembly required

LOG MOVING TOOLS

- A) PEAVEY** - Unique design with lightweight 4-foot handle rolls logs easily.
- B) PEAVEY** - Pointed tip for use as a pick between logs in icy conditions, or wherever the situation calls for it.
- C) TIMBER CARRIER** - The tongs accept logs from 3" to 16" diameter. Swivel head allows two-man passage through narrow spaces with difficult limbs. 5' ash handle.
- D) LOG LIFT** - Holds logs up to 12" in diameter, keeping hands free for chainsaw work.
- E) CANT HOOK** - Designed to roll and maneuver logs by spiking hook into log and using blunt foot to leverage against gravity. 4.5' long ash handle is strong, yet lightweight.
- F&G) CANT HOOK** - Heavy-duty without the "heavy".
- H) COMBO FELLING BAR** - 31" forged steel bar with sliding cant hook combines three tools into one: a pry-bar to break loose difficult stumps, a cant hook for rolling heavy logs, and a felling spotter to help guide your fall.
- I) PICK-A-ROON** (with Hickory Wood Handle) - Quickly pick logs and wood out of the back of your truck without having to climb in. 36" handle. Wt. 3 lbs.
- J) PICK-A-ROON** (with Aluminum Handle)

STALPEN // TREE JACK

The Stalpen Tree Jack can be used to support leaning trees in an emergency, help fell significant-sized timber in a preferred direction, or dissuade fall-back when creating a proper hinge.

This heavy-duty, two-part bar spins apart in the middle for portability and back together quickly for rapid deployment.

It's incredibly strong and can be used for so many more things than just pushing over trees.

ITEM #	PRODUCT	PRICE
33779	Tree Jack	\$1,399 ⁹⁹

HUSQVARNA // TIMBER TONGS

This tool is a back and hand saver when it comes to pulling or moving small logs and brush. Keep your hand and wrist in the ideal position—the tongs do the grabbing. Position yourself in the most advantageous position, or just protect your hands from the nastiness you are often required to pick up and move! The Husqvarna timber tongs truly embody the spirit of ergonomics—making the job fit the worker not the worker fit the job.

ITEM #	PRODUCT	PRICE
35713	Timber tongs	\$54 ⁹⁹

BAC SKIDDING TONGS

Made with 1.1" diameter HD steel, these tongs also feature 360° swivel teeth, and a swivel hook, making it easier to latch on to, and move logs.

ITEM #	PRODUCT	PRICE
33597	Tongs	\$109 ⁹⁹

BAC HEAVY DUTY BRUSH GRUBBER

Strong jaws, with 8 non-slip teeth per pad, opens wide to handle heavier brush up to 4" in diameter. Made with heavy-duty 3/4" steel. Pads rotate 360°.

ITEM #	PRODUCT	PRICE
33598	Brush Grubber	\$109 ⁹⁹

SKIDDING CONE

The skidding cone will prevent logs from being stopped by roots, stumps or residual trees. It also protects your valuable trees along the skid path from being damaged. Made of high-performance polymer plastic, the skidding cone is strong, yet flexible. Its 51 cm (20") opening allows you to haul large logs or bunches of smaller logs or brush. Use it year round, down to temperatures of -30°C (-22°F). Some people even use it to pull a big game simply by inserting its head in it! Fits over logs and branch bundles up to 20" diameter to prevent jamming. 26.5-inches long.

ITEM #	PRODUCT	PRICE
32349	Skidding cone	\$144 ⁹⁹

STEIN // ARBOR TROLLEY

A multi-functional handling system designed to take the hard work out of transporting brush and logs. The Arbor-Trolley is capable of carrying up to 500kg in weight and can transport the equivalent of five plus man-loads of loose brush in one. At only 75cm wide it is perfect for transporting material from back gardens with narrow access with ease.

- Reduces manual handling

ITEM #	PRODUCT	PRICE
39978	Stein Arbor Trolley	\$649 ⁹⁹

PCW-5000 PORTABLE WINCH

The most portable gas-powered winch around! Simply anchor the Portable Winch to a tree, truck, or other solid anchor and wrap any length of low stretch 3/8" to 1/2" arborist grade line to its capstan drum to realize up to 5,000 pounds of dependable pulling power!

- The 50-cc (2.5 hp), 4-cycle Honda engine powers a 3-stage 110:1 ratio gearbox that turns its capstan drum to about 40 feet per minute
- About 2,500 pounds of pulling force on single line
- By adding a single pulley onto the targeted load and doubling the winch line an operator can produce the stated 5,000 pounds of pull at 20 feet per minute
- Any length line can be used because nothing is accumulated on the capstan drum
- When load is applied (by drawing tension on the line), the motorized device rises up and inline with anchor and load until you release tension to the line
- 1/2" Rigging line recommended
- 6' anchor sling included
- Weighs 43 lbs

ITEM #	PRODUCT	PRICE
32344	Portable Winch	\$1,549 ⁹⁹

CAPSTAN / ANCHOR SIDE VIEW

CAPSTAN / LINE EXIT SIDE VIEW

NOTCH // HERCULES // Winch Line

Notch Hercules is an extremely high strength, steel cable replacement made from solution dyed HMPE fibers. This gives Hercules very little stretch, and a light weight. Hercules is also neutrally buoyant in water. It is lighter and safer to handle with bare hands than steel cable.

- For portable winches and winches on: chippers, work trucks, SUV's, digger derricks, ATVs, tractors and more.

SAMSON // AMSTEEL BLUE // Winch Line

Use super-strong Samson Amsteel® Blue winch line as replacement for virtually any style or size of powered winch. Replace worn out steel wire cables with Amsteel® and experience a much more worker friendly material with no loss of strength!

- For portable winches and winches on: chippers, work trucks, SUV's, digger derricks, ATVs, tractors and more.
- Stronger than wire yet floats on water
- Low elongation, low stretch, reduced recoil
- Non-rotational (unlike twisted cable)
- Easily field spliced
- Will not abrade like wire to expose sharp edges
- Torque free

Stump Grinding professionals have been choosing Greenteeth for over 20 years. Manufactured in the USA, our innovative products reduce the time and money spent on each stump.

GREENTEETH // THREADED GRINDER // 700, 900 & 1100 series

The 700 Series Tooth from Green Manufacturing were designed for use with stump cutters from 18 - 44hp. The 900 Series Tooth were designed for use with stump cutters from 50 - 90hp. The 1100 Series Tooth works best with stump cutters running at 66hp or higher. All of these teeth feature 3 cutting edges and its carbide face can be resharpened at least once.

ITEM #	PRODUCT	PRICE
12571	700 Greentooth	\$9 ⁹⁹
12572	700 Redtooth	\$10 ⁹⁹
12575	900 Greentooth	\$11 ⁹⁹

10890	1100 Greentooth	\$13 ⁹⁹
10891	1100 Redtooth	\$13 ⁹⁹

GREENTEETH // WEARSHARP // 700, 900 & 1100 series

The Wearsharp™ tooth by Greenteeth features a design that allows the tooth to wear to a new edge while cutting. This will increase the lifespan and durability of each tooth. These new teeth will utilize the pockets of their corresponding series.

ITEM #	PRODUCT	PRICE
18519	700 Wearsharp tooth	\$9 ⁹⁹
24320	700 WS Extra Nut	99c
18803	900 Wearsharp (shown)	\$12 ⁹⁹
40959	900 WS 2 Sided shank	\$10 ⁹⁹

12952	1100 Threaded Reverse	\$11 ⁹⁹

STUMPGRINDER // GREEN WHEELS

Green Wheels for sharpening carbide tipped stump grinder teeth. Always wear dust mask and eye protection during use. Carbide dust inhalation may be hazardous to your health. 6in dia. x 3/4in wide

ITEM #	PRODUCT	PRICE
16403	6" dia. x 3/4" wide	\$29 ⁹⁹
16404	6" dia. x 1" wide	\$29 ⁹⁹
16405	8" dia. x 1" wide	\$39 ⁹⁹

GREENTEETH // QUADWHEEL WHEEL

Why grind when you can cut? The Quadwheel was designed to do just that - transform your Stump Grinder into a Stump Cutter. CNC machined, and balanced, the Quadwheel is not only durable, but also dependable.

The high performance Quadwheel® has about a 15" gap between the sets of teeth, giving you a faster sweep speed. With only 4 Holders & 12 Teeth, the Quadwheel® offers maximum cutting power.

CHOOSE YOUR WHEEL, ONLINE AT SHERRILLTREE.COM, BASED OFF OF YOUR MACHINE (ONLY SELECT MACHINES CURRENTLY AVAILABLE).

**COBRA // DYNAMIC
NON-INVASIVE //**
Tree Cable Systems

Think back for a moment to the first time you "really paid attention" to a mature tree flailing in strong, gusting wind. Were you not shocked at the amount of movement and how all parts were acting independently to discharge the force? This is why Cobra was designed, not simply to hold two parts of a tree together on a calm sunny day, but to keep those parts from reaching their failure point when whipped and twisted by Mother Nature.

The dynamic, low-tension support of Cobra systems is designed to work with the tree's natural and growing defenses, unlike certain static installations that have no "give" and become a crutch.

- Adheres to ANSI A300 standard, CE certified
- UV-protected, adjustable
- Shock-absorbing
- Invented by arborists, designed by aero-engineers
- Simple to install, easy to learn
- Non-metallic, nonconductive, non-reflective
- Lightweight (average system under 8 lb)
- Consistent tensile strength throughout—no weak links!
- Requires no drilling of healthy wood

Each case of Cobra comes with the following items:

- Cobra rope
- Anti-abrasion hose
- Expansion inserts
- Shock absorbers
- End caps (color coded to the year)
- See charts on this page for the specific list of Cobra items in each case.

SAMSON // (DYNAMIC) TREESAVE® // Cabling

TreeSave® is produced exclusively for Sherrilltree by Samson Rope Manufacturing for customers in search of a dynamic system compatible with invasive or non-invasive anchorage. This product was conceived for the American market based on similar European systems but with a few unique twists. TreeSave® has a built-in dampening core which can be spliced into J-lags and eye bolts. By replacing static steel cable with TreeSave®, both the anchor hardware and the tree receive significantly reduced shock-loading impact during wind events, extending the life and holding power of drill-installed hardware. TreeSave® is also available with non-invasive slings (eye-to-eye style) for those jobs with trees that are known to have poor compartmentalization of wounds.

With TreeSave® you simply feed the rope through the eyebolt or sling eye, and then splice the rope back into itself over a common heavy-duty steel thimble.

NOTCH // DRYAD // Synthetic Cabling

Dryad is a hollow braid polyester rope that takes the place of steel cabling, offering much lighter weight, quicker installation, and adjustability. In addition to gaining those advantages, Dryad is also very strong, long-lasting, and UV resistant.

Once installed, Dryad will almost undetectable from the ground, with its dark color combination of black, brown and olive. Dryad is easy to splice. It requires no heavy cable cutters, pliers, or even gloves.

- Available in 3/8, 1/2, and 3/4 inch diameters, on 300' reels.
- High strength dynamic cabling
- 24 Strand hollow braid polyester rope without a core
- Flatness of rope keeps it from biting into a tree
- Easy to splice
- Superb knot holding ability
- Lighter and easier to use than steel support lines
- Abrasion resistant
- Low stretch

DRYD34	3/4"	300'	10,200 lbs	\$249 ⁹⁹

STEEL CABLING

Seven-strand, left-hand lay, corrosion-resistant, utility-grade steel cable has long been the staple of tree cabling in the US. Steel cabling is performed within tree canopies as a method of securing tree parts to one another as supplemental support to resist ice loads and wind forces, yet can provide no guarantee to save, hold together or especially reverse defective growing trends for the tree.

Common-grade cable is malleable so that it can be spliced by hand (self-wrapped around a thimble) while extra-high-strength cable (EHS) is stronger but significantly stiffer and cannot be hand-spliced. EHS is required when utilizing Rigguy wire stops. For all such connections, it is imperative that a heavy-duty thimble is used in all eye splices to reduce the chance of abrasion failure.

For anchoring cable ends, we recommend eye bolts installed completely through the target branch with a washer under the nut.

We encourage arborists to closely examine the long-term goals the customer anticipates for any cable installation and learn more about dynamic options. In other words, are customers informed that artificial restraint requires periodic inspection (as described by the ANSI A300 Annex C "Supplemental Support Systems Inspection Process")?

PREFORMED LINE PRODUCTS // WEDGE GRIP

The Wedge Grip uses tension and a mechanical wedge to grip 7-strand guy wire. The Wedge Grip is made of steel instead of aluminum, and mechanically, the Wedge Grip user does not have to splay the wires apart to install but rather lays the unaltered wire in the wedge's channel, then the wedge is pulled into a cone-shaped steel cylinder that is said to deliver 100% of the wire's rated tensile strength. A screw-on cap initiates pressure to keep the wire from slipping between loads. The Wedge Grip consists of four parts: the outer cylinder and cap, plus two halves of the wedge. The wedges come in four different sizes depending on cable diameter, while the outer cylinder and cap come in one size only.

- Uses tension and a mechanical wedge to grip 7-strand guy wire
- Screw-on cap initiates pressure to keep the wire from slipping between loads
- Wedges come in four different sizes

ARBORJET // QUICK-JET AIR KIT™

Simply Productive. Arborjet's new QUIK-jet Air™ is the best weapon in the war against tree insects and diseases. Its innovative design combines the simplicity of the popular QUIK-jet™ and power of the VIPER Air Hydraulic systems to create a lightweight, easy-to-use injection tool that maximizes productivity and reduces labor time.

Switch it On. The QUIK-jet Air features one-thumb switch operation, precise dose measuring, and air-powered injection in a rugged aluminum body weighing less than two pounds. You'll notice the difference when you make the switch and use QUIK-jet Air™.

- PRECISE - Precise dose measuring you can see
- EASY - One-finger operation for fast injections
- FAST - Injections are faster & smoother than ever
- AIR-POWERED - Quick-connect adapter hooks up to air tank for increased productivity
- LIGHT WEIGHT - Durable aluminum body weighs less than 2 pounds

QUIK-AIR	QUIK-jet Air kit™	\$2,179 ⁰⁰

ARBORplugs sold separately. See below.

- SET INCLUDES
- 1 QUIK-JET AIR DEVICE
 - 1 LITER SUPPLY BOTTLE
 - 1 AIR TANK
 - 1 CARRYING BAG WITH SHOULDER STRAP
 - 1 ARBORPLUG SETTER
 - 2 DRILL BITS (3/8" & 9/32")
 - 1 NEEDLE CLEANOUT TOOL
 - 1 GRADUATED CYLINDER
 - 1 PAIR OF SAFETY GLASSES
 - 1 FUNNEL
 - 1/2 LITER OF CLEAN-JET
 - 1 TRAINING MANUAL
 - 1 LOW PRESSURE REGULATOR WITH COIL
 - 2 VIPER NEEDLES
 - 1 ALLEN WRENCH - 5/64"

ARBORJET // QUIK-JET KIT

The QUIK-jet Kit was designed for the tree care professional. Using the fast and effective QUIK-jet injector device, this kit includes a protective storage bag for ready access to tools, and all the ancillary tools and accessories for production injection.

- 1 QUIK-JET DEVICE
- 1 LITER MEDICATION SUPPLY BOTTLE
- 1 PROTECTIVE STORAGE BAG
- 1 BELT HOOK
- 1 BELT CLIP
- 1 ARBORPLUG SETTER
- 2 DRILL BITS
- 1 NEEDLE CLEANOUT TOOL
- 1 GRADUATED CYLINDER
- 1 PAIR OF SAFETY GLASSES
- 1 STORAGE BUCKET
- 1 FUNNEL
- 1/2 LITER OF CLEAN-JET
- 1 TRAINING MANUAL

ARBORJET // ARBORPLUGS pack of 100

The Arborplug is a technological advancement in trunk injection and a required component of the Arborjet injection methodology.

ITEM #	PRODUCT	PRICE
APLUG-SM	Arborplugs for small to medium trees	\$48 ⁹⁹
APLUG-ML	Arborplugs for medium to large trees	\$48 ⁹⁹

ARBORplugs not included with kits. Must purchase separately.

ARBORJET // FSERIES F-18 KITS

Arborjet's FSeries Micro-infusion™ system was developed to effectively deliver high volumes of injectable product into the sapwood of any type of tree. It enables the applicator to precisely deliver an accurate, measured dose of insecticide, fertilizer or fungicide into the xylem tissue in a safe and environmentally friendly way. The FSeries can utilize either VIPER or STINGER micro-infusion interface technology.

- First ever 120 PSI injection system
- Lightweight and easy turn valves allow for total control
- Hex PDS Technology distributes product evenly to parallel injection lines
- 1.5L or 650mL - Choose the right bottle for your tree
- Quickly add product without removing cap
- Maximize output with 6 lines, or use 12 with the built-in expansion system

VISIT SHERRILLTREE.COM FOR COMPLETE DETAILS

ARBORJET // IMA-JET // Insecticide

IMA-jet is a systemic insecticide used to control a variety of insect pests of ornamental or forest trees. Pests controlled include aphids, whiteflies, soft scales, adelgids, gall forming wasps, leafhoppers, lace bugs, mealybugs, psyllids, serpentine leafminers, sawflies, thrips and leaf feeding beetles.

Use IMA-jet as directed in trees in residential, business and commercial areas, golf courses, airports, cemeteries, parks and athletic fields, to name a few.

For optimum results, apply IMA-jet prior to infestation. Also apply when insects are infesting and feeding upon the tree. IMA-jet insecticide moves upward into the tree's canopy from the application sites.

ITEM #	PRODUCT	PRICE
IMA-E	IMA-Jet 1 liter	\$298 ⁹⁹
IMA-C	IMA-Jet 1 case (8 liters)*	\$2,199 ⁹⁹

NEW!
ARBORJET // SHORTSTOP 2SC // Plant Growth Regulator

Shortstop 2SC is a systemic plant growth regulator that slows above ground vegetative growth in trees and shrubs.

Effective for: Slowing growth, reducing pruning frequency, reducing drought stress, reducing construction damage, enhancing fine root hair growth, and increase overall appearance.

ITEM #	PRODUCT	PRICE
51502	Shortstop 2SC 1/2 gallon	\$399 ⁹⁹
51503	Shortstop 2SC case (4- 1 gal jugs)	\$1,596 ⁰⁰

ARBORJET // PROPIZOL // Fungicide

Propizol is a trunk or flare root injected systemic fungicide for control of Oak wilt and Dutch Elm Disease in trees. Now also labeled for foliar sprays, this systemic broad-spectrum fungicide controls anthracnose, powdery mildew, rust, leaf spot, and many other fungi in grasses, shrubs, and flowers in all growing zones.

ITEM #	PRODUCT	PRICE
36186	Propizol - 1 liter	\$69 ⁹⁹

ARBORJET // ARBOR-OTC // Antibiotic

Arbor-OTC is a systemic water soluble injectable antibiotic for the control of certain bacterial diseases in non-food bearing palms (including Lethal Yellowing, Texas Phoenix Palm Decline, and Fire Blight). It can also be used for the control of certain bacterial diseases in non-food bearing trees (including Bacterial Leaf Scorch).

ITEM #	PRODUCT	PRICE

PHC® FOR TREES // Fertilizers

- Water-dispersible chemical and biological fertility product
- Meet trees' nutrient needs quickly, while the beneficial microbes sustain fertility over the long term
- Applied with soil injection equipment or by soil drench
- Less abrasive to injection equipment, requires less tank agitation, and provides both short-term and long-term continuous replenishment of mineral nutrients in the soil

11-22-22SRN (SLOW-RELEASE NITROGEN)

FALL FERTILIZER: a low Nitrogen and high Phosphorus and Potassium content make this fertilizer perfect for the fall, when the trees aren't producing leaves but need to boost their root systems for the winter. This fertilizer contains a complete micronutrient package, a microbe-based renewable biofertilizer system, and a proprietary soil surfactant. Slow Release Nitrogen formula keeps nutrients available for longer, maximizing tree health and lengthening times between treatments. Each box contains five 8lb packs, each pack mixes with 100 gallons of water and treats 1,250 square feet.

ITEM #	PRODUCT	PRICE
35803	11-22-22SRN - 40lb bag (5- 8lb packs)	\$199 ⁹⁹

RHIZOFUEL // Fertilizer

Rhizofuel from Rootgrow, Inc. is a biological soil amendment that can transform virtually any soil into a fertile forest floor!

Rhizofuel is an all-in-one bio-stimulant, beneficial bacteria, fungi and mycorrhizal package for healthy, long lasting trees and shrubs.

Professionals have been using Rhizofuel for years, for better root strength and improved soil structure. Rhizofuel is the soil amendment that you can't afford to be without!

ITEM #	PRODUCT	PRICE
35230	Rhizofuel- 0.5lb bag	\$44 ⁹⁹
35231	Rhizofuel- 0.5 lb bags (case of 5 bags)	\$209 ⁹⁹

PHC® BIOPAK® PLUS // Fertilizer

BioPak Plus is a dry, water-soluble micronutrient treatment that includes beneficial rhizosphere bacteria and 3-0-20 N-P-K fertilizer. BioPak Plus can be applied Spring, Summer Fall.

- Promotes a plant's recovery from stress.
- Reverses mineral deficiencies that cause chlorosis and necrosis.
- Improves root function without stimulating excessive top growth.
- Provides soluble nutrients in acidic, neutral and alkaline soils.

ITEM #	PRODUCT	PRICE
13124	1 box= 5- 1lb packs	\$74 ⁹⁹

ROOTS TREE SAVER // Fertilizer

Roots Tree Saver is specifically designed to reduce transplant stress while improving soil hydration and fertility. It's applied to the root zone of trees and shrubs at planting. Five species of mycorrhizal fungi and six species of beneficial bacteria are packed into this formula to improve plant nutrition and provide sustainable soil fertility. *PRODUCT SHIPS IN 5 GALLON BULK CONTAINER*

ITEM #	PRODUCT	PRICE

MAUGET // DINOIDE // Insecticide

Dinocide®, the first Microinjection containing dinotefuran an insecticide widely used on forest, woodland and ornamental trees and shrubs and known for its speed of action. By delivering dinotefuran using Mauget's patented micro-infusion system, it can yield results in as little as three days. This is faster than typical dinotefuran administration and far faster than the action of most systemically applied insecticides.

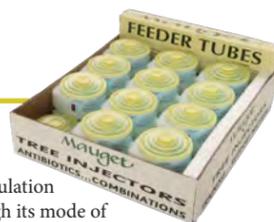

Injections with Dinocide® are very effective at controlling scale insects, a class of pests that harm trees and shrubs by sucking plant juices from tree leaves, twigs or bark. Dinotefuran has an excellent track record of effectiveness against all types of **scale insects, lacebugs, leafhoppers, psyllids, thrips, whiteflies** as well as **other insects**. See product label for specific insects controlled.

ITEM #	PRODUCT	PRICE
MADI-2ml	Dinocide- 2ml - 24 capsules	\$129⁹⁹
MADI-3ml	Dinocide- 3ml - 24 capsules	\$144⁹⁹
MADI-4ml	Dinocide- 4ml - 24 capsules	\$189⁹⁹

MAUGET // ARBORFOS // Fungicide

ArborFos™, a 46% phosphite formulation in a completely enclosed micro-infusion system, is a fungicide that inhibits fungal growth through stimulation of the plant's own natural defense systems. Although its mode of action is not completely understood, researchers indicate it may elicit a type of systemic acquired resistance response. While it imparts no actual phosphorous nutrition, trees tend to develop healthier leaves, roots and stems. ArborFos is for use on conifer, ornamental, forest and certain crop trees for diseases such as sudden oak death (*P. ramorum*), and has recently shown excellent results in sycamore anthracnose management programs.

ITEM #	PRODUCT	PRICE
MAAF-5ml	Arborfos - 5ml - 24 capsules	\$99⁹⁹
MAAF-7.5ml	Arborfos - 7.5ml - 24 capsules	\$109⁹⁹

MAUGET // IMISOL // Insecticide and Fungicide

IMISOL is an exclusively developed combination insect and disease microinjection tree care treatment that combines Mauget's patented Fungisol (decarb) Fungicide, with Mauget's Imicide (Imidacloprid) Insecticide. This simple to apply unique micro-injection tree care treatment controls both diseases and insects with one simple, easy to apply microinjection application, saving both time and expense.

ITEM #	PRODUCT	PRICE
10520	Imisol- 4ml - 24 capsules	\$109⁹⁹

MAUGET // IMICIDE // Insecticide

Mauget's broad product line of tree injection insecticides are specific for tree injection treatments that control many of the most destructive insects feeding on trees. Mauget's formulated tree injection insecticides go to work immediately to eliminate insects that can destroy trees and plants in the safest and most effective manner.

ITEM #	PRODUCT	PRICE
MAII-2ml	Imicide - 2ml - 24 capsules	\$114⁹⁹
MAII-3ml	Imicide - 3ml - 24 capsules	\$139⁹⁹
MAII-4ml	Imicide - 4ml - 24 capsules	\$164⁹⁹

MAUGET // STEMIX PLUS // Fertilizer

Mauget's tree injection fertilizers containing agricultural minerals have been developed specifically for Mauget tree injected micro-injection and micro-infusion treatments.

MAUGET // FUNGISOL // Fungicide

Mauget Chemists have been developing fungicides specifically for tree injection health care since 1958 and have had a patent issued for Fungisol which continues to be one of Mauget's most requested products.

ITEM #	PRODUCT	PRICE
MAFF-4ml	Fungisol - 4ml - 24 capsules	\$144⁹⁹
MAFF-6ml	Fungisol - 6ml - 24 capsules	\$169⁹⁹

DAVEY // ARBOR GREEN PRO 30-10-7 // Fertilizer

A complete fertilizer, Arbor Green PRO 30-10-7 contains high-quality nitrogen, phosphorus and potassium formulated from ureaform and monopotassium phosphate, plus polyamino acid. It releases these nutrients, including synthesized organic nitrogen fortified with polyamino acids throughout the growing season. A slower, controlled release rate leads to uniform growth, a lower risk of leaching and greater efficiency of nutrient absorption. Check to see if Arbor Green PRO is available for sale in your state at Sherrilltree.com. *Not available in Alaska, Hawaii or Canada.*

ITEM #	PRODUCT	PRICE
31948	Arbor Green Pro-30lb bag	\$74⁹⁹

**Additional shipping/handling charges may apply*

SAFARI // 20SG SYSTEMIC // Insecticide

Safari is a dinotefuran-based super-systemic insecticide that distributes quickly throughout the tree's vascular system, making the tree's tissues poisonous to most pests for up to 1 year.

- Best insecticide to use for bark spray application
- Highly effective against numerous pests of ornamental trees including **scale (armored and soft), Emerald Ash Borer, Hemlock Woolly Adelgid, Whitefly, thrips, Japanese Beetles and many more**
- Bark spraying takes less than 2 minutes to treat most trees
- Bark spraying is non-invasive; does not wound trees
- Rapid control- effective control in 1-3 weeks for most pests
- Can also be applied as a foliar spray, a broadcast spray, a soil drench, soil injection and via chemigation

ITEM #	PRODUCT	PRICE
35876	Safari- 12oz	\$159⁹⁹

GROWTH PRODUCTS // AUTUMN CARE // Fertilizer

AUTUMN CARE (6-12-12) with 40% SRN (5 gal). Fall to early winter. Application: trees, ornamentals, and vines.

- 2.5 gallon of product per 150 gallons of water = mix.
- Apply 5 gallons of mixture per inch of trunk diameter

SOUTHERN AG // DIPEL PRO DF // Biological Insecticide (OMRI listed)

DiPel is the most widely used biological insecticide in the world, delivering excellent control for several types of pests. This Bacillus-based OMRI listed insecticide is registered for use on a variety of ornamentals, and delivers outstanding control of more than 30 species of insects, including tent caterpillar and various bagworms, looper, tobacco budworms and armyworms. Its dry flowable formulation is dust free and easy to measure and mix. DiPel PRO DF is biodegradable and has minimal effect on humans, non-target animals or the environment. Studies have shown beneficial organisms such as earthworms, ladybugs, birds, snakes and honeybees are not affected by DiPel.

DiPel DF is listed by the Organic Materials Review Institute (OMRI) for use in organic production.

ITEM #	PRODUCT	PRICE
35879	DiPel Pro DR- 1lb bag	\$22⁹⁹

QUEST // RELIANT // Fungicide

Reliant works in three ways:

1. It's a Fungicide: Kills pathogens on contact, in the soil and on the plant.
2. It's a Nutrient: Potassium builds plant health.
3. It's a Stimulant: Increases the plant's production of Phytoalexin antibodies that stimulates the plant's immune system against disease.

Reliant is a systemic fungicide which has both xylem and phloem mobility, in that it will move throughout all parts of plants. It will move from plant roots into the newly emerging shoots and conversely from new shoots into the root system. Reliant is absorbed by all plant tissue regardless of where or how it is applied and is directly fungistatic, in that it slows the growth of the disease pathogen and inhibits the formation of new spores by the pathogen.

TREE TECH™ // MICROINJECTION
Emergency Care

The Tree Tech™ microinjection unit is a single-dose, manually-pressurized device for administering directly into the vascular system of trees and woody shrubs.

Injection is very simple. Upon professional evaluation that an application is favored, the administrator determines the number of micro units based on the caliper of the plant to be treated. A 11/64" diameter by 1/2" deep hole is drilled at a 45° angle and the canister injected. Uptake is immediate in most cases.

- After you use an injector, you can send it back to Tree-Tech to be recycled
- Tree Tech Instructions available at Sherrilltree.com
- All Tree Tech formulas are sold in packs of 25

TREE TECH // SYSTREX™ // Fungicide w/ Nutrient

A systemic fungicide, containing Bayleton®, as well as a fertilizer solution. Systrex™ controls powdery mildew, leaf blight/spot, and tip blight, but has been particularly effective in treating conifers and hardwoods suffering from the effects of construction or naturally occurring damage. Not available for shipment to Canada. One every 3" of stem circumference.

ITEM #	PRODUCT	PRICE
20467	Systrex -25 pack	\$159 ⁹⁹

TREE TECH // DENDREX™ // Insecticide

Widely used insecticide for control of aphid, bagworm, birch leaf miner, tent cat, gypsy moth, pine moth, root weevil adults, scales, sawflies, beetles, and others. Each Dendrex™ unit contains 1.5 grams of acephate insecticide. Not available for shipment to Canada. One every 6" of stem circumference. (For beetles apply One every 4" as beetles appear.)

ITEM #	PRODUCT	PRICE
19271	Dendrex-25 pack	\$129 ⁹⁹

TREE TECH // VIVID II™ // Insecticide

A new biorational insecticidal compound for non-crop trees. Controls elm leaf and engraver beetles, scales, mites, aphids, adelgids, and more. Not available for shipment to Canada. One every 6" of stem circumference.

ITEM #	PRODUCT	PRICE
18976	Vivid II -25 pack	\$149 ⁹⁹

TREE TECH // MERIT™ // Imidacloprid Insecticide

Merit Injectable contains more active ingredient than other trunk injection products (17.1 percent) and comes in 3 or 6 milliliter, easy-to-use, leakproof units. Kills common pests as well as tough-to-control insects such as Asian long-horned beetles, emerald ash borers, and hemlock woolly adelgids. Not available for shipment to Canada.

ITEM #	PRODUCT	PRICE
31923	Merit 3ml -25 pack	\$129 ⁹⁹
31924	Merit 6ml -25 pack	\$169 ⁹⁹

TREE TECH // SNIPPER™ // Deflowering agent

Inject during flower bloom to abort seed production on sweetgum, black walnut and locust, cherry, crabapple, hickory, persimmon, plum, ginkgo, oak, and others. Not available for shipment to Canada. One every 4" of stem circumference.

ITEM #	PRODUCT	PRICE
25888	Snipper-25 pack	\$159 ⁹⁹

TREE TECH // NUTRI-JECT™ IRON ZINC // Fertilizer

For macronutrient and micronutrient application in trees and woody ornamental plants. Nutri-Ject 8-8-7 also contains 1.00% Zinc, 1.00% Iron, and .10% Copper. Not available for shipment to Canada. One every 6" of stem circumference.

TREE GUYING CABLE

Tree Guying Cable is a revolutionary new material for staking and guying trees. It is safe, easy to use and less expensive than traditional tree ties. The soft polypropylene materials have an exclusive weave that ensures a rounded edge at all times to help prevent the material from girdling young trees. The 900 lb. tensile strength provides substantial strength for most ball & burlap sized trees. Tree Guying Cable fastens to any stake or anchoring system with traditional knots or nails.

ITEM #	PRODUCT	PRICE
22068	Cable - 250'	\$39 ⁹⁹
22083	Cable - 500'	\$74 ⁹⁹

DUCKBILL® EARTH ANCHORS

Discover the most reliable way to anchor trees and many other objects. Simply drive the Duckbill Anchor into the ground with a drive rod, remove the rod from the ground, and set the anchor for stay-fast holding power in most soils.

AIR-SPADE® 2000 EXCAVATION TOOL

- Rapid excavation of wet or dry soil around roots in minutes
- Lightweight, fiberglass gun delivers remarkable results without risk of harming trees and utilities, yet clears great volumes of material with minimal effort
- Requires an air compressor (not included) rated at 175 or 185 CFM (minimum)
- Aeration and vertical mulching
- Root collar excavation
- Radial trenching
- Locating utilities
- Reducing soil compaction

ITEM #	PRODUCT	PRICE
28752	AIR-SPADE® 2000 Excavation tool	\$1,399 ⁹⁹
32294	Handle repair kit	\$59 ⁹⁹

HANDLE REPAIR KIT (SOLD SEPARATELY)
Includes: 1 Valve stem, 1 Valve seal, 1 spring, 2 valve caps, 2 casting grips, 1 trigger sleeve, 1 Pressure gage, 1.25 oz container of O-ring lube, and one lanyard and safety clip.

AIR-SPADE® KIT // EXCAVATION TOOL

- Includes: AIR-SPADE® 2000 Excavation Tool, 45° adapter, 10' X 1" hose and storage case
- 45 degree adapter is used to change the direction of the air flow so that the operator can work around objects without having to get into an uncomfortable position
 - 10' hose is extremely lightweight, up to 75% lighter than standard air compressor hoses, and attaches to the tool at one end and the air compressor hose at the other. The operator throws it over his shoulder, which makes it easier to use the tool for long periods of time without becoming fatigued
 - Storage case keeps the tool safe and clean and reduces the chance of losing parts

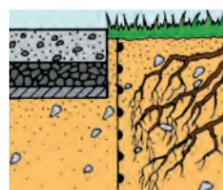

ITEM #	PRODUCT	PRICE

DEEP ROOT® // Tree Root Barrier

- Designed to prevent tree roots from damaging surrounding hardscapes and landscapes
- Used for either surround or linear applications with trees that will reach as much as 18" trunk caliper at maturity
- Commonly used in conjunction with curb and gutter, parkways and other street tree applications
- Integrated zipper joining system that provides instant assembly, without a joiner strip
- Has a 90° rib to direct roots down and out allowing for full root growth
- Anti-lift ground locks prevent the barriers from being lifted by root growth

SHERRILLTREE GUARANTEES AND POLICIES

ORDERING // Orders placed by 2:00PM Eastern Time/Pacific Time will ship the same business day. Orders placed after 2PM, or on weekends/holidays, will be processed the next business day. Special order, vendor drop shipped, SENA installs and spliced items are not guaranteed to ship same-day. Unfortunately, we cannot ship all parcels to a Post Office (P.O.) box.

ORDER TRACKING & COMMUNICATION // When you provide Sherrilltree with a valid email address during the check-out process (web or phone), we will send you a series of emails keeping you informed on the status of your order - order confirmation, shipment tracking information, backordered item(s) status, customer satisfaction surveys, etc.

SHERRILLTREE'S FREE SHIPPING OFFER* // Orders over \$99 receive Free Ground Service to the contiguous 48 states. Orders which include oversized/overweight items, drop ship orders, and special order items may incur a shipping surcharge.

HEAVY WEIGHT / OVERSIZED ITEMS //

Heavy and Oversized products like poles/polesaws, cabling, fertilizer, rope reels, PHC liquids, log carts, etc. will incur a shipping surcharge. Exact shipping cost will be determined when the weight is totaled and calculated against your shipping location. International shipments will be calculated taking into account the final destination, weight and dimensions of your order.

CREDIT CARD ORDERS // We accept Visa, MasterCard, American Express, or Discover for online and phone orders. In the event of a declined credit card, we will call you as soon as possible. We cannot hold declined credit card orders for more than two days.

SPECIAL ORDERS // Orders for non-stocked items (special orders) will incur a special handling fee of \$10.00 (USD), plus freight and payment in advance. NON-STOCKED ORDERS ARE NON-RETURNABLE AND NON-REFUNDABLE. There are NO exceptions.

PRICES OR PRODUCT CHANGES // Prices, order policies, and product specifications are subject to change without notice at any time. Web & Catalog prices are not guaranteed to match at any given time. Sherrilltree will not be held responsible for any inadvertent errors in print or online.

SHOP FOR THE BEST TREE GEAR ON THE PLANET!

THE SHERRILLTREE 150% PRICE MATCH GUARANTEE //

If you find a lower competitor price online or in print on an item with the same MPN (Manufacturer's Part Number), just call one of our Customer Service Team members and give them the details. We will give you 150% of the price difference! For example, if we are selling an item for \$200 and you find it elsewhere for \$180, your price with Sherrilltree will be \$170 (the difference which is \$20 + 50% of that difference which equals \$10, for a total of \$30 OFF our original price). Price matching is not applicable on Special Order items and it applies only to USA-based Arborist Supply retailers with a proprietary online presence. We reserve the right to not honor competitor's short-term promotional pricing or email promotions. We will not price match online marketplaces and auction-based websites (Amazon, eBay, Walmart.com, etc.).

FERTILIZER / PESTICIDES / PHC //

These products can only be shipped into states in which Sherrilltree is legally licensed to sell them. Pesticides shipped to California and Minnesota may be subject to additional state taxes. Sherrilltree is not able to ship fertilizers/pesticides outside the USA.

SPLICED GOODS // Spliced goods manufactured by Sherrilltree / Rope Logic have a measurement tolerance range of + or - 5% for stock spliced products and for custom spliced products. For custom items you will be required to provide specific details and sign-off on your order before it can be made and shipped to you.

SALES TAX // Sales tax is applied to orders delivered to states that charge sales tax. By law sales tax will be included on all items and on any applicable freight costs. State and Federal tax laws are subject to change without notice.

CHANGES TO ORDERS //

Additions or changes to your original order must be made within one hour of order placement between 8am - 6pm ET Monday-Friday. Please contact Customer Service at 800-525-8873 in order to make any changes to your order.

INTERNATIONAL CUSTOMERS //

Shipping rates and local duties, taxes and tariffs vary widely depending on your desired shipping location. We will provide you with a freight shipping estimate via online or phone. Please check with your local customs official for the current shipping and tax regulations.

All additional duties and taxes on international orders must be paid for by the customer. If refused, the customer will be responsible for any duties and/or freight paid by Sherrilltree, as well as any "abandoned merchandise" charges.

RETURN PROCEDURE //

Unfortunately it happens! If you are not satisfied with a product you have purchased from us, please feel free to return it, **unused and in its original packaging, within 60 days of purchase.** Call us at 800-525-8873 for a RMA number or visit Sherrilltree.com/returns for details.

Please note any item(s) labeled Final Sale, Custom items, Installed SENA units, PHC, Engine Power Equipment (after gassed or oiled), or are more than 60 days after purchase are not returnable. If there is an issue with your order (i.e. incorrect item, missing item, etc.) please let us know as soon as possible. After 60 days from point of purchase we will not be able to verify inventory and may not be able to resolve your issue to your satisfaction. Please call our Customer Service team with any questions or concerns at 800-525-8873. (Note: Sherrilltree does not offer product exchanges).

INCORRECT MERCHANDISE //

If you receive incorrect merchandise with your order, please call us immediately in order to expedite the processing of the correct item(s).

Reminder: We cannot offer a refund or credit for used items or other non-returnable items such as plant health care products (PHC), books or special orders.

WARRANTY RETURNS // Returns for defective / warranty claims may require technical inspection before a refund or credit can be issued. Please contact Customer Service (800-525-8873) for a RMA (Return Merchandise Authorization number). If a returned product is determined defective according to manufacturer's warranty, Sherrilltree will replace, credit or repair the item at our expense.

DAMAGED PACKAGES // When an order is delivered, it is very important to inspect the package(s) for damage before you sign for or open the package(s). Any damaged parcels must be reported to the shipping carrier as "damaged" immediately in order to submit a claim. Please keep the original boxes for inspection. Sherrilltree will not be responsible for orders damaged in transit.
